C S Lewis readers will identify the main title of this new book: Melvin Tinker uses Lewis's prescient fiction work as a launchpad for a fascinating look at the rapidly changing worldview of Western civilization. Too often books dealing with these issues are academically inclined and not accessible by the ordinary reader: that is not the case here. Based on a lecture delivered at GAFCON in June 2018, this book will stimulate thinking and open the eyes of Christians to the dangers of the worldview relentlessly promoted by the media. 'How the West Was Lost' tracks the overlapping conquest, colonization, and consolidation of the trans-Appalachian frontier. Not a story of paradise lost, this is a book about possibilities lost. It focuses on the common ground between Indians and backcountry settlers which was not found. An impressive new history of China's relations with the West—told through the lives of two language interpreters who participated in the famed Macartney embassy in 1793 The 1793 British embassy to China, which led to Lord George Macartney's fraught encounter with the Qianlong emperor, has often been viewed as a clash of cultures fueled by the East's disinterest in the West. In *The Perils of Interpreting*, Henrietta Harrison presents a more nuanced picture, ingeniously shifting the historical lens to focus on Macartney's two interpreters at that meeting—Li Zibiao and George Thomas Staunton. Who were these two men? How did they intervene in the exchanges that they mediated? And what did these exchanges mean for them? From Galway to Chengde, and from political intrigues to personal encounters, Harrison reassesses a pivotal moment in relations between China and Britain. She shows that there were Chinese who were familiar with the West, but growing tensions endangered those who embraced both cultures and would eventually culminate in the Opium Wars. Harrison demonstrates that the Qing court's ignorance about the British did not simply happen, but was manufactured through the repression of cultural go-betweens like Li and Staunton. She traces Li's influence as Macartney's interpreter, the pressures Li faced in China as a result, and his later years in hiding. Staunton interpreted successfully for the British East India Company in Canton, but as Chinese anger grew against British imperial expansion in South Asia, he was compelled to flee to England. Harrison contends that in silencing expert voices, the Qing court missed an opportunity to gain insights that might have prevented a losing conflict with Britain. Uncovering the lives of two overlooked figures, *The Perils of Interpreting* offers an empathic argument for cross-cultural understanding in a connected world. *How the West was Lost* charts how over the last 50 years the most advanced and advantaged countries of the world have squandered their dominant position through a sustained catalogue of fundamentally flawed economic policies. It is these decisions that, along the way, have resulted in an economic and geo-political see-saw, which is now poised to tip in favour of the emerging world. By forging closer ties with the emerging economies, rethinking trade barriers, overhauling their tax systems to encourage savings rather than ravenous consumption, and specifically addressing the three essential ingredients for growth (capital, labour and technology) it might yet still be possible for the West to firmly get back in the race. This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age". How a Chinese pirate defeated

European colonialists and won Taiwan during the seventeenth century. During the seventeenth century, Holland created the world's most dynamic colonial empire, outcompeting the British and capturing Spanish and Portuguese colonies. Yet, in the Sino-Dutch War—Europe's first war with China—the Dutch met their match in a colorful Chinese warlord named Koxinga. Part samurai, part pirate, he led his generals to victory over the Dutch and captured one of their largest and richest colonies—Taiwan. How did he do it? Examining the strengths and weaknesses of European and Chinese military techniques during the period, *Lost Colony* provides a balanced new perspective on long-held assumptions about Western power, Chinese might, and the nature of war. It has traditionally been asserted that Europeans of the era possessed more advanced science, technology, and political structures than their Eastern counterparts, but historians have recently contested this view, arguing that many parts of Asia developed on pace with Europe until 1800. While *Lost Colony* shows that the Dutch did indeed possess a technological edge thanks to the Renaissance fort and the broadside sailing ship, that edge was neutralized by the formidable Chinese military leadership. Thanks to a rich heritage of ancient war wisdom, Koxinga and his generals outfoxed the Dutch at every turn. Exploring a period when the military balance between Europe and China was closer than at any other point in modern history, *Lost Colony* reassesses an important chapter in world history and offers valuable and surprising lessons for contemporary times.

