*Rule of law has vanished in America's criminal justice system. Prosecutors decide whom to punish; most accused never face a jury; policing is inconsistent; plea bargaining is rampant; and draconian sentencing fills prisons with mostly minority defendants. A leading criminal law scholar looks to history for the roots of these problems—and solutions. Offers an analysis of the politics of court reform through a focused review of Indonesia's complex court system. Discusses the criminal law practice and procedure as it relates to children. "This essay is the result of over 15 years of research and reflections on criminal law and the criminal justice system, and particularly on the devastating and disproportionate effects that our system has on poor and marginalized people, including the homeless, alcohol and drug users, persons living with mental health issues, racial and ethnic minorities and Aboriginal people. The research is based on field studies involving stakeholders who work within the justice system and individuals affected by criminalization: over a period of 10 years, roughly a hundred interviews were conducted with poor people who have a criminal record as well as with police officers, judges, prosecutors and lawyers, in addition to offering close to 60 hours of training for the above groups in five Canadian cities (Montréal, Québec, Ottawa, Toronto and Vancouver). This not only allowed the author to collect some extremely valuable information, but also gave the author an opportunity to be directly involved in various processes seeking solutions to these pressing problems"--Introd., p. [3]. Offers clear, comprehensive and authoritative treatment of all aspects of the criminal justice system. The Criminal Justice System, completely updated, covers the most important aspects of criminal justice in the United States. It details the commission and frequency of crimes through the investigation, apprehension, prosecution, and punishment of wrongdoers. Includes bibliographical references (p. 639-665) and indexes. "This book presents an up-to-date analysis of women as victims of crime, as individuals under justice system supervision, and as professionals in the field. The text features an empowerment approach that is unified by underlying themes of the intersection of gender, race, and class, and evidence-based research. Personal narratives supplement research and statistics to help students connect the text material with real-life situations. This new edition is informed by consideration of major ongoing social movements such as #MeToo, Black Lives Matter, and the fight to*

reduce mass incarceration. The text stresses contemporary topics such as recognition of lesbian, bisexual, and transgender issues in juvenile and adult facilities; the introduction of trauma-informed care in detention centers and prisons; the criminalization of Black girls and women; the effects of an increasingly militarized police culture; and the contributions of Ruth Bader Ginsburg and other influential women. With its emphasis on critical thinking, this text is ideal for undergraduate courses concerning women in the justice system"-- De- mystifies the complexity of the judicial establishment and the bureaucracy behind it in a clear, jargon-free and detailed portrait so that any citizen can understand how it works. This critical yet honest appraisal of our criminal justice system addresses its strengths and its flaws--and makes recommendations for improvement. *The American Criminal Justice System: How It Works, How It Doesn't, and How to Fix It* calls attention to a criminal justice system that needs improvement. Author Gerhard Falk shows that the police themselves often violate the law; that prosecutors send innocent citizens to prison and even to death row; that defense attorneys take on cases they are not prepared to handle; that juries vote guilt or innocence on the basis of emotion, not facts; that judges are often failed attorneys or unscrupulous politicians; and that jails and prisons are too frequently warehouses of the poor. As background for his analysis, Falk discusses the history of the police, prosecutors, defense attorneys, and judges, as well as the history of prisons and "the prison industrial complex." He also offers a devastating analysis of the death penalty and its practitioners. The book ends with recommendations for the improvement of our criminal justice system so that America can truly be, as our Supreme Court proclaims, a land of "Equal Justice under Law." Provides an extensive bibliography including books, journal articles, newspaper accounts, and government documents Includes a chronology This anthology presents articles on various aspects of discretionary decisionmaking in the administration of justice. Discretionary justice suggests latitude of decisionmaking rather than formality or certainty, and unlike the symbolic idea of due process, it suggests that idiosyncrasy rather than rules may guide decisionmaking within the administration of criminal justice at all levels of the police, court, and penal systems. The relationship between forms of discretion and the criminal justice system is explored. The role of discretion at the arrest, prosecution, and sentencing levels as well as within the framework of correctional institutions is examined. The development of the discretionary ethic is discussed, and the severity and legality of its application in criminal justice procedures are examined. Discretion on the part of the police is covered, with special attention to legal norms and discretion in the police sentencing processes, factors in police discretion and decisionmaking, and administrative problems in controlling the exercise of police authority. An approach to the legal control of police in terms of discretionary powers is presented. The role of prosecutorial discretion is underscored; the application of discretion during charging and plea bargaining processes is examined, and means for controlling prosecutorial discretion are discussed. Judicial discretion during sentencing is also examined, with attention to pretrial decisionmaking, the growth and consequences of sentencing discretion, and contemporary sentencing proposals. Finally, the application of discretionary powers within the prison environment is summarized; decisionmaking within the prison community, the control of discretionary powers of prison organizations, the use of discretion in determining the severity of punishment for incarcerated offenders, and discretion within the parole bureaucracies decisionmaking process are discussed. *Government at a Glance* provides reliable, internationally comparative data on government activities and their results in OECD countries. Where possible, it also reports data for Brazil, China, Colombia, Costa Rica, India, Indonesia, the Russian Federation and South Africa. In many public governance areas, it is the

