

and privacy enhancing technologies.

Idealism and Freedom May 14 2022 This volume collects all Henry Allison's recent essays on Kant's theoretical and practical philosophy.

Factory of Strategy Jun 22 2020 Factory of Strategy is the last of Antonio Negri's major political works to be translated into English. Rigorous and accessible, it is both a systematic inquiry into the development of Lenin's thought and an encapsulation of a critical shift in Negri's theoretical trajectory. Lenin is the only prominent politician of the modern era to seriously question the "withering away" and "extinction" of the state, and like Marx, he recognized the link between capitalism and modern sovereignty and the need to destroy capitalism and reconfigure the state. Negri refrains from portraying Lenin as a ferocious dictator enforcing the proletariat's reappropriation of wealth, nor does he depict him as a mere military tool of a vanguard opposed to the Ancien Régime. Negri instead champions Leninism's ability to adapt to different working-class configurations in Russia, China, Latin America, and elsewhere. He argues that Lenin developed a new political figuration in and beyond modernity and an effective organization capable of absorbing different historical conditions. He ultimately urges readers to recognize the universal application of Leninism today and its potential to institutionally—not anarchically—dismantle centralized power.

Spontaneity Jan 30 2021 Psychoanalytic theory frequently explains psychopathology from the perspective of either inadequate early care or as the result of environmental factors. In this book the author suggests that poor mental health can be a result of our incapacity to respond to internal and external stimuli, and indicates that spontaneity is essential in the development of many aspects of the self. It is not what happens to us, but how we react to events, that forms who we are. Spontaneity presents an original approach to issues of agency, spontaneity and creativity in psychoanalysis by exploring questions including: active internalisation paradox forgiveness responsibility empathy self de-creation. This book will be essential reading for psychoanalysts, psychotherapists, philosophers and psychologists. It will also prove to be engaging for those interested in psychoanalytic theory and theories of subjectivity.

Ritual and Spontaneity in the Psychoanalytic Process May 02 2021 The psychoanalytic process is characterized by a complex weave of interrelated polarities: transference and countertransference, repetition and new experience, enactment and interpretation, discipline and personal responsiveness, the intrapsychic and the interpersonal, construction and discovery. In *Ritual and Spontaneity in the Psychoanalytic Process*, Irwin Z. Hoffman, through compelling clinical accounts, demonstrates the great therapeutic potential that resides in the analyst's struggle to achieve a balance within each of these dialectics. According to Hoffman, the psychoanalytic modality implicates a dialectic tension between interpersonal influence and interpretive exploration, a tension in which noninterpretive and interpretive interactions continuously elicit one another. It follows that Hoffman's "dialectical constructivism" highlights the intrinsic ambiguity of experience, an ambiguity that coexists with the

irrefutable facts of a person's life, including the fact of mortality. The analytic situation promotes awareness of the freedom to shape one's life story within the constraints of given realities. Hoffman deems it a special kind of crucible for the affirmation of worth and the construction of meaning in a highly uncertain world. The analyst, in turn, emerges as a moral influence with an ironic kind of authority, one that is enhanced by the ritualized aspects of the analytic process even as it is subjected to critical scrutiny. An intensely clinical work, *Ritual and Spontaneity in the Psychoanalytic Process* forges a new understanding of the curative possibilities that grow out of the tensions, the choices, and the constraints inhering in the intimate encounter of a psychoanalyst and a patient. Compelling reading for all analysts and analytic therapists, it will also be powerfully informative for scholars in the social sciences and the humanities.

Conference on Spontaneous Regression of Cancer Jan 18 2020

Data Privacy Management and Autonomous Spontaneous Security Dec 21 2022 This book constitutes the thoroughly refereed post-conference proceedings of the two international workshops DPM 2009, the 4th International Workshop on Data Privacy Management, and SETOP 2009, the Second International Workshop on Autonomous and Spontaneous Security, collocated with the ESORICS 2009 symposium in St. Malo, France, in September 2009. The 8 revised full papers for DPM 2009, selected from 23 submissions, presented together with two keynote lectures are accompanied by 9 revised full papers of SETOP 2009; all papers were carefully reviewed and selected for inclusion in the book. The DPM 2009 papers cover topics such as privacy in service oriented architectures, privacy-preserving mechanisms, crossmatching and indistinguishability techniques, privacy policies, and disclosure of information. The SETOP 2009 papers address all current issues within the scope of security policies, identification and privacy, as well as security mechanisms.