*The Culture War*. How the West lost its greatness and was weakened from within outlines how the West lost its values, causing its current decline. It is a forceful attack on the extreme liberal, anti-religious ideology which since the 1960's has permeated the Western culture and weakened its very core. The West is now characterized by strict elitist media censorship, hedonism, a culture of drug abuse, abortion, ethnic clashes and racial divide, a destructive feminism and the dramatic breakdown of the family. An ultra-rich elite pushes our nations into a new, authoritarian globalist structure, with no respect for Western historical values. Yet, even in the darkest hour, there is hope. This manifesto outlines the remedy for the current malaise and describes the greatness of our traditional and religious values that once made our civilization prosper. It shows how we can restore these values to bring back justice, mercy, faith, honesty, fidelity, kindness and respect for one another. Virtues that will motivate individuals to love one another, the core of what will make us great again. The masterpiece of the German experience during World War I, considered by many the greatest war novel of all time—with an Oscar-nominated film adaptation now streaming on Netflix. “[Erich Maria Remarque] is a craftsman of unquestionably first rank.”—The New York Times Book Review

*I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive.*

Examines why the West has failed to achieve its objectives in Afghanistan, discussing the country's drug trade, political corruption, troubled relations with Pakistan, and harsh terrain, and the lessons about nation building that can be learned from the experience.

*The Association of Southeast Asian Nations is a miracle. Why?* In an era of growing cultural pessimism, many thoughtful individuals believe that different civilisations—especially Islam and the West—cannot live together in peace. The ten countries of ASEAN provide a thriving counter-example of civilizational co-existence. Here 625m people live together in peace. This miracle was delivered by ASEAN. In an era of growing economic pessimism, where many young people believe that their lives will get worse in coming decades, Southeast Asia bubbles with optimism. In an era where many thinkers predict rising geopolitical competition and tension,

ASEAN regularly brings together all the world's great powers. Stories of peace are told less frequently than stories of conflict and war. ASEAN's imperfections make better headlines than its achievements. But in the hands of thinker and writer Kishore Mahbubani, the good news story is also a provocation and a challenge to the rest of the world. This excellent book explains, in clear and simple terms, how and why ASEAN has become one of the most successful regional organizations in the world. - George Yeo

A powerful and passionate account of how, against all odds, ASEAN transformed the region and why Asia and the world need it even more today. - Amitav Acharya

The twenty-first century has seen a rise in the global middle class that brings an unprecedented convergence of interests and perceptions, cultures and values. Kishore Mahbubani is optimistic. We are creating a new global civilization. Eighty-eight percent of the world's population outside the West is rising to Western living standards, and sharing Western aspirations. Yet Mahbubani, one of the most perceptive global commentators, also warns that a new global order needs new policies and attitudes. Policymakers all over the world must change their preconceptions and accept that we live in one world. National interests must be balanced with global interests. Power must be shared. The U.S. and Europe must cede some power. China and India, Africa and the Islamic world must be integrated. Mahbubani urges that only through these actions can we create a world that converges benignly. This timely book explains how to move forward and confront many pressing global challenges. For more than a century, the United States has been the world's most powerful state. Now some analysts predict that China will soon take its place. Does this mean that we are living in a post-American world? Will China's rapid rise spark a new Cold War between the two titans? In this compelling essay, world renowned foreign policy analyst, Joseph Nye, explains why the American century is far from over and what the US must do to retain its lead in an era of increasingly diffuse power politics. America's superpower status may well be tempered by its own domestic problems and China's economic boom, he argues, but its military, economic and soft power capabilities will continue to outstrip those of its closest rivals for decades to come.

Sex in China introduces readers to some of the dramatic shifts that have taken place in Chinese sexual behaviours and attitudes, and public discussions of sex, since the 1980s. The book explores what it means to talk about 'sex' in present-day China, where sex and sexuality are more and more visible in everyday life. Elaine Jeffreys and Haiqing Yu situate China's changing sexual culture, and how it is governed, in the socio-political history of the People's Republic of China. They demonstrate that Chinese governmental authorities and policies do not set out strictly to repress 'sex'; they also create spaces for the emergence of new sexual subjects and subjectivities. They discuss the complexities surrounding the ongoing explosion of commentary on sex and sexuality in the PRC, and the emergence of new sexual behaviours and mores. Sex in China offers clear, critical coverage of sex-related issues that are a focus of public concern and debate in China - chapters focus on sex studies; marriage and family planning; youth and sex(iness); gay, lesbian and queer discourses and identities; commercial sex; and HIV/AIDS. This book will be an invaluable resource for students and scholars both of modern China and of sex and sexualities, who wish to understand the role that 'sex' plays in contemporary China. A blistering assessment of the West's abandonment of history as it succumbs to an attack of social and cultural dementia, by leading historian David Andress.

