The emotional and social components of teaching medical students to be good

doctors The pelvic exam is considered a fundamental procedure for medical students to learn; it is also often the one of the first times where medical students are required to touch a real human being in a professional manner. In *Feeling Medicine*, Kelly Underman gives us a look inside these gynecological teaching programs, showing how they embody the tension between scientific thought and human emotion in medical education. Drawing on interviews with medical students, faculty, and the people who use their own bodies to teach this exam, Underman offers the first in-depth examination of this essential, but seldom discussed, aspect of medical education. Through studying, teaching, and learning about the pelvic exam, she contrasts the technical and emotional dimensions of learning to be a physician. Ultimately, *Feeling Medicine* explores what it means to be a good doctor in the twenty-first century, particularly in an era of corporatized healthcare. Focused on rotations in regional anesthesia and chronic pain, this book provides a structured review of the concepts covered in the American Board of Anesthesiology in-training exam. The first section of the book covers regional anesthesia with dedicated chapters on basic science, acute postoperative pain, and nerve blocks for neuraxial, lower and upper extremity blocks, and head and neck. The second section on chronic pain includes chapters on basic

science and common pain conditions - including craniofacial pain, CRPS, neuropathic pain, and cancer pain. This section closes on multimodal analgesia and other treatment approaches. Each chapter presents a common clinical topic and is organized by indications, preparation, technique, complication, prevention, clinical pearls, and related ABA key points. Highlights must-know information in bold throughout the text. Concise, practical, and easy-to-read, this book will aid anesthesiology residents, certified nurse anesthetists, and medical students in their study regarding patient care practices on regional anesthesia and chronic pain. The book will also be useful to residents going into regional anesthesia and pain medicine subspecialties during the year of their anesthesiology training. "This study guide for the Board of Certification (BOC) exam was inspired and developed as a result of a strong passion for our profession. Athletic training is a unique health care profession in that the athletic trainer is often in the position of experiencing the results of their efforts. The patients' victories are our victories, and their losses are our losses. We become friends, mentors, counselors, teachers, guardians, protectors, and healers. It takes a special individual to become a proficient and dedicated professional athletic trainer. Long hours are spent in the athletic training facility, classroom, and field experience venues preparing for the final exam that will allow you to place the letters "ATC" behind your name. Our intent in writing this study guide is to assist you in accomplishing

that final goal of passing the BOC exam. It is an accumulation of dedicated research and past experience. We have included a section on study techniques to assist you in your preparation for the exam and a general overview of the exam format to help you organize your thoughts. This guide has been divided into 7 chapters: Study Techniques and Test-Taking Strategies, General Information and the Examination Format, Knowledge Assessment, Clinical Decision Making, Skills Assessment, Critical Thinking, and What to Do if You Do Not Pass the First Time. The multiple-choice and true/false questions in Chapter 3 have been organized according to the BOC's Practice Analysis, 7th ed Educational Domains and are also subdivided into related athletic training subjects to allow you to assess specific subjects in which you may be weak and those in which your strengths lie. Although this study guide will assist you in preparing for the certification exam, it should not be used in place of your textbooks or other sources of study from your academic program. It is not intended to be a practice exam; it is meant only to be used as an adjunct source of information and to tie everything you have learned in the classroom and during your clinical education experiences together. In Chapters 1 and 2, we have provided some specific tools to help you organize yourself up to 6 months prior to the examination. Chapter 3, Knowledge Assessment, consists of more than 1400

study questions. The majority of the multiple choice and true/false questions is a "mixed bag" of subjects derived from the BOC's Practice Analysis Educational Domains, and the balance covers most of the related subject matter of athletic training, as previously mentioned. Chapter 4, Clinical Decision Making, tests your ability to make appropriate judgment calls and improve your problem-solving skills. Each problem presents a specific scenario with several possible options that you can choose to follow. Chapter 5, Skills Assessment, is composed of 26 problems that are designed to test your manual athletic training skills. Chapter 6, Critical Thinking, is composed of scenario-based problems designed to test your ability to develop differential diagnoses. Chapter 7, What to Do if You Do Not Pass the First Time, is directed at helping you if your test results are not favorable. We have included some suggestions on how to deal with the immediate difficulties not passing may cause and how to begin the process of developing a new approach for your next attempt. Provided you have applied the information you have learned in the classroom and on the field to the study strategies we have offered in this manual, you will not need to read this final chapter. The 7th Edition also features an online component with a variety of questions. You can test your knowledge with these exams and receive the results for each when completed. Also, at the end of each sample