only available source of data. It includes input, process, output and outcome indicators as well as contextual information for each country. The 2019 edition includes input indicators on public finance and employment; while processes include data on institutions, budgeting practices and procedures, human resources management, regulatory government, public procurement and digital government and open data. An enlightening insight into the family dynamics surrounding contact with the justice system, Police, Courts, and Incarceration is interesting reading for researchers and students of family, sociology and criminology. This timely book explores the expansion of the role of judges and courts in the political system and the mixed reactions generated by these developments. In this comprehensive book, Carlo Guarnieri and Patrizia Pederzoli draw on a wealth of experience in teaching and research in the field, moving beyond traditional legal analysis and providing a clear, concise and all-encompassing introduction to the phenomenon of the administration of justice and all of its traits. "Designed for those who are planning careers in the Canadian justice system or who will be working with people impacted by various aspects of the system, this text provides the foundational knowledge needed to understand the way the various facets of the Canadian justice system work."-- Indonesia Criminal Laws, Regulations and Procedures Handbook - Strategic Information, Regulations, Procedures As most jurisdictions move away from the death penalty, some remain strongly committed to it, while others hold on to it but use it sparingly. This volume seeks to understand why, by examining the death penalty's relationship to state governance in the past and present. It also examines how international, transnational and national forces intersect in order to understand the possibilities of future death penalty abolition. The chapters cover the USA - the only western democracy that still uses the death penalty - and Asia - the site of some 90 per cent of all executions. Also included are discussions of the death penalty in Islam and its practice in selected Muslim majority countries. There is also a comparative chapter departing from the response to the mass killings in Norway in 2011. Leading experts in law, criminology and human rights combine theory and empirical research to further our understanding of the relationships between ways of governance, the role of leadership and the death penalty practices. This book questions whether the death penalty in and of itself is a hazard to a sustainable development of criminal justice. It is an invaluable resource for all those researching and campaigning for the global abolition of capital punishment. A contemporary guide to the criminal justice process, the broad scope of this book means it will be a trusted companion throughout a Criminology and/or Criminal Justice degree. The contents of An Introduction to Criminal Justice include: 23 chapters spanning all that's involved with, and fully contextualising, the criminal justice process: the agencies, institutions and processes and procedures that deal with victims, offenders and offending A detailed timeline of criminal justice since 1945 Consideration of victims and witnesses, complaints and misconduct A comprehensive review of policing, prosecution, the courts, imprisonment and community sanctions A focus on community safety, crime prevention and youth justice A review of the effectiveness of the criminal justice process Exploration of global and international dimensions as well as the futures of criminal justice Lots of helpful extras including further reading suggestions, case studies, self-study questions and a glossary of terms. The accompanying website to An Introduction to Criminal Justice has: A podcast interview with a police officer Practice essay questions Multiple choice questions Suggested website resources to explore Videos. Examines the causes for mass incarceration of Americans and calls for the reform of the bail system. Traces the history of bail, how it has come to be an oppressive tool of the courts, and makes recommendations for reforming the bail system and alleviating the mass incarceration problem. A just, fair,

