NDS for Wood Construction, Supplement: Design Values for Wood Construction, Special Design Provisions for Wind and Seismic (SDPWS) Standard with Commentary, ASD/LRFD Manual for Engineered Wood Construction, 2005 Edition The 2005 Edition of the National Design Specification for Wood Construction was approved as an American National

Standard on January 6, 2005. The 2005 NDS was developed as a dual format specification incorporating design provisions for both allowable stress design (ASD) and load and resistance factor design (LRFD). The NDS is adopted in all model building codes in the U.S. and is used to design wood structures worldwide. The M1008 CUCV (Commercial Utility Cargo Vehicle) Series of trucks was produced from 1984 to 1987 by General Motors Defense for the Army, Marines, and Air Force. Approximately 70,000 of these sturdy vehicles were produced. Limited production continued from 1986 to 2001 to accommodate military markets that had the CUCV. The ASD/LRFD Manual contains design information for structural lumber, glued laminated timber, structural-use panels, shear walls and diaphragms, poles and piles, I-joists, structural composite lumber, metal plate connected wood trusses, and pre-engineered metal connectors. Over 40 details are included in the chapter on connections. A comprehensive chapter on fire design includes fire rated wall and floor assemblies for solid sawn lumber, I-joists, and trusses. Following the discovery of large petroleum reserves in northern Alaska, the US Department of Energy implemented an integrated field and modeling study to help define potential impacts of energy-related disturbances on tundra ecosystems. This volume presents the major findings from this study, ranging from ecosystem physiology and biogeochemistry to landscape models that quantify the impact of road-building. An important

resource for researchers and students interested in arctic ecology, as well as for environmental managers concerned with practical issues of disturbances. Includes history of bills and resolutions. Includes Part 1A: Books and Part 1B: Pamphlets, Serials and Contributions to Periodicals

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Hazardous Waste Site Remediation is an outstanding textbook that reviews specific treatment processes, as well as pertinent basic concepts in organic geochemistry, material balance mass transfer, thermodynamics, and kinetics. Following a quantitative approach to source control, the text covers regulations, materials handling, engineering principles, soil vapor extraction, chemical extraction and soil washing, solidification and stabilization, and chemical destruction. It also explores topics in bioremediation, thermal processes, risk assessment, and waste minimization. A solutions manual is available.
