The Government of Pakistan strongly supports public-private partnership (PPP) initiatives. From 1990 to 2019, Pakistan witnessed 108 financially closed PPP projects, with a total investment of approximately \$28.4 billion. About 88% of these projects are in the energy sector, attracting more than \$24.7 billion, followed by investments in the port sector. In early 2021, Parliament approved the amendments to the 2017 PPP Law, enacting the Public Private Partnership Authority (Amendment) Act 2021. This further strengthens the enabling legal and regulatory framework for

developing and implementing PPPs, thereby promoting private sector investment in public infrastructure and related services. This publication highlights how public-private partnerships (PPPs) can be effective to meet Asia's growing infrastructure needs. It shows how governments and their development partners can use PPPs to promote more inclusive and sustainable growth. The study finds that successful PPP projects are predicated on well-designed contracts, a stable economy, good governance and sound regulations, and a high level of institutional capacity to handle PPPs. It is the result of a collaboration between the Asian Development Bank, the Korea Development Institute, and other experts that supported the theme chapter "Sustaining Development through Public-Private Partnership" of the Asian Development Outlook 2017 Update. This comprehensive introduction to the field represents the best of the published literature on groupware and computer-supported cooperative work (CSCW). The papers were chosen for their breadth of coverage of the field, their clarity of expression and presentation, their excellence in terms of technical innovation or behavioral insight, their historical significance, and their utility as sources for further reading. Taken as a whole, the papers and their introductions are a complete sourcebook to the field. This book will be useful for computer professionals involved in the development or purchase of groupware technology as well as for researchers and managers. It should also serve as a valuable text for university courses on CSCW, groupware, and human-computer interaction.

Publisher Description This book presents selected fault diagnosis and fault-tolerant control strategies for non-linear systems in a unified framework. In particular, starting from advanced state estimation strategies up to modern soft computing, the discrete-time description of the system is employed. Part I of the book presents original research results regarding state estimation and neural networks for robust fault diagnosis. Part II is devoted to the presentation of integrated fault diagnosis and fault-tolerant systems. It starts with a general fault-tolerant control framework, which is then extended by introducing robustness with respect to various uncertainties. Finally, it is shown how to implement the proposed framework for fuzzy systems described by the well-known Takagi-Sugeno models. This research monograph is intended for researchers, engineers, and advanced postgraduate students in control and electrical engineering, computer science, as well as mechanical

and chemical engineering. This volume features 29 invited papers presented at the Royal Society of Edinburgh on 1-2 July 2008 by colleagues, collaborators, students and friends of Professor J. Michael Rotter (FREng, FRSE, FICE, FASCE, FIStructE, FIEAust) in honour of his 60th birthday. The articles published in this volume will be of great value to readers as it contains con Shrimp is now the most valuable internationally traded fishery commodities. This report summarizes the results of an FAO commissioned global study focusing on social, economic and environmental impacts, and also contains studies representative of various geographic regions and of a variety of important shrimp fishery conditions: Australia, Cambodia, Indonesia, Kuwait, Madagascar, Mexico, Nigeria, Norway, Trinidad and Tobago and the United States of America.--Publisher's description. This book traces changes in the concept of security in Asia from realist to cooperative, comprehensive, and human security approaches, and assesses a number of policy alternatives to management of both old and new security threats. It surveys not only orthodox security threats such as tensions between regional powers or armed ethnic antagonists but also new sources of anxiety such as resource scarcity, economic instability, irregular migration, community fragmentation, and international terro... Eight papers from an informal meeting, dealing with examples from Asia, Africa and Latin-America This publication provides a snapshot of the overall public-private partnership (PPP) landscape in Indonesia. It includes more than 500 qualitative and quantitative indicators to profile the national PPP environment, the sector-specific PPP landscape (for eight identified infrastructure sectors), and the PPP landscape for local government projects. This downloadable guide also captures the critical macroeconomic and infrastructure sector indicators (including the Ease of Doing Business scores) from globally accepted sources. Through Presidential Regulation 38/2015, the cornerstone of the country's robust PPP enabling framework, Indonesia expects PPPs to continue playing a pivotal role to achieve its infrastructure investment target of \$429 billion for 2020-2024 and mobilize 59% of this value from the private sector. The essays in this collection challenge conventional ideas about consumption and consumerism: they consider if the inundation of Western consumer goods have created identity confusions among the affluent in Asia, and if the expansion of consumer culture really does threaten the stability of politically anti-liberal states in Asia. This