This commemorative edition of *Can Asians Think?* celebrates the long-running success of the publication over two decades, and the continued relevance of the author's thought-provoking essays. This edition comprises of 18 essays selected by the author from those published over the past 20 years and additional new essays, and includes a new Introduction and Postscript comments by the author on what he foresees for Asia in the years ahead. The essays are set out under three parts: 1. Can Asians Think? 2. Can Asians Think for Themselves? 3. Can Asians Think for Humanity? "This 20th anniversary edition of *Can Asians Think?* provides an

opportunity for all Asians, from East Asia to West Asia, from Central Asia to Southeast Asia, to reflect on how remarkable these past two decades – from 1998 to 2018 – have been for Asian history.” – Kishore Mahbubani The defining geopolitical contest of the twenty-first century is between China and the US. But is it avoidable? And if it happens, is the outcome already inevitable? China and America are world powers without serious rivals. They eye each other warily across the Pacific; they communicate poorly; there seems little natural empathy. A massive geopolitical contest has begun. America prizes freedom; China values freedom from chaos. America values strategic decisiveness; China values patience. America is becoming society of lasting inequality; China a meritocracy. America has abandoned multilateralism; China welcomes it. Kishore Mahbubani, a diplomat and scholar with unrivalled access to policymakers in Beijing and Washington, has written the definitive guide to the deep fault lines in the relationship, a clear-eyed assessment of the risk of any confrontation, and a bracingly honest appraisal of the strengths and weaknesses, and superpower eccentricities, of the US and China. “Perfect to be read late into the night.”—Stefan Bachmann, internationally bestselling author of *The Peculiar* “A spooky sisterhood mystery that is sure to be a hit with readers.”—School Library Journal (starred review) “Grab a flashlight and stay up late with this one.”—Kirkus Reviews Once there were two sisters who did everything together. But only one of them disappeared. New York Times–bestselling author Jacqueline West’s *Long Lost* is an atmospheric, eerie mystery brimming with suspense. Fans of Katherine Arden’s *Small Spaces* and Victoria Schwab’s *City of Ghosts* series will lose themselves in this mesmerizing and century-spanning tale. Eleven-year-old Fiona has just read a book that doesn’t exist. When Fiona’s family moves to a new town to be closer to her older sister’s figure skating club—and far from Fiona’s close-knit group of friends—nobody seems to notice Fiona’s unhappiness. Alone and out of place, Fiona ventures to the town’s library, a rambling mansion donated by a long-dead heiress. And there she finds a gripping mystery novel about a small town, family secrets, and a tragic disappearance. Soon Fiona begins to notice strange similarities that blur the lines between the novel and her new town. With a little help from a few odd Lost Lake locals, Fiona uncovers the book’s strange history. Lost Lake is a town of restless spirits, and Fiona will learn that both help and danger come from unexpected places—maybe even from the sister she thinks doesn’t care about her anymore. New York Times–bestselling and acclaimed author Jacqueline West weaves a heart-pounding, intense, and imaginative mystery that builds anticipation on every page, while centering on the strong and often tumultuous bond between sisters. Laced with suspense, *Long Lost* will fascinate readers of Trenton Lee Stewart’s *The Secret Keepers* and fans of ghost stories. In this magisterial work, leading cultural critic Mary Eberstadt delivers an influential new theory about the decline of religion in the Western world. The conventional wisdom is that the West first experienced religious decline, followed by the decline of the family. Eberstadt turns this standard account on its head. Marshaling an impressive array of research, from fascinating historical data on family decline in pre-Revolutionary France to contemporary popular culture both in the United States and Europe, Eberstadt shows the reverse is also true: the undermining of the family has further undermined Christianity itself. Drawing on sociology, history, demography, theology, literature, and many other sources, Eberstadt shows that family decline and religious decline have gone hand in hand in the Western world in a way that has not been understood before—that they are, as she puts it in a striking new image summarizing the book’s thesis, “the double helix of society, each dependent on the strength of the other for successful reproduction.” In sobering final chapters, Eberstadt then lays out the enormous ramifications of the mutual demise of family and faith in the West. While it is fashionable in some circles to applaud the decline of both religion and the nuclear family, there are, as Eberstadt reveals, enormous social, economic, civic, and other costs attendant on both declines. Her conclusion considers this compelling question: whether the economic and demographic crisis now roiling Europe and

