Drawing on documents from archives in St Petersburg and Moscow, the analysis portrays film production "in the round" and shows that the term "censorship" is less appropriate than the description preferred in the Soviet film industry itself, "control," which referred to a no less exigent but far more complex and sophisticated process. The book opens with four framing chapters that examine the overall context in which films were produced. The two opening chapters trace the various crises that beset film production between 1961 and 1970 (Chapter 1) and 1970 and 1985 (Chapter 2). These are followed by a chapter on the working life of the studio and particularly the technical aspects of production (Chapter 3), and a chapter on the studio aesthetic (Chapter 4). The second part of the book comprises close analyses of fifteen films that are particularly typical of the studio's production and which had especial impact within the studio and beyond. . In response to the credit crunch during the global financial crisis of 2007–2008, many have called for the re-establishment of regional banks in the UK and elsewhere. In this context, Germany's regional banking system, with its more than 1,400 small and regional savings banks and cooperative banks, is viewed as a role model in the financing of small and medium-sized enterprises (SMEs). However, in line with the 'death of distance' debate, the universal application of ICT-based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs, calling into question the key advantage regional banks. Utilising novel ethnographic findings from full-time participant observation and interviews, this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide-operating commercial banks in Germany. The ethnographic insights are contextualised by concise description of the three-pillar German banking system, covering bank regulation, structural and geographical developments, and enterprise finance. Furthermore, the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the (ontological) foundation of new realism. Ethnographic findings reveal varying distances of credit granting depending on the rating results, i.e. large banks allocate considerable credit-granting authority to local staff and therefore challenge the proximity advantages of regional banks. Nevertheless, by presenting case studies of lending to SMEs, the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected. "Existentialism" today refers to faddism, decadentism, morbidity, the "philosophy of the graveyard"; to words like fear, dread, anxiety, anguish, suffering, aloneness, death; to novelists such as Jean-Paul Sartre, Dostoevski, Camus, Kafka; to philosophers like Kierkegaard, Heidegger, Marcel, Jaspers, and Sartre-and because it refers to, and is concerned with, all of these ideas and persons, existentialism has lost any clearer meaning it may have originally possessed. Because it has so many definitions, it can no longer be defined. As Sartre writes: "Most people who use the word existentialism would be embarrassed if they had to explain it, since, now that the word is all the rage, even the work of a musician or painter is being called existentialist. A gossip columnist . . . signs himself The Existentialist, so that by this time the word has been so stretched and has taken on so broad a meaning, that it no longer means anything at all. " 2 This state of definitional confusion is not an accidental or negligible matter. An attempt will be made in this introduction to account for the confusion and to show why a definition of existentialism involves us in a tangle. First, however, it is necessary to state in a tentative and very general manner what points of view are here intended when reference is made to existentialism.