Data Privacy Management and Autonomous Spontaneous Security Aug 17 2022

Data Privacy Management and Autonomous Spontaneous Security Jan 22 2023 This book constitutes the thoroughly refereed joint post proceedings of two international workshops, the 7th International Workshop on Data Privacy Management, DPM 2012, and the 5th International Workshop on Autonomous and Spontaneous Security, SETOP 2012, held in Pisa, Italy, in September 2012. The volume contains 13 full papers selected out of 31 submissions and 3 keynote lectures from the DPM workshop and 10 papers selected among numerous submissions from the SETOP workshop. The contributions from DPM cover topics from location privacy, citizens' privacy, privacy, authentication with anonymity, privacy in distributed systems, privacy policies, and automated privacy enforcement. The SETOP contributions provide a unique view of ongoing security research work in a number of emerging environments that are becoming part of the global ICT infrastructure, from content-centric to mobile and wireless networks. Also, some of them cover the key role of run-time enforcement in process and service security. The topics of SETOP papers include: security policy deployment; distributed

intrusion detection; autonomous and spontaneous response; privacy policies; secure localization; context aware and ubiquitous computing; identity management.

The Sartrean Mind Nov 27 2020 Jean-Paul Sartre was one of the most important philosophers of the twentieth century. His influence extends beyond academic philosophy to areas as diverse as anti-colonial movements, youth culture, literary criticism, and artistic developments around the world. Beginning with an introduction and biography of Jean-Paul Sartre by Matthew C. Eshleman, 42 chapters by a team of international contributors cover all the major aspects of Sartre's thought in the following key areas: Sartre's philosophical and historical context Sartre and phenomenology Sartre, existentialism, and ontology Sartre and ethics Sartre and political theory Aesthetics, literature, and biography Sartre's engagements with other thinkers. The *Sartrean Mind* is the most comprehensive collection on Sartre published to date. It is essential reading for students and researchers in philosophy, as well as for those in related disciplines where Sartre's work has continuing importance, such as literature, French studies, and politics.

The Culture of Spontaneity Feb 17 2020 In the first comprehensive history of the postwar avant-garde, "Belgrad contributes valuable insight and original scholarship to the study of 'projective' and 'spontaneous' aesthetics among cutting edge art movements of the American midcentury" (Tom Clark, author of "Jack Kerouac: A Biography"). 8 color plates. 28 halftones. Copyright © Libri GmbH. All rights reserved.

Data Privacy Management, Autonomous Spontaneous Security, and Security Assurance Jun 15 2022 This book constitutes the revised selected papers of the 9th International Workshop on Data Privacy Management, DPM 2014, the 7th International Workshop on Autonomous and Spontaneous Security, SETOP 2014, and the 3rd International Workshop on Quantitative Aspects in Security Assurance, held in Wroclaw, Poland, in September 2014, co-located with the 19th European Symposium on Research in Computer Security (ESORICS 2014). The volume contains 7 full and 4 short papers plus 1 keynote talk from the DPM workshop; 2 full papers and 1 keynote talk from the SETOP workshop; and 7 full papers and 1 keynote talk from the QASA workshop - selected out of 52 submissions. The papers are organized in topical sections on data privacy management; autonomous and spontaneous security; and quantitative aspects in security assurance.