reasonable, and purposeful exercise of arrest and detention powers by the State is both in the interest of the individual and the society at large. However, very often individual rights are impinged by arbitrary and illegal exercise of State power to arrest and detain. The book studies issues pertaining to arrest and detention, comprehensively, critically, and analytically, in the light of the Indian Constitution. It points out that the arrest and detention provisions in the legal system of India, by and large, have remained the same as inherited from the imperial British era. Despite constitutional prescriptions and judicial pronouncements over several decades, there has been no noteworthy change that would bring the law in tune with the constitutional emphasis on right to life and personal liberty as well as other human rights. To capture the complexity of the issue, the volume analyses constitutional provisions, statutory law, pertinent judgments, case law, reports of various committees, and recommendations of experts in the field. Exploring lacunae in the present legal scenario, the book stresses on the need for organizational and attitudinal changes in the State instrumentalities for successfully balancing the need to maintain law and order and human rights imperatives. Emphasizing that it is the poor who often suffer the most, the author further advocates inclusion of the developments in the field of jurisprudence, behavioural sciences, technology, and management to deal with crime and criminality. A form of subtle vigilantism threatens to undermine the justice system and is eroding community trust in law enforcement. A pervasive and destructive problem is afflicting our current justice system, eroding community confidence in law enforcement. "Shadow vigilantism" is a vicious cycle in which ordinary people, as well as criminal justice officials, are so fed up with the system's failures that they distort and subvert the system to force it to do the justice that it seems reluctant to do on its own. The effects of this lack of trust are pervasive and pernicious: citizens refuse to report a crime or help investigators; jurors refuse to indict or convict; and officials manipulate a system that is perceived to be unreliable. This downward spiral eventually undermines the moral authority of law enforcement and creates widening rifts in the community. This book examines many examples of how the community has responded when the justice system is perceived to fail, including the infamous murder of Emmett Till, which became a cause that spurred on the NAACP and the civil rights movement; the Lavender Panthers, which formed in response to gay bashing during the 1980s; the Crown Heights Maccabees, a neighborhood watch group that successfully reduced neighborhood crime when the police failed to do so; the Animal Liberation Front, which struck back at institutions for perceived abuses to animals; Operation Perverted Justice, an organization that used online chat rooms to out pedophiles by publicizing their personal information; and many others. Such examples highlight the importance of upholding a justice system that works to provide justice for all and is not perceived to condone legal technicalities that overturn just punishment, judicial rules that suppress evidence and let serious offenders go, and other actions that undermine public trust in the system. Rising prison numbers on both sides of the Atlantic are cause for concern. Justice Reinvestment is a major movement in criminal justice reform in the US that is also attracting lots of interest in the UK. Justice Reinvestment is an approach to addressing the penal crisis that uses the best available evidence to re-direct resources to more effective rehabilitation of offenders and better 'prehabilitation'. It takes a more holistic view of criminal justice and is particularly concerned to address the community dimensions of offending and re-offending. The authors highlight competing models of Justice Reinvestment and argue for a more radical version in which criminal justice reform is seen as part of a wider social justice reform programme. This is the first substantial publication on Justice Reinvestment and shows that 'Justice Reinvestment' has huge potential to re-shape the criminal justice system. It will be

essential reading for undergraduate and post-graduate students with an interest in criminal justice reform. Practitioners and policy-makers working in the criminal justice system in the US and the UK will also value the fresh perspective it brings to criminal justice reform and its breadth of coverage including insights into the penal crisis, different models of Justice Reinvestment, the use of criminal justice data and research evidence in re-designing criminal justice services and new approaches to commissioning. This book focuses on one part of the judicial system: the criminal justice chain. This involves all the activities and actors dealing with policing, prosecution, judgment, and sanctioning of crimes. In the last decades, reforms have been implemented in several European countries. In Belgium, for example, there was the so-called Octopus reform in 1998. The police was restructured, leading to an integration of the police forces on a national and local level. New steering instruments were introduced, such as regional security plans. With regard to the sanctioning of crimes, a new institution was installed, called the sentence implementation court. This book evaluates these reforms and discusses the current reform on the reorganization of the judicial landscape. In addition, it examines the relation between trust and distrust and the application to the judicial system. It discusses the human capital aspect of the system, by means of a study on the prosopography of the Belgian magistrates that analyses the Magistracy as socio-professional group, and focuses on situations of system building, transformations under constraint (occupations), and transfers (colonial experience). Lastly, the book presents a comparative study of Belgium and France regarding the new techniques and instruments that are needed to accelerate the judicial response time and to ensure that the judicial system delivers its services on time. This thought-provoking book highlights the increasing recognition of the prevalence of neurodisability within criminal justice systems, discussing conditions including intellectual, cognitive and behavioural impairments, fetal alcohol spectrum disorders and traumatic and acquired brain injury. International scholars and practitioners demonstrate the extent and complexity of the neurodisability experience and present practical solutions for criminal justice reform. The criminal justice system is wide ranging: it covers crimes, policing, the sentencing of offenders, and prisons. This title draws upon the latest research and current practices from around the world. Focusing on the adversarial model of justice found in common law countries such as the US, UK, Canada, and Australia, it discusses topics such as the uses of imprisonment, the effects of capital punishment, and the purposes of sentencing. Considering the role of the victim, as well as public knowledge and attitudes towards criminal justice, it assesses the way in which the system functions. *The Criminal Justice System: An Introduction, Fifth Edition* incorporates the latest developments in the field while retaining the basic organization of previous editions which made this textbook so popular. Exploring the police, prosecutors, courts, and corrections, including probation and parole, the book moves chronologically through the different agencies in the order in which they are usually encountered when an individual goes through the criminal justice process. *New in the Fifth Edition:* A complete updating of charts and statistics to reflect the changes the FBI has made to the Unified Crime Reports System Expanded material on the history of law enforcement Additional information on terrorism, homeland security, and its effect on the police New approaches to policing such as Problem-Oriented Policing and Intelligence-Led Policing Cyber crime, identity theft, accreditation, and new approaches to crime analysis New information on prosecution standards, community prosecution, and prosecutorial abuse New emphasis on the concept of jurisdiction and the inter-relation between the courts' functions and the other branches of the criminal justice system An examination of the dilemma for the courts caused by the intersection