spreading to America will have the unintentional result of reviving the family as the most viable alternative to the failed welfare state—fallout that could also lay the groundwork for a religious revival as well. How the West Really Lost God is a startlingly original account of how secularization happens and a sweeping brief about why everyone should care. A book written for agnostics as well as believers, atheists as well as “none of the above,” it will permanently change the way every reader understands the two institutions that have hitherto undergirded Western civilization as we know it—family and faith—and the fundamental nature of the relationship between those two pillars of history. A landmark book that completely transforms our understanding of the crisis of liberalism, from two pre-eminent intellectuals Why did the West, after winning the Cold War, lose its political balance? In the early 1990s, hopes for the eastward spread of liberal democracy were high. And yet the transformation of Eastern European countries gave rise to a bitter repudiation of liberalism itself, not only there but also back in the heartland of the West. In this brilliant work of political psychology, Ivan Krastev and Stephen Holmes argue that the supposed end of history turned out to be only the beginning of an Age of Imitation. Reckoning with the history of the last thirty years, they show that the most powerful force behind the wave of populist xenophobia that began in Eastern Europe stems from resentment at the post-1989 imperative to become Westernized. Through this prism, the Trump revolution represents an ironic fulfillment of the promise that the nations exiting from communist rule would come to resemble the United States. In a strange twist, Trump has elevated Putin's Russia and Orbán's Hungary into models for the United States. Written by two pre-eminent intellectuals bridging the East/West divide, The Light that Failed is a landmark book that sheds light on the extraordinary history of our Age of Imitation. The West's two-century epoch as global powerhouse is at an end. A new world order, with China and India as the strongest economies, dawns. How will the West react to its new status of superpower in decline? In Kishore Mahbubani's timely polemic, he argues passionately that the West can no longer presume to impose its ideology on the world, and crucially, that it must stop seeking to intervene, politically and militarily, in the affairs of other nations. He examines the West's greatest follies of recent times: the humiliation of Russia at the end of the Cold War, which led to the rise of Putin, and the invasion of Iraq after 9/11, which destabilised the Middle East. Yet, he argues, essential to future world peace are the Western constructs of democracy and reason, which it must continue to promote, by diplomacy rather than force, via multilateral institutions of global governance such as the UN. Only by recognising its changing status, and seeking to influence rather than dominate, he warns, can the West continue to play a key geopolitical role. 'Kishore Mahbubani might well be the most intelligent, friendly and doggedly persistent critic of the West. In this brief book, he delivers some of his trademark analysis and pungent observations. We should all think of it as the cold shower that is urgently needed to revive the West' Fareed Zakaria, author of The Post-American World 'A powerful, disputatious book. It's not comfortable reading, and it wasn't meant to be' Paul Kennedy, Director of International Security Studies and Professor of History at Yale University For two centuries Asians have been bystanders in world history, reacting defenselessly to the surges of Western