The Oxford Handbook of Spontaneous Thought Feb 28 2021 Where do spontaneous thoughts come from? It may be surprising that the seemingly straightforward answers "from the mind" or "from the brain" are in fact an incredibly recent understanding of the origins of spontaneous thought. For nearly all of human history, our thoughts - especially the most sudden, insightful, and important - were almost universally ascribed to divine or other external sources. Only in the past few centuries have we truly taken responsibility for their own mental content, and finally localized thought to the central nervous system - laying the foundations for a protoscience of spontaneous thought. But enormous questions still loom: what, exactly, is

spontaneous thought? Why does our brain engage in spontaneous forms of thinking, and when is this most likely to occur? And perhaps the question most interesting and accessible from a scientific perspective: how does the brain generate and evaluate its own spontaneous creations? Spontaneous thought includes our daytime fantasies and mind-wandering; the flashes of insight and inspiration familiar to the artist, scientist, and inventor; and the nighttime visions we call dreams. This Handbook brings together views from neuroscience, psychology, philosophy, phenomenology, history, education, contemplative traditions, and clinical practice to begin to address the ubiquitous but poorly understood mental phenomena that we collectively call 'spontaneous thought.' In studying such an abstruse and seemingly impractical subject, we should remember that our capacity for spontaneity, originality, and creativity defines us as a species - and as individuals. Spontaneous forms of thought enable us to transcend not only the here and now of perceptual experience, but also the bonds of our deliberately-controlled and goal-directed cognition; they allow the space for us to be other than who we are, and for our minds to think beyond the limitations of our current viewpoints and beliefs.

The Anthropology of Friendship Sep 25 2020 Friendship is usually seen as a vital part of most people's lives in the West. From our friends, we hope to derive emotional support, advice and material help in times of need. In this pioneering book, basic assumptions about friendship are examined from a cross-cultural point of view. Is friendship only a western conception or is it possible to identify friends in such places as Papua New Guinea, Kenya, China, and Brazil? In seeking to answer this question, contributors also explore what friendship means closer to home, from the bar to the office, and address the following: * Are friendships voluntary? * Should friends be distinguished sharply from relatives? * Do work and friendship mix? * Does friendship support or subvert the social order? * How is friendship shaped by the nature of the person, gender, and the relationship between private and public life? * How is friendship affected when morality is compromised by self-interest? This book represents one of the few major attempts to deal with friendship from a comparative perspective. In achieving this aim, it demonstrates the culture-bound nature of many assumptions concerning one of the most basic building-blocks of western social relationships. More importantly, it signposts the future of social relations in many parts of the world, where older social bonds based on kinship or proximity are being challenged by flexible ties forged when people move within local, national and increasingly global networks of social relations.

The Politics of Postmodernity Apr 01 2021 This volume outlines in a clear and coherent manner the implications for political theory that are inherent in philosophical hermeneutics. It demonstrates how hermeneutical theory provides the ultimate philosophical justification for democratic practice and universal human rights.

Data Privacy Management and Autonomous Spontaneous Security Feb 23 2023 This book constitutes the thoroughly refereed joint post proceedings of two international workshops, the 5th International

Workshop on Data Privacy Management, DPM 2010, and the 3rd International Workshop on Autonomous and Spontaneous Security, SETOP 2010, collocated with the ESORICS 2010 symposium in Athens, Greece, in September 2010. The 9 revised full papers for DPM 2010 presented together with two keynote talks are accompanied by 7 revised full papers of SETOP 2010; all papers were carefully reviewed and selected for inclusion in the book. The DPM 2010 papers cover topics such as how to translate the high-level business goals into system-level privacy policies, administration of privacy-sensitive data, privacy data integration and engineering, privacy access control mechanisms, information-oriented security, and query execution on privacy-sensitive data for partial answers. The SETOP 2010 papers address several specific aspects of the previously cited topics, as for instance the autonomic administration of security policies, secure P2P storage, RFID authentication, anonymity in reputation systems, etc. **Conference on Spontaneous Regression of Cancer, Held at the Johns Hopkins Medical Institutions, Baltimore, Maryland, May 9 and 10, 1974** Oct 27 2020

A Systems Perspective on Financial Systems Apr 20 2020 This book is devoted to a systems-theoretical presentation of the main results of applying the systemic yoyo model and relevant analytical tools to the topics of money and financial institutions. The author presents the main concepts and results of the subject matter in the language of systems science, which has in the past century prompted revolutionary applications of systems research in various subfields of traditional disciplines. This volume applies a brand new logic of reasoning to some of the unsettled problems in the area of money and banking. Due to the particular systemic approach employed, the reader will be able to see how different economic activities are implicitly related to each other and how financial decisions are holistically made in reference to seemingly unrelated events. That is, the learning of this particular subject matter takes place at a different, more elevated level, from which, among others, economies are respectively seen as both closed and open systems; their interactions emulate those of rotational pools of fluids. This book can be used as a textbook for researchers and graduate students in economics, finance, systems science, and mathematical / systems modeling. It will also be useful as a reference book for applied economists and various policy makers.

