Features include: multiple choice questions, bonus Q&As and podcasts. The phrase "the meaning of life" for many seems a quaint notion fit for satirical mauling by Monty Python or Douglas Adams. But in this spirited, stimulating, and quirky enquiry, famed critic Terry Eagleton takes a serious if often amusing look at the question and offers his own surprising answer. Eagleton first examines how centuries of thinkers and writers--from Marx and Schopenhauer to Shakespeare, Sartre, and Beckett--have responded to the ultimate question of meaning. He suggests, however, that it is only in modern times that the question has become problematic. But instead of tackling it head-on, many of us cope with the feelings of meaninglessness in our lives by filling them with everything from football to sex, Kabbala, Scientology, "New Age softheadedness," or fundamentalism. On the other hand, Eagleton notes, many educated people believe that life is an evolutionary accident that has no intrinsic meaning. If our lives have meaning, it is something with which we manage to invest them, not something with which they come ready made. Eagleton probes this view of meaning as a kind of private enterprise, and concludes that it fails to hold up. He argues instead that the meaning of life is not a solution to a problem, but a matter of living in a certain way. It is not metaphysical but ethical. It is not something separate from life, but what makes it worth living--that is, a certain quality, depth, abundance and intensity of life. Here then is a brilliant discussion of the problem of meaning by a leading thinker, who writes with a light and often irreverent touch, but with a very serious end in mind. "If you were to ask what provides some meaning in life nowadays for a great many people, especially men, you could do worse than reply 'football.' Not many of them perhaps would be willing to admit as much; but sport stands in for all those noble causes--religious faith, national sovereignty, personal honor, ethnic identity--for which, over the centuries, people have been prepared to go to their deaths. It is sport, not religion, which is now the opium of the people." Very First Questions and Answers is a new series to sit below First Questions and Answers, aimed at pre-school children and with more of a picture book approach. What are Germs? is the second title in the series, which follows on from What is Poo which sold over 100,000 copies worldwide since publication in November 2016. A very simple illustrated explanation of germs and hygiene. In a business world and society focused upon questions, there

has been an underappreciation of answers in capturing our attention, imagination and critical examination. In a complex and fast-moving world, Answer Intelligence (AQ) is our ability to provide elevated answers to emotionally connect, explain and predict, and achieve results. Many children are fascinated by animals and this engaging flap book will answer lots of their questions. It features entertaining and informative illustrations and over 50 flaps to lift and look beneath. 2018 Nautilus Book Awards Silver Winner What if you could unlock a better answer to your most vexing problem—in your workplace, community, or home life—just by changing the question? Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Or consider Nobel laureate Richard Thaler, who asked: "would it change economic theory if we stopped pretending people were rational?" Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality—that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical effect of being utterly surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. Questions Are the Answer delivers the insights Gregersen gained about the conditions that give rise to catalytic questions—and breakthrough insights—and how anyone can create them. In the spirit of Schott's Miscellany, The Magic of Reality, and The Dangerous Book for Boys comes Can a Bee Sting a Bee?—a smart, illuminating, essential, and utterly delightful handbook for perplexed parents and their curious children. Author Gemma Elwin Harris has lovingly compiled weighty questions from precocious grade school children—queries that have long dumbfounded even intelligent adults—and she's gathered together a notable crew of scientists, specialists, philosophers, and writers to answer them. Authors Mary Roach and Phillip Pullman, evolutionary biologist Richard Dawkins, chef Gordon Ramsay, adventurer Bear Grylls, and linguist Noam Chomsky are among the top experts responding to the Big Questions from Little People, ("Do animals have feelings?", "Why can't I tickle myself?", "Who is God?") with well-known comedians, columnists, and raconteurs offering hilarious alternative answers. Miles above your average general knowledge and trivia collections, this charming compendium is a book fans of the E.H. Gombrich classic, A Little History of the World, will adore. To get the best answer-in business, in life-you have to ask the best possible question. Innovation expert Warren Berger shows that ability is both an art and a science. It may be the most underappreciated tool at our disposal, one we learn to use well in infancy-and then abandon as we grow older. Critical to learning, innovation, success, even to happiness-yet often discouraged in our schools and workplaces-it can unlock new business opportunities and reinvent industries, spark creative insights at many levels, and provide a transformative new outlook on life. It is the ability to question-and to do so deeply, imaginatively, and "beautifully." In this fascinating exploration of the surprising power of questioning, innovation expert Warren Berger reveals that powerhouse businesses like Google, Nike, and Netflix, as well as hot Silicon Valley startups like Pandora and Airbnb, are fueled by the ability to ask fundamental, game-changing questions. But Berger also shares human stories of people using questioning to solve everyday problems-from "How can I adapt my career in a time of constant change?" to "How can I step back from the daily rush and figure out what really makes me happy?" By showing how to approach questioning with an open, curious mind and a willingness to work through a series of "Why," "What if," and "How" queries, Berger offers an inspiring framework of how we can all arrive at better solutions, fresh possibilities, and greater success in business and life. Have you ever wondered, what is stopping you to get a better IT job? It is just your lack of time to prepare for interview. Many interview materials are available in internet in scattered form, gathering them together and preparing for interview is a humongous task. The New York Public Library staff answers questions remarkable and preposterous, with illustrations by Barry Blitt. Have you've ever wondered if you can keep an octopus in a private home? Do you spend your time thinking about how much Napoleon's brain weighed? If so, Peculiar Questions and Practical Answers is the book for you. The New York Public Library has been fielding questions like these ever since it was founded in 1895. Of course, some of the questions have left the librarians scratching their heads... "In what occupations may one be barefooted?" "What time does a bluebird sing?" "What does it mean when you're being chased by an elephant?" "What kind of apple did Eve eat?" "How many neurotic people are there in the U.S.?" In Peculiar Questions and Practical Answers, the staff of the NYPL has dug through the archives to find thoughtful and often witty answers to over one hundred of the oddest, funniest, and most whimsical questions the library has received since it began record-keeping over seventy-five years ago. One of The New Yorker's best-known and beloved illustrators, Barry Blitt, has created watercolors that bring many of the questions hilariously to life in a book that answers, among others, the question "Does anyone have a copyright on the Bible?" Provides an introduction to the composition of matter, its changing states, and the effects of changing between states. Provides information about the world around us in question and answer format.