commerce, thought, and power. That era is over. Asia is returning to the center stage it occupied for eighteen centuries before the rise of the West. By 2050, three of the world's largest economies will be Asian: China, India, and Japan. In *The New Asian Hemisphere*, Kishore Mahbubani argues that Western minds need to step outside their "comfort zone" and prepare new mental maps to understand the rise of Asia. The West, he says, must gracefully share power with Asia by giving up its automatic domination of global institutions from the IMF to the World Bank, from the G7 to the UN Security Council. Only then will the new Asian powers reciprocate by becoming responsible stakeholders in a stable world order. Westerners love an existential crisis. Each decade since the First World War has raised up prophets of doom proclaiming the end of the Western world as we know it. But this time it's real. Weighed down by economic woes, the seemingly endless war on terror, and the declining power of religion as a unifying force, the West has been limping along. With the public sphere fraying and authoritarian politics rising, this deep-seated crisis is now urgent, and potentially fatal. How did we get here? Ben Ryan's diagnosis is simple: the West is a myth, and it is dying. Its own people are no longer convinced or united by its defining ideal--a sense of universal morals, and of constant progress towards them. Following a series of 'system failures', Westerners--from urban millennials to post-industrial workers-- have lost faith in the West as a moral force. Yet there is a chance for redemption, if we can forge a new common myth of the West: one reviving its great values, and reshaping its ideals for a diverse, forward-looking world. This smart and thoughtful book explores what the West is, what has happened to it, and how we might save it. Were World Wars I and II inevitable? Were they necessary wars? Or were they products of calamitous failures of judgment? In this monumental and provocative history, Patrick Buchanan makes the case that, if not for the blunders of British statesmen-- Winston Churchill first among them--the horrors of two world wars and the Holocaust might have been avoided and the British Empire might never have collapsed into ruins. Half a century of murderous oppression of scores of millions under the iron boot of Communist tyranny might never have happened, and Europe's central role in world affairs might have been sustained for many generations. Among the British and Churchillian errors were: • The secret decision of a tiny cabal in the inner Cabinet in 1906 to take Britain straight to war against Germany, should she invade France • The vengeful Treaty of Versailles that mutilated Germany, leaving her bitter, betrayed, and receptive to the appeal of Adolf Hitler • Britain's capitulation, at Churchill's urging, to American pressure to sever the Anglo-Japanese alliance, insulting and isolating Japan, pushing her onto the path of militarism and conquest • The greatest mistake in British history: the unsolicited war guarantee to Poland of March 1939, ensuring the Second World War Certain to create controversy and spirited argument, Churchill, Hitler, and "the Unnecessary War" is a grand and bold insight into the historic failures of judgment that ended centuries of European rule and guaranteed a future no one who lived in that vanished world could ever have envisioned. Why have Israelis and Palestinians failed to achieve a two-state solution to the conflict that has cost so much and lasted so long? In *Paradigm Lost*, Ian S. Lustick brings fifty years as an analyst of the Arab-Israeli dispute to bear on this question and offers a provocative explanation of why continued attempts to divide the land will have no more success than would negotiations to establish a one-state solution. Basing his argument on the decisiveness of unanticipated consequences, Lustick shows how the combination of Zionism's partially successful Iron Wall strategy for dealing with Arabs, an Israeli political culture saturated with what the author calls "Holocaustia," and the Israel lobby's dominant influence on American policy toward the Arab-Israeli conflict scuttled efforts to establish a Palestinian state alongside Israel. Yet, he demonstrates, it has also unintentionally set the stage for new struggles and "better problems" for both Israel and the Palestinians. Drawing on the history of scientific ideas that once seemed certain but were ultimately discarded, Lustick encourages shifting attention from two-state blueprints that provide no map for realistic action to the

democratizing competition that arises when different subgroups, forced to be part of the same polity, redefine their interests and form new alliances to pursue them. Paradigm Lost argues that negotiations for a two-state solution between the Mediterranean Sea and the Jordan River are doomed and counterproductive. Israeli Jews and Palestinian Arabs can enjoy the democracy they deserve but only after decades of struggle amid the unintended but powerful consequences of today's one-state reality. In this exhaustive study of the NWFP and its adjoining area of Afghanistan, Raghvendra Singh argues that with an increasingly powerful China knocking on India's door, it is imperative to recognize that the docile acceptance of NWFP's loss in 1947 may have serious consequences for India's security in times to come. How the West's politicians and military leaders will lose WWII to China in 2025. The age of Western hegemony is over. Whether or not America itself declines or thrives under President Trump's leadership, the post-war liberal international order underpinned by US military, economic and ideological primacy and supported by global institutions serving its power and purpose, is coming to an end. But what will take its place? A Chinese world order? A re-constituted form of American hegemony? A regionalized system of global cooperation, including major and emerging powers? In this updated and extended edition of his widely acclaimed book, Amitav Acharya offers an incisive answer to this fundamental question. While the US will remain a major force in world affairs, he argues that it has lost the ability to shape world order after its own interests and image. As a result, the US will be one of a number of anchors including emerging powers, regional forces, and a concert of the old and new powers shaping a new world order. Rejecting labels such as multipolar, apolar, or G-Zero, Acharya likens the emerging system to a multiplex theatre, offering a choice of plots (ideas), directors (power), and action (leadership) under one roof. Finally, he reflects on the policies that the US, emerging powers and regional actors must pursue to promote stability in this decentred but interdependent, multiplex world. Written by a leading scholar of the international relations of the non-Western world, and rising above partisan punditry, this book represents a major contribution to debates over the post-American era. Filled with unforgettable stories of emperors, generals, and religious patriarchs, as well as fascinating glimpses into the life of the ordinary citizen, *Lost to the West* reveals how much we owe to the Byzantine Empire that was the equal of any in its achievements, appetites, and enduring legacy. For more than a millennium, Byzantium reigned as the glittering seat of Christian civilization. When Europe fell into the Dark Ages, Byzantium held fast against Muslim expansion, keeping Christianity alive. Streams of wealth flowed into Constantinople, making possible unprecedented wonders of art and architecture. And the emperors who ruled Byzantium enacted a saga of political intrigue and conquest as astonishing as anything in recorded history. *Lost to the West* is replete with stories of assassination, mass mutilation and execution, sexual scheming, ruthless grasping for power, and clashing armies that soaked battlefields with the blood of slain warriors numbering in the tens of thousands. An anonymous member of the U.S. intelligence community argues that Islamists are not against democracy, but specific U.S. policies viewed as threatening to their lands and religion allow al Qaeda to continue to gain support. In this four-color illustrated journey that is part travelogue and part theological investigation, bestselling author and acclaimed Bible scholar John Dominic Crossan and his wife Sarah painstakingly travel throughout the ancient Eastern church, documenting through text and image a completely different model for understanding Easter's resurrection story, one that provides promise and hope for us today. Traveling the world, the Crossans noticed a surprising difference in how the Eastern Church considers Jesus' resurrection—an event not described in the Bible. At Saint Barbara's Church in Cairo, they found a painting in which the risen Jesus grasps the hands of other figures around him. Unlike the Western image of a solitary Jesus rising from an empty tomb that he viewed across Eastern Europe, Asia, and the Middle East, the Crossans saw images of the resurrection depicting a Jesus grasping the hands of figures

