The Poetry of Science, Or, Studies of the Physical Phenomena of Nature Oct 16 2019 This book outlines all the important discoveries that had been made in natural philosophy up to the end of 1853 near when it was published. It conveys an assurance that every truth, however abstract it may appear, has a large popular value if studied in its relation to those generalities that embrace great natural phenomena. The True is the Beautiful. Whenever this becomes evident to our senses, its influences are of a soul-elevating character. The beautiful, whether it is perceived in the external forms of matter, associated in the harmonies of light and colour, appreciated in the modulations of sweet sounds, or mingled with those influences which are, as the inner life of creation, ever appealing to the soul through the vesture which covers all things, is the natural theme of the poet, and the chosen study of the philosopher.

Environment and Sustainable Development Mar 21 2020 Global society in the 21st century is facing challenges of improving the quality of air, water, soil and the environment and maintaining the ecological balance. Environmental pollution, thus, has become a major global concern. The modern growth of industrialization, urbanization, modern agricultural development and energy generation has resulted in the indiscriminate exploitation of natural resources for fulfilling human desires and needs, which has contributed in disturbing the ecological balance on which the quality of our environment depends. Human beings, in the truest sense, are the

product of their environment. The man-environment relationship indicates that pollution and deterioration of the environment have a social origin. The modern technological advancements in chemical processes/operations have generated new products, resulting in new pollutants in such abundant levels that they are above the self-cleaning capacity of the environment. One of the major issues in recent times is the threat to human lives due to the progressive deterioration of the environment from various sources. The impact of the pollutants on the environment will be significant when the accumulated pollutants load will exceed the carrying capacity of the receiving environment. Sustainable development envisages the use of natural resources, such as forests, land, water and fisheries, in a sustainable manner without causing changes in our natural world. The Rio de Janeiro-Earth Summit, held in Brazil in 1992, focused on sustainable development to encourage respect and concern for the use of natural resources in a sustainable manner for the protection of the environment. This book will be beneficial as a source of educational material to post-graduate research scholars, teachers and industrial personnel for maintaining the balance in the use of natural sources for sustainable development.

Mentalization-based Treatment for Children Dec 18 2019 Mentalization--based treatment (MBT) promotes clients' ability to interpret the meaning of others' behavior by considering their underlying mental states and intentions, as well as clients' capacity to understand the impact of their own behaviors on others. This book is the first comprehensive clinical introduction to using this approach with children, 5--12 years old, who experience emotional and behavioral problems including anxiety, depression, and relational difficulties. Written by an international team of clinician--researchers who are pioneering the MBT model with children, the authors begin by exploring the significance of mentalization and then devote the core chapters to the process of conducting short-term (9--12 sessions) MBT for children, including problem assessment and case formulation in terms of mentalizing techniques, the therapist's stance, and treatment termination. The approach draws on traditional psychodynamic principles, but integrates them with findings from attachment theory, the empirical study of mentalization, and features of other evidence--based approaches. This book includes a chapter--length case illustration and an appendix that lists measures of reflective functioning in children and their parents, as well as validation articles.