China in the 1990s Dec 29 2020 Now updated with a chapter-length afterword by the editors on the end of the Deng era and its aftermath, *China in the 1990s* provides a comprehensive survey of a nation in transition. An understanding of this complex process requires a multidisciplinary and multidimensional approach, which the editors have achieved by bringing together experts from Britain, the United States, Europe, Australia, and Hong Kong who examine China's economic, political, military, cultural and social achievements and problems. The difficulties China still faces are enormous, some of them of its own making: pollution, urban sprawl, the insecurity of food supplies, the risks of political authoritarianism and the perils of liberalisation. Its population is still growing dramatically and is likely to be 1.5 billion by 2015, three times what it was when the P.R.C. was

established in 1949. But since embarking on a reform programme which, at the time seemed experimental and hard to reconcile with official ideology, it has gone from being the 'sick man of Asia' to being one of the world's largest and fastest developing economies in what now looks to be a remarkably effective and well-managed transition.

Data Privacy Management and Autonomous Spontaneous Security Oct 19 2022 This book constitutes the thoroughly refereed post-conference proceedings of the two international workshops DPM 2009, the 4th International Workshop on Data Privacy Management, and SETOP 2009, the Second International Workshop on Autonomous and Spontaneous Security, collocated with the ESORICS 2009 symposium in St. Malo, France, in September 2009. The 8 revised full papers for DPM 2009, selected from 23 submissions, presented together with two keynote lectures are accompanied by 9 revised full papers of SETOP 2009; all papers were carefully reviewed and selected for inclusion in the book. The DPM 2009 papers cover topics such as privacy in service oriented architectures, privacy-preserving mechanisms, crossmatching and indistinguishability techniques, privacy policies, and disclosure of information. The SETOP 2009 papers address all current issues within the scope of security policies, identification and privacy, as well as security mechanisms.

Secure Image Transmission in Wireless Sensor Network (WSN) Applications Dec 17 2019 This book offers an essential guide to Wireless Sensor Networks, IoT Security, Image Processing, Secure Information Systems, and Data Encryption. In addition, it introduces students and aspiring practitioners to the subject of destination marketing in a structured manner. It is chiefly intended for researcher students in the areas of Wireless Sensor Networks and Secure Data Communication (including image encryption, and intrusion detection systems), academics at universities and colleges, IT professionals, policymakers and legislators. Given its content, the book can be used as a reference text for both undergraduate and graduate studies, in courses on Wireless Sensor Networks, Secure Image Processing, and Data Encryption applications. The book is written in plain and easy-to-follow language and explains each main concept the first time it appears, helping readers with no prior background in the field. As such, it is a "must-read" guide to the subject matter.

The Spontaneous Self Jul 04 2021 *The Spontaneous Self* by Paul Breer **Data Privacy Management and Autonomous Spontaneous Security** Jan 10 2022 This book constitutes the thoroughly refereed joint post proceedings of two international workshops, the 6th International Workshop on Data Privacy Management, DPM 2011, and the 4th International Workshop on Autonomous and Spontaneous Security, SETOP 2011, held in Leuven, Belgium, in September 2011. The volume contains 9 full papers and 1 short paper from the DPM workshop and 9 full papers and 2 short papers from the SETOP workshop, as well as the keynote paper. The contributions from DPM cover topics from location privacy, privacy-based metering and billing, record linkage, policy-based privacy, application of data privacy in recommendation systems, privacy considerations in user profiles, in RFID, in network monitoring, in transactions protocols, in usage control, and in

customer data. The topics of the SETOP contributions are access control, policy derivation, requirements engineering, verification of service-oriented-architectures, query and data privacy, policy delegation and service orchestration.