is the first book to analyse in detail consumerism in the region, and will be valuable reading for students and researchers in Asian studies, economics, politics and cultural studies. Treating such contemporary design and development issues as identifying customer needs, design for manufacturing, prototyping, and industrial design, *Product Design and Development, 3/e*, by Ulrich and Eppinger presents in a clear and detailed way a set of product development techniques aimed at bringing together the marketing, design, and manufacturing functions of the enterprise. The integrative methods in the book facilitate problem solving and decision making among people with different disciplinary perspectives, reflecting the current industry trend to perform product design and development in cross-functional teams. Income inequality is one of the most profound social, economic, and political challenges of our time. The gap between the rich and the poor has been regarded as a major concern for policy makers. This gap is at its highest level in decades for developed economies, while the inequality trend has been rising in many developing countries. In Asia, despite recent economic growth, income distribution has been worsening as well. This book contributes to the existing literature on inequality in Asia by focusing on three broad themes, corresponding to three parts of the volume. Part I offers an overview of inequality in Asia, Part II focuses on the drivers of rising inequality in Asia, and Part III presents country case studies. The founding fathers vision of democracy was transformed into a one dollar, one vote democracy. Wall Street and corporations own all the money and thus all the votes. A clash of civilizations is promoted as a scapegoat for capitalisms systemic failure This publication provides a standard compilation of supply and use tables (SUTs) for 19 economies in Asia and the Pacific to help them comply with the United Nations 2008 System of National Accounts (SNA) recommendations. SUTs are an integrated statistical estimation and economic analysis model that facilitates the compilation of more reliable, consistent, and internationally comparable estimates of key economic statistics such as gross domestic product. The improved and more detailed statistics are expected to provide a better basis for measuring economic output and growth; facilitating informed policy making; and monitoring progress toward the Sustainable Development Goals (SDGs), relating especially to poverty alleviation, economic growth, technological progress, and industrial and infrastructure development. The compilation of SUTs is

an essential first step to establish an effective statistical system in any economy. In 2014, ADB embarked on a data development and capacity building project to assist 19 members construct benchmark SUTs for the latest possible year. This publication outlines the relevant statistical and economic concepts, data compilation and development practices, project implementation strategies, and the results of the project. It also includes an abridged version of the SUTs of the 19 participating economies. The more detailed tables are available online through the ADB website. The book focuses on Indonesia's most pressing labor market challenges and associated policy options to achieve higher and more inclusive economic growth. The challenges consist of creating jobs for and the skills in a youthful and increasingly better educated workforce, and raising the productivity of less-educated workers to meet the demands of the digital age. The book deals with a range of interrelated topics---the changing supply and demand for labor in relation to the shift of workers out of agriculture; urbanization and the growth of megacities; raising the quality of schooling for new jobs in the digital economy; and labor market policies to improve both labor standards and productivity. Excerpts from and citations to reviews of more than 8,000 books each year, drawn from coverage of 109 publications. Book Review Digest provides citations to and excerpts of reviews of current juvenile and adult fiction and nonfiction in the English language. Reviews of the following types of books are excluded: government publications, textbooks, and technical books in the sciences and law. Reviews of books on science for the general reader, however, are included. The reviews originate in a group of selected periodicals in the humanities, social sciences, and general science published in the United States, Canada, and Great Britain. - Publisher. Despite the trend toward financial sector liberalization in recent years, state ownership of financial institutions remains widespread in the developing world. However, in general, state-owned financial institutions have under performed their private sector counterparts, and governments have sought to restructure them. This case study