of politics, funding, media, and technology New discussions on prisoner radicalization

*Pedagogical features: Each chapter begins with an outline and a statement of purpose to help students understand exactly what they are supposed to master and why Illustrations to assist in the clarification and further development of topics in the text Each chapter ends with a summary, a list of key terms, and a series of discussion questions to stimulate thought Appendices with the United States Constitution, a glossary of criminal justice terminology, and websites useful in gaining knowledge of the criminal justice system Access to a free computerized learning course based on the book*

*The often-tenuous relationship between law enforcement and communities of color, namely African Americans, has grown increasingly strained, and the call for justice has once again ignited the demand for criminal justice reform. Rebuilding the trust between the police and the citizens that they have sworn to protect and serve requires that criminal justice practitioners and educators collaborate with elected officials and commit to an open, ongoing dialogue on the most challenging issues that remain unresolved but demand collective attention and support. Reform measures are not limited to policing policies and practices, but rather extend throughout the criminal justice system. There is no denying that the criminal justice system as we know it is flawed, but not beyond repair. Global Perspectives on Reforming the Criminal Justice System provides in-depth and current research about the criminal justice system around the world, its many inadequacies, and why it urgently needs reformation. Offering a fully fleshed outline of the current system, this book details the newest research and is incredibly important to fully understand the flaws of the criminal justice system across the globe. The goals of this book are to improve and advance the criminal justice system by addressing the glaring weaknesses within the system and discuss potential reforms including decreasing the prison population (decarceration) and improving police/community relations. Highlighting topics that include accountability, community-oriented policing, ethics, and mass incarceration, this book is ideal for law enforcement officers, trainers/educators, government officials, policymakers, correctional officers, court officials, professionals, researchers, academicians, and students in the fields of criminal justice, criminology, sociology, psychology, addictions, mental health, social work, public policy, and public administration. This textbook was developed from an idiom shared by the authors and contributors alike: ethics and ethical challenges are generally black and white - not gray. They are akin to the pregnant woman or the gunshot victim; one cannot be a little pregnant or a little shot. Consequently, professional conduct is either ethical or it is not. Unafraid to be the harbingers, Turvey and Crowder set forth the parameters of key ethical issues across the five pillars of the criminal justice system: law enforcement, corrections, courts, forensic science, and academia. It demonstrates how each pillar is dependent upon its professional membership, and also upon the supporting efforts of the other pillars - with respect to both character and culture. With contributions from case-working experts across the CJ spectrum, this text reveals hard-earned insights into issues that are often absent from textbooks born out of just theory and research. Part 1 examines ethic issues in academia, with chapters on ethics for CJ students, CJ educators, and ethics in CJ research. Part 2 examines ethical issues in law enforcement, with separate chapters on law enforcement administration and criminal investigations. Part 3 examines ethical issues in the forensic services, considering the separate roles of crime lab administration and evidence examination. Part 4 examines ethical issues in the courts, with chapters discussing the prosecution, the defense, and the judiciary. Part 5 examines ethical issues in corrections, separately considering corrections staff and treatment staff in a forensic setting. The text concludes with Part 6, which examines ethical issues in a broad professional sense with respect*