around him, or lifting Adam and Eve to heaven from Hades or hell, or carrying the old and sick to the afterlife. They discovered that the standard image for the Resurrection in Eastern Christianity is communal and collective, something unique from the solitary depiction of the resurrection in Western Christianity. Fifteen years in the making, *Resurrecting Easter* reflects on this divide in how the Western and Eastern churches depict the resurrection and its implications. The Crossans argue that the West has gutted the heart of Christianity's understanding of the resurrection by rejecting that once-common communal iconography in favor of an individualistic vision. As they examine the ubiquitous Eastern imagery of Jesus freeing Eve from Hades while ascending to heaven, the Crossans suggest that this iconography raises profound questions about Christian morality and forgiveness. A fundamentally different way of understand the story of Jesus' rebirth illustrated with 130 images, *Resurrecting Easter* introduces an inclusive, traditional community-based ideal that offers renewed hope and possibilities for our fractured modern society. CNN "Book of the Week" Featuring a foreword by Henry Kissinger The grand strategist and founder of modern Singapore offers key insights and opinions on globalization, geopolitics, economic growth, and democracy in a series of interviews with the author of *Destined for War*, and others "If you are interested in the future of Asia, which means the future of the world, you've got to read this book." —Fareed Zakaria, CNN When Lee Kuan Yew speaks, presidents, prime ministers, diplomats, and CEOs listen. Lee, the founding father of modern Singapore and its prime minister from 1959 to 1990, has honed his wisdom during more than fifty years on the world stage. Almost single-handedly responsible for transforming Singapore into a Western-style economic success, he offers a unique perspective on the geopolitics of East and West. American presidents from Richard Nixon to Barack Obama have welcomed him to the White House; British prime ministers from Margaret Thatcher to Tony Blair have recognized his wisdom; and business leaders from Rupert Murdoch to Rex Tillerson, CEO of Exxon Mobil, have praised his accomplishments. This book gathers key insights from interviews, speeches, and Lee's voluminous published writings and presents them in an engaging question and answer format. Lee offers his assessment of China's future, asserting, among other things, that "China will want to share this century as co-equals with the U.S." He affirms the United States' position as the world's sole superpower but expresses dismay at the vagaries of its political system. He offers strategic advice for dealing with China and goes on to discuss India's future, Islamic terrorism, economic growth, geopolitics and globalization, and democracy. Lee does not pull his punches, offering his unvarnished opinions on multiculturalism, the welfare state, education, and the free market. This little book belongs on the reading list of every world leader. *Losing Eden* traces the environmental history and development of the American West and explains how the land has shaped and been shaped by the people who live there. Discusses key events and topics from the Beringia migration, Columbian Exchange, and federal territorial acquisition to post-war expansion, resource exploitation, and climate change Structures the coverage around three important themes: balancing economic success and ecological protection; avoiding "the tragedy of the commons"; and achieving sustainability Contains an accessible, up-to-date narrative written by an expert scholar and professor that supplements a variety of college-level survey or seminar courses on US, American West, or environmental history Incorporates student-friendly features, including definitions of key terms, suggested reading sections, and over 30 illustrations Nothing in the papers, not the most vivid and heart-rending descriptions, have made me realise war like your letters' Vera Brittain to Roland Leighton, 17 April 1915. This selection of letters, written between 1913 & 1918, between Vera Brittain and four young men - her fiance Roland Leighton, her brother Edward and their close friends Victor Richardson & Geoffrey Thurlow present a remarkable and profoundly moving portrait of five young people caught up in the cataclysm of total war. Roland, 'Monseigneur', is the 'leader' & his letters most clearly trace the path leading from