reviews the transformation of Bank Rakyat Indonesia from a loss-producing, overstaffed state-owned bank to the most profitable bank with the largest microbanking network in Indonesia. From the bank's experience the study seeks to draw decisive lessons for the successful transformation of other state-owned financial institutions. For Bank Rakyat Indonesia, the key driver of successful reform was the government's commitment to allow it the autonomy to restructure itself-including an emphasis on good corporate governance, supported by appropriate regulations and effective supervision.

Interoperability: the ability of a system or a product to work with other systems or products without special effort from the user is a key issue in manufacturing and industrial enterprise generally. It is fundamental to the production of goods and services quickly and at low cost at the same time as maintaining levels of quality and customisation. Composed of over 50 papers, Enterprise Interoperability III ranges from academic research through case studies to industrial and administrative experience of interoperability. The international nature of the authorship continues to broaden. Many of the papers have examples and illustrations calculated to deepen understanding and generate new ideas. A concise reference to the state of the art in software interoperability, Enterprise Interoperability III will be of great value to engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment. This publication examines the need to expand social protection coverage of the informal sector to support working age productivity, reduce vulnerability, and improve economic opportunity. Case studies from Bangladesh, the People's Republic of China, India, Indonesia, Pakistan, the Philippines, and Thailand offer suggestions to close social protection gaps and recommend policy solutions to create equitable and inclusive social protection programs for informal workers. This manual provides criteria and guidance for the design of structures to resist the effects of earthquakes. It takes a general approach for the seismic design of buildings, including architectural components, mechanical and electrical equipment supports, some structures other than buildings, and utility systems. Primary emphasis is given to the equivalent static force design procedure. This book takes the reader through the design and implementation of the Sinclair ZX Spectrum's custom chip, revealing for the first time the

decisions behind its design and its hidden secrets. By using it as case study, the techniques required to design an 8-bit microcomputer are explained, along with comprehensive details of the Ferranti ULA manufacturing process. If you have ever wanted to design your own computer or wondered what was behind the most successful microcomputer of the 1980s, then this is the book for you. For the first time, the inner working of the Sinclair ZX Spectrum's custom chip and heart of the computer, the Ferranti ULA, is exposed in minute detail. Packed with over 140 illustrations and circuit diagrams, this book takes the reader through the cutting edge technology that was the Ferranti ULA and the design of the ZX Spectrum home computer, illustrating the principles and techniques involved in creating a cost effective computer that required nothing more than a television set and a cassette recorder. The ZX Spectrum ULA is an essential read for the electronics hobbyist, student or electronic engineer wishing to design their own retro-style microcomputer or anyone with an interest in historical micro-electronic and digital design. All topics are explained in simple yet precise terms, building on their careful introduction towards the full functionality presented by the Sinclair computer. Some of the topics covered are: The architecture of the standard microcomputer, Ferranti and their ULA, manufacturing process and structure, The functional layout of the ZX Spectrum ULA, Video display generation, Memory contention and timing, ZX Spectrum design bugs such as "The Snow Effect," Hidden features, ULA version differences. In December 2004, a seaquake shook the Indian Ocean, producing a powerful tsunami. The greatest damage occurred in Indonesia, nearest the quake's epicenter. The Asian Development Bank responded with a \$290 million grant under the Earthquake and Tsunami Emergency Support Project. Housing accounted for more of this grant than any other sector. While this book focuses on housing, more broadly it is about how implementing post-disaster projects under exceedingly difficult conditions can achieve success, while simultaneously incorporating the community-based approach recommended by donors. The book's refreshing glimpse into on-the-ground, post-disaster project implementation contains important lessons for future disaster-response donor assistance.