to professional organizations and whistleblowers. *Ethical Justice: Applied Issues for Criminal Justice Students and Professionals* is intended for use as a textbook at the college and university, by undergraduate students enrolled in a program related to any of the CJ professions. It is intended to guide them through the real-world issues that they will encounter in both the classroom and in the professional community. However, it can also serve as an important reference manual for the CJ professional that may work in a community that lacks ethical mentoring or leadership. First of its kind overview of the five pillars of criminal justice: academia, law enforcement, forensic services, courts and corrections Written by practicing criminal justice professionals, from across every pillar Offers a realistic overview of ethical issues confronted by criminals justice students and professionals Examines sensitive subjects often ignored in other criminal justice ethics texts Numerous cases examples in each chapter to facilitate instruction and learning This book charts the gender differences in crime in early modern Frankfurt. It shows that women's prosecuted crime patterns in Frankfurt were both similar and different to that of other European cities. First published in 1997, this book identifies the problems that face black women in the criminal justice system as the result of the articulation of unequal and oppressive class, race and gender relations; the research aims to be aware of all three rather than prioritising, isolating or reducing one or two of these relations. The focus of this research primarily on black women is based on the belief that they are marginalised in both society and criminological research. Black women are poorly represented in education, employment, the professions, commerce, industry and politics while in prison their presence is highly disproportionate to their wider numbers in society. The author examines the problems facing black women and compares these with those facing black men and white women to demonstrate the articulation of social relations. He addresses the structural positions of black women in society, their social relations and the nature of the institutional practices of the criminal justice system. From an award-winning civil rights lawyer, a profound challenge to our society's normalization of the caging of human beings, and the role of the legal profession in perpetuating it Alec Karakatsanis is interested in what we choose to punish. For example, it is a crime in most of America for poor people to wager in the streets over dice; dice-wagerers can be seized, searched, have their assets forfeited, and be locked in cages. It's perfectly fine, by contrast, for people to wager over international currencies, mortgages, or the global supply of wheat; wheat-wagerers become names on the wings of hospitals and museums. He is also troubled by how the legal system works when it is trying to punish people. The bail system, for example, is meant to ensure that people return for court dates. But it has morphed into a way to lock up poor people who have not been convicted of anything. He's so concerned about this that he has personally sued court systems across the country, resulting in literally tens of thousands of people being released from jail when their money bail was found to be unconstitutional. Karakatsanis doesn't think people who have gone to law school, passed the bar, and sworn to uphold the Constitution should be complicit in the mass caging of human beings—an everyday brutality inflicted disproportionately on the bodies and minds of poor people and people of color and for which the legal system has never offered sufficient justification. *Usual Cruelty* is a profoundly radical reconsideration of the American "injustice system" by someone who is actively, wildly successfully, challenging it. In *Profit and Punishment*, a Pulitzer Prize-winning journalist exposes the tragedy of modern-day debtors prisons, and how they destroy the lives of poor Americans swept up in a system designed to penalize the most impoverished. "Intimate, raw, and utterly scathing" — Heather Ann Thompson, Pulitzer Prize-winning author of *Blood in the Water* "Crucial evidence that the justice

system is broken and has to be fixed. Please read this book.” —James Patterson, #1 New York Times bestselling author