exam, you will be able to review the questions along with the correct answers for a complete and comprehensive review. We wish you luck and look forward to welcoming you as a colleague"-- NASM Study Guide: NASM Personal Training Book & Exam Prep for the National Academy of Sports Medicine CPT Test Developed for test takers trying to achieve a passing score on the NASM-CPT Exam, this comprehensive study guide includes: -Quick Overview -Test-Taking Strategies -Introduction -Basic and Applied Sciences and Nutritional Concepts - Assessment -Program Design - Exercise Technique and Training Instruction -Client Relations and Behavioral Coaching -Professional Development and Responsibility -Practice Questions -Detailed Answer Explanations Each section of the test has a comprehensive review that goes into detail to cover all of the content likely to appear on the NASM-CPT Exam. Looking for tools to help you prepare for the CITP Exam? The CITP self-study guide consists of an in-depth and comprehensive review of the fundamental dimensions of the CITP body of knowledge. This guide features various and updated concepts applicable to all accounting professionals who leverage Information Technology to effectively manage financial information. There are five dimensions covered in the guide: Dimension 1 Risk Assessment Dimension 2 Fraud Considerations Dimension 3 Internal Controls &

Information Technology General Controls Dimension 4 Evaluate, Test and Report Dimension 5 Information Management and Business Intelligence The review guide is designed not only to assist in the candidate's preparation of the CITP examination but will also enhance your knowledge base in today's marketplace. Using the complete guide does not guarantee the candidate of successfully passing the CITP exam. This guide addresses most of the subjects on the CITP exam's content specification outline and is not meant to teach topics to the candidate for the first time. A significant amount of cooperating and independent readings will be necessary to prepare for the exam, regardless of whether the candidate completes the review course or not. "This study guide for the Board of Certification (BOC) exam was inspired and developed as a result of a strong passion for our profession. Athletic training is a unique health care profession in that the athletic trainer is often in the position of experiencing the results of their efforts. The patients' victories are our victories, and their losses are our losses. We become friends, mentors, counselors, teachers, guardians, protectors, and healers. It takes a special individual to become a proficient and dedicated professional athletic trainer. Long hours are spent in the athletic training facility, classroom, and field experience venues preparing for the final exam that will allow you to

place the letters "ATC" behind your name. Our intent in writing this study guide is to assist you in accomplishing that final goal of passing the BOC exam. It is an accumulation of dedicated research and past experience. We have included a section on study techniques to assist you in your preparation for the exam and a general overview of the exam format to help you organize your thoughts. This guide has been divided into 7 chapters: Study Techniques and Test-Taking Strategies, General Information and the Examination Format, Knowledge Assessment, Clinical Decision Making, Skills Assessment, Critical Thinking, and What to Do if You Do Not Pass the First Time. The multiple-choice and true/false questions in Chapter 3 have been organized according to the BOC's Practice Analysis, 7th ed Educational Domains and are also subdivided into related athletic training subjects to allow you to assess specific subjects in which you may be weak and those in which your strengths lie. Although this study guide will assist you in preparing for the certification exam, it should not be used in place of your textbooks or other sources of study from your academic program. It is not intended to be a practice exam; it is meant only to be used as an adjunct source of information and to tie everything you have learned in the classroom and during your clinical education experiences together. In Chapters 1 and 2, we have provided some specific tools to help you organize

yourself up to 6 months prior to the examination. Chapter 3, Knowledge Assessment, consists of more than 1400 study questions. The majority of the multiple choice and true/false questions is a "mixed bag" of subjects derived from the BOC's Practice Analysis Educational Domains, and the balance covers most of the related subject matter of athletic training, as previously mentioned. Chapter 4, Clinical Decision Making, tests your ability to make appropriate judgment calls and improve your problem-solving skills. Each problem presents a specific scenario with several possible options that you can choose to follow. Chapter 5, Skills Assessment, is composed of 26 problems that are designed to test your manual athletic training skills. Chapter 6, Critical Thinking, is composed of scenario-based problems designed to test your ability to develop differential diagnoses. Chapter 7, What to Do if You Do Not Pass the First Time, is directed at helping you if your test results are not favorable. We have included some suggestions on how to deal with the immediate difficulties not passing may cause and how to begin the process of developing a new approach for your next attempt. Provided you have applied the information you have learned in the classroom and on the field to the study strategies we have offered in this manual, you will not need to read this final chapter. The 7th Edition also features an online component with a variety of questions. You can

test your knowledge with these exams and receive the results for each when completed. Also, at the end of each sample exam, you will be able to review the questions along with the correct answers for a complete and comprehensive review. We wish you luck and look forward to welcoming you as a colleague"-- Introducing our IELTS General Training 2023: Study Guide with 2 Full-Length Practice Tests for the International English Language Testing System Exam [Audio Links] [4th Edition]!
