**Educators' Perceptions of Guided Reading** Feb 19 2020 "The purpose of this six week qualitative and phenomenological study was to examine the implementation of guided reading as perceived by elementary educators in an urban school. Six first through fifth grade educators were identified as participants because their grade levels are departmentalized and teach reading/ELA. This research study addressed three research questions: (a) What do educators understand about the present instructional approaches to guided reading?, (b) How do educators implement guided reading in their classrooms?, and (c) What are the biggest challenges educators face when implementing guided reading? The three data points utilized in this study included responses to interview questions, evidence from teacher observations, and verification of lesson plan components. The participants were interviewed using opened-ended [sic] interview questions. The participants were also observed using a guided reading observation form, and the participants' lesson plans were examined using a teacher lesson plan checklist. The results yielded three major findings

from this research study: teachers are somewhat educated on the purposes for implementing guided reading, teachers need access to a broader range of texts, and participants of this study do not include all of the essential guided reading components in their lesson plans."--

**More Than Guided Reading** Aug 19 2022 Is there too much emphasis on guided reading in primary classrooms? It's a question that many educators, like kindergarten teacher and literacy coach Cathy Mere, are starting to ask. Guided reading provides opportunities to teach students the strategies they need to learn how to read increasingly challenging texts, but Cathy found that she needed to find other ways to help students gain independence. While maintaining guided reading as an important piece of their reading program, teachers need to offer students opportunities during the day to develop as readers, to learn to choose books, to find favorite genres and authors, and to talk about their reading. In More Than Guided Reading, Cathy shares her journey as she moved from focusing on guided reading as the center of her reading program to placing children at the heart of literacy learning?not only providing more time for students to discover their reading lives, but also shaping instruction to meet the needs of the diverse learners in her classroom. By changing the structure of the day, Cathy found she was better able to adjust the support she was providing students, allowing time for whole-class focus lessons, conferences, and opportunities to share ideas, as well as reading from self-selected texts using the strategies, skills, and understandings acquired in reader's workshop. The focus lesson is the centerpiece of the workshop. It is often tied to a read-aloud and connected to learning from the previous day, helping to build skills, extend thinking, and develop independence over time. This thoroughly practical text offers numerous sample lessons, questions for conferences, and ideas for revamping guided reading groups. It

will help teachers tweak the mix of instructional components in their reading workshops, and provoke school-wide conversations about the place of guided reading in a complete literacy curriculum.