[Data Privacy Management and Autonomous Spontaneous Security](#) Sep 18 2022 This book constitutes the revised selected papers of the 8th International Workshop on Data Privacy Management, DPM 2013, and the 6th International Workshop on Autonomous and Spontaneous Security, SETOP 2013, held in Egham, UK, in September 2013 and co-located with the 18th European Symposium on Research in Computer Security (ESORICS 2013). The volume contains 13 full papers selected out of 46 submissions and 1 keynote lecturer from the DPM workshop and 6 full papers together with 5 short papers selected among numerous submissions to the SETOP workshop. The papers cover topics related to the management of privacy-sensitive information and automated configuration of security, focusing in particular on system-level privacy policies, administration of sensitive identifiers, data integration and privacy, engineering authentication and authorization, mobile security and vulnerabilities.

Gramsci's Critique of Civil Society Jun 03 2021 Antonio Gramsci was an Italian Marxist thinker whose radical ideas on how to build an alternative world from below remain vigorously relevant today. Gramsci's philosophy of praxis critically dissects the institutions of modern liberal democracy to reveal what is perhaps its deepest secret: it is the most successful political system in modernity at preserving an objective condition of domination while transforming it into a subjective conviction of freedom. Based on a careful reading of Gramsci's *The Prison Notebooks*, Marco Fonseca shows hegemony as more than leadership of elites over subaltern majorities based on "consent". Following Gramsci's critique of citizenship, civil society and democracy, including the current project of neoliberal "democracy promotion" particularly in the Global South, he discloses a hidden process of hegemony that generates the preconditions for consent and, thus, successful domination. As the struggles from Zapatismo to Chavismo and from the Arab Springs to Spain's Podemos show, liberation is not possible without counter-hegemony. This book will be of interest to activist scholars engaged in the study of Marxism, Gramsci, political philosophy, and contemporary debates about the renewal of Marxist thought and the relevance of revolution and Communism for the twenty-first century.

Kant on Spontaneity Apr 13 2022 The concept of spontaneity is central to Kant's philosophy, yet Kant himself never dealt with it explicitly. Instead it was presented as an insoluble problem concerning human reason. The ambiguity surrounding his approach to this problem is surprising when one considers that he was a philosopher who based his theoretical programme on the critique of the faculties of knowledge, feeling and desire. However, this ambiguity seems to have avoided up to now any possible critique. This highly original book presents the first full-length study of the problem of spontaneity in Kant. Marco Sgarbi demonstrates that spontaneity is a crucial concept in relation to every aspect of Kant's thought. He begins by

reconstructing the history of the concept of spontaneity in the German Enlightenment prior to Kant and goes on to define knowing, thinking, acting and feeling as spontaneous activities of the mind that in turn determine Kant's logic, ethics and aesthetics. Ultimately Sgarbi shows that the notion of spontaneity is key to understanding both Kant's theoretical and practical philosophy.

Spontaneous Combustion Mar 12 2022 Provides answers to one of the enduring paradoxes of mass social change. From the events of May 1968 to the Arab Spring and Occupy, we have seen social movements develop spontaneously around the globe propelling thousands and, at times, millions of people into the streets to demand an end to oppression. In order to make sense of such events, the authors draw on George Katsiaficas's conception of the "eros effect," which picks up and takes off from concepts developed by Herbert Marcuse. This effect describes moments in which the instinctual human need for justice and freedom undergoes a massive spontaneous awakening. Drawing on Marcuse, the concept foregrounds the instinctual foundation of the desire for freedom, in which a biologically-based pleasure drive[eros]is given free play. from the Foreword by Peter Marcuse However, even as the eros effect provides a valuable framework for understanding spontaneous global uprisings, Katsiaficas has acknowledged that the concept has remained underdeveloped. *Spontaneous Combustion* provides an introduction to the eros effect along with a series of elaborations, applications, and critical rejoinders concerning its implications. A truly interdisciplinary venture, the book features contributions from cutting-edge scholars and activists on the frontlines of today's struggles.