*As a columnist for the St. Louis Post-Dispatch, Tony Messenger has spent years in county and municipal courthouses documenting how poor Americans are convicted of minor crimes and then saddled with exorbitant fines and fees. If they are unable to pay, they are often sent to prison, where they are then charged a pay-to-stay bill, in a cycle that soon creates a mountain of debt that can take years to pay off. These insidious penalties are used to raise money for broken local and state budgets, often overseen by for-profit companies, and it is one of the central issues of the criminal justice reform movement. In the tradition of *Evicted* and *The New Jim Crow*, Messenger has written a call to arms, shining a light on a two-tiered system invisible to most Americans. He introduces readers to three single mothers caught up in this system: living in poverty in Missouri, Oklahoma, and South Carolina, whose lives are upended when minor offenses become monumental financial and personal catastrophes. As these women struggle to clear their debt and move on with their lives, readers meet the dogged civil rights advocates and lawmakers fighting by their side to create a more equitable and fair court of justice. In this remarkable feat of reporting, Tony Messenger exposes injustice that is agonizing and infuriating in its mundane cruelty, as he champions the rights and dignity of some of the most vulnerable Americans. Bringing together academics and professionals, this edited collection considers key issues in current criminal justice policy and practice related specifically to women to answer the important question: are women being failed by the criminal justice system? In a landscape where women’s involvement in the criminal justice system still tends to be ignored or lost in discussions about men, contributors place special emphasis on women as both victims and offenders. The chapters cover a wide range of topics relating to women and crime, including: violent and sexual victimisation, violent offending, sentencing and punishment, and rape myths. Since the peak of feminist criminal justice scholarship in the 1990s, the place of women in the criminal justice system has arguably slipped down the agenda and the authors of this collection draw on original research to make the compelling case for a swift remedy to this. Drawing on recent academic studies and professional experience to set an agenda for future research – as well as legal and policy reform – this book injects new life into the dialogue surrounding women and the criminal justice system. Innovative and timely, this collection of essays holds broad appeal to academics and practitioners, as well as students of criminology, criminal justice and law, and all those with an interest in feminism, justice, and inequality. Relying on a multidisciplinary framework of inquiry and critical perspective, this edited volume addresses the unique experiences of Black males within various stages of contact in the criminal justice system. It provides a comprehensive overview of the administration of justice, mental and physical health issues faced by Black males, and reintegration into society after system involvement. Recent events—including but by no means limited to the shootings of unarmed Black men by police in Ferguson, Missouri; Baltimore; Minneapolis; and Chicago—have highlighted the disproportionate likelihood of young Black males to encounter the criminal justice system. *Black Males and the Criminal Justice System* provides a theoretical and empirical review of the need for an intersectional understanding of Black male experiences and outcomes within the criminal justice system. The intersectional approach, which posits that outcomes of societal experiences are determined by the way the interconnected identities of individuals are perceived and responded to by others, is key to recognizing the various forms of oppression that Black males experience, and the impact these experiences have on them and their families. This book is intended for students and scholars in criminology, criminal justice, sociology, race/ethnic studies, legal studies, psychology, and African American Studies, and will*

serve as a reference for researchers who wish to utilize a progressive theoretical approach to study social control, policing, and the criminal justice system. For courses in criminal procedure *From Arrest to Sentencing: A Comprehensive Guide to Criminal Justice Procedures* presents the judicial procedures and related issues involved in criminal cases from arrest to conviction and sentencing. Real cases are used throughout to illuminate key points. Down-to-earth examples, illustrations, and court documents help make students grasp the application of key concepts and practice. The Eleventh Edition has been updated throughout and expanded to include new chapters on police and citizen encounters and interrogation procedures. *Crime in England, 1815-1880* provides a unique insight into views on crime and criminality and the operation of the criminal justice system in England from the early to the late nineteenth century. This book examines the perceived problem and causes of crime, views about offenders and the consequences of these views for the treatment of offenders in the criminal justice system. The book explores the perceived causes of criminality, as well as concerns about particular groups of offenders, such as the 'criminal classes' and the 'habitual offender', the female offender and the juvenile criminal. It also considers the development of policing, the systems of capital punishment and the transportation of offenders overseas, as well as the evolution of both local and convict prison systems. The discussion primarily investigates those who were drawn into the criminal justice system and the attitudes towards and mechanisms to address crime and offenders. The book draws together original research by the author to locate these broader developments and provides detailed case studies illuminating the lives of those who experienced the criminal justice system and how these changes were experienced in provincial England. With an emphasis on the penal system and case studies on offenders' lives and on provincial criminal justice, this book will be useful to academics and students interested in criminal justice, history and penology, as well as being of interest to the general reader. When is it fair to hold young people criminally responsible? If young people lack the capacity to make a meaningful choice and to control their impulses, should they be held criminally culpable for their behaviour? In what ways is the immaturity of young offenders relevant to their blameworthiness? Should youth offending behaviour be proscribed by criminal law? These are just some of the questions asked in this thoughtful and provocative book. In *The Moral Foundations of the Youth Justice System*, Raymond Arthur explores international and historical evidence on how societies regulate criminal behaviour by young people, and undertakes a careful examination of the developmental capacities and processes that are relevant to young people's criminal choices. He argues that the youth justice response needs to be reconceptualised in a context where one of the central objectives of institutions regulating children and young people's behaviour is to support the interests and welfare of those children. This timely book advocates a revolutionary transformation of the structure and process of contemporary youth justice law: a synthesised and integrated approach that is clearly distinct from that used for dealing with adults. This book is a key resource for students, academics and practitioners across fields including criminal law, youth justice, probation and social work.