idealism to disillusionment. Edward, 'Immaculate of the Trenches', was orderly & controlled, down even to his attire. Geoffrey, the 'non-militarist at heart' had not rushed to enlist but put aside his objections to the war for patriotism's sake. Victor on the other hand, possessed a very sweet character and was known as 'Father Confessor'. An important historical testimony telling a powerful story of idealism, disillusionment and personal tragedy. When faced with global instability and economic uncertainty, it is tempting for states to react by closing borders, hoarding wealth and solidifying power. We have seen it at various times in Japan, France and Italy and now it is infecting much of Europe and America, as the vote for Brexit in the UK has vividly shown. This insularity, together with increased inequality of income and wealth, threatens the future role of the West as a font of stability, prosperity and security. Part of the problem is that the principles of liberal democracy upon which the success of the West has been built have been suborned, with special interest groups such as bankers accruing too much power and too great a share of the economic cake. So how is this threat to be countered? States such as Sweden in the 1990s, California at different times or Britain under Thatcher all halted stagnation by clearing away the powers of interest groups and restoring their societies' ability to evolve. To survive, the West needs to be porous, open and flexible. From reinventing welfare systems to redefining the working age, from reimagining education to embracing automation, Emmott lays out the changes the West must make to revive itself in the moment and avoid a deathly rigid future. Finalist for the 2022 Reading the West Debut Fiction Award Finalist for the 2022 Colorado Book Award for Literary Fiction Longlisted for the 2022 PEN/Robert W. Bingham Prize for Debut Short Story Collection Set in the western sagebrush steppe, *Site Fidelity* is a vivid, intimate, and deeply human exploration of life on the shifting terrain of our changing planet. Firmly rooted in the modern American West, *Site Fidelity* follows women and families who feel the instinctual, inexplicable pull of a home they must work to protect from the effects of economic inequity and climate catastrophe. A seventy-four-year-old nun turns to eco-sabotage to stop a fracking project. A woman delivers her own baby in a Nevada ghost town. A young farmer hides her chicken flock from the government during a bird flu epidemic. An ornithologist returns home to care for her rancher father and gets caught up trying to protect a breeding group of endangered Gunnison sage grouse. In lean, lyrical prose, Claire Boyles evokes the bleakness and beauty of our threatened western landscapes. Spanning the decades from the 1970s to a plausible near future, this knockout debut introduces unforgettable characters who must confront the challenges of caregiving and loss alongside the very practical impacts of fracking, water rights law, and other agricultural policies. *Site Fidelity* is a vivid, intimate, and deeply human exploration of life on the shifting terrain of our changing planet. Consumption has been the fuel that has driven the engine of global capitalism. The recent financial crisis has seen the West's leading economists and policy makers urging Asia to make a conscious effort to consume more and thereby help save the global economy. This is a view shaped by conventional wisdom which conveniently refuses to acknowledge both the uncomely effects of consumption and the limits to growth. Consumptionomics argues that this blinkered view needs to be replaced by a more rational approach to the challenges of the 21st century. If Asians aspire to consumption levels taken for granted in the West, the results would be environmentally catastrophic across the globe. Needless to say, it will also have significant geopolitical impacts as nations scramble for diminishing resources. Contrary to the prevailing view in the West that the 500-year dominance of Western civilization points to it being the only universal civilization. *Can Asians Think?* argues that other civilizations may yet make equal contributions to the development and growth of mankind. Hailed as "an Asian Toynbee" and "the Max Weber of the new Confucian ethic", Mahbubani continues to illuminate his central arguments with new essays in this fourth edition.