Spontaneous Venturing Sep 06 2021 Identifying a new approach to disaster response: spontaneous, compassionate, and impromptu actions to alleviate suffering. In *Spontaneous Venturing*, Dean Shepherd and Trenton Williams identify and describe a new approach for responding to disaster and suffering: the local organizing of spontaneous, compassionate, and impromptu actions—the rapid emergence of a compassionate venture. This approach, termed by the authors "spontaneous venturing," can be more effective than the traditional "command-and-control" methods of large disaster relief organizations. It can customize and target resources and deliver them quickly, helping victims almost immediately. For example, during the catastrophic 2009 bushfires in Victoria, Australia—the focal disaster for the book—residents organized an impromptu relief center that collected and distributed urgently needed goods without red tape. Special bonds and friendships formed among the volunteers and victims; some were both volunteer and victim. Many victims were able to mobilize resources despite considerable personal losses. Shepherd and Williams describe the lasting impact of disaster and tell the stories of Victoria residents who organized in the aftermath of the bushfires. They consider the limitations of traditional disaster relief efforts and explain that when victims take action to help others, they develop behavioral, emotional, and assumptive resilience; venturing leads to social interaction, community connections, and other positive outcomes. Finally, they explore spontaneous venturing in a less-

developed country, investigating the activities of Haitians after the devastating 2010 earthquake. The lesson for communities hit by disaster: find opportunities for compassionate action.

Kant on Freedom and Spontaneity Oct 07 2021 A collection of essays on the foundational themes of freedom and spontaneity in Immanuel Kant's philosophy.

Kant on Moral Autonomy Nov 08 2021 The concept of autonomy is one of Kant's central legacies for contemporary moral thought. We often invoke autonomy as both a moral ideal and a human right, especially a right to determine oneself independently of foreign determinants; indeed, to violate a person's autonomy is considered to be a serious moral offence. Yet while contemporary philosophy claims Kant as the originator of its notion of autonomy, Kant's own conception of the term seems to differ in important respects from our present-day interpretation. *Kant on Moral Autonomy* brings together a distinguished group of scholars who explore the following questions: what is Kant's conception of autonomy? What is its history and its influence on contemporary conceptions? And what is its moral significance? Their essays will be of interest both to scholars and students working on Kantian moral philosophy and to anyone interested in the subject of autonomy.

Mindful Spontaneity Mar 20 2020 Ruthy Alon's description of Feldenkrais work in *Mindful Spontaneity* is a favored text of a generation of Feldenkrais enthusiasts. Alon weaves experiential and theoretical information in a poetic yet pragmatic language. These simple and unexpected suggestions will help everyone who suffers from restricted movement or pain to find a new sense of freedom. [Data Privacy Management, Autonomous Spontaneous Security, and Security Assurance](#) 9th International Workshop, DPM 2014, 7th International Workshop, SETOP 2014, and 3rd International Workshop, QASA 2014, Wroclaw, Poland, September 10-11, 2014. Revised Select Feb 11 2022

Nietzsche on Freedom and Autonomy Aug 25 2020 The principal aim of this volume is to elucidate what freedom, sovereignty, and autonomy mean for Nietzsche and what philosophical resources he gives us to re-think these crucial concepts. A related aim is to examine how Nietzsche connects these concepts to his thoughts about life-affirmation, self-love, promise-making, agency, the 'will to nothingness', and the 'eternal recurrence', as well as to his search for a 'genealogical' understanding of morality. These twelve essays by leading Nietzsche scholars ask such key questions as: Can we reconcile his rejection of free will with his positive invocations of the notion of free will? How does Nietzsche's celebration of freedom and free spirits sit with his claim that we all have an unchangeable fate? What is the relation between his concepts of freedom and self-overcoming? The depth in which these and related issues are explored gives this volume its value, not only to those interested in Nietzsche, but to all who are concerned with the free will debate, ethics, theory of action, and the history of philosophy.
