Such Men As Billy the Kid Dec 05 2021 "A lively, lucid, compelling account of complex and confusing events about which scholars are still puzzling".-- WASHINGTON TIMES. This story of greed, violence, and death has entered American folklore through the mythologizing of the career of Billy the Kid and also through a tendency to see the Lincoln County War as emblematic of frontier lawlessness. Frames Of Justice Dec 13 2019 This work is devoted to analyzing three major frames of justice--group justice, individual desert, and life affirmation--and their implications for social policy as well as their reflections in contemporary social policies. Pelton finds that all three frames of justice are reflected in the Bible and, later, the Koran. He contends that there is no evidence in the Bible of a genesis or development from one frame of justice to another. Rather, a sense of justice has existed in the human mind from time immemorial, with the three frames coexisting

and manifesting themselves in both inter- and intra-group relations. The prominence of one frame over another at any particular point in history or in a particular geographical location is influenced by a variety of factors, though it is ultimately open to human choice. Pelton compares and contrasts the philosophies of nonviolence and liberalism in regard to the frames, and explores the relationships between principle, sentiment, reason, justice, and policy. He discusses social science's problematic relationship to justice in policymaking—for instance, how scholars have focused more on the effectiveness of policies, largely in terms of statistical outcomes reflecting aggregate data analyses, than on their justice. He goes on to explore in depth how frames of justice give direction to social policies, including those of genocide. *Frames of Justice* is an outstanding work that analyzes the question of justice and social policy, while simultaneously exploring the notion of desert in religion, philosophy, and legislation—especially within the context of the moral question of the relationship between means and ends—and contrasting it with the principle of life affirmation. Leroy H. Pelton is a professor in and former director of the School of Social Work, University of Nevada, Las Vegas, and professor emeritus of the School of Social Work, Salem State College, Massachusetts. He is the author of *The Psychology of Nonviolence*, *For Reasons of Poverty: A Critical Analysis of the Public Child Welfare System in the United States*, and *Doing Justice: Liberalism, Group Constructs, and Individual Realities*, and the editor of *The Social Context of Child Abuse and Neglect*. He has also written numerous journal articles on psychology, social work, child welfare, and social policy.

Forbidden Bookshelf Presents Christopher Simpson Sep 02 2021 Three provocative exposés from a National Jewish Book Award-winning journalist address the CIA's recruitment of Nazis and use of psychological warfare. *The Splendid Blond Beast*: This groundbreaking investigation into the CIA's post-World War II liberation and recruitment of Nazi war criminals—including the pivotal role played by CIA director Allen Dulles—traces the roots not only of US government malfeasance, but of mass murder as an instrument of financial gain and state power, from the Armenian genocide during World War I to Hitler's Holocaust through the practice of genocide today. "Revelatory and shocking." —Kirkus Reviews *Blowback*: The true story of how US intelligence organizations employed Nazi war criminals in clandestine warfare and propaganda against the USSR, anticolonial revolutionaries, and progressive movements worldwide that were claimed to be Soviet pawns. "The story is one that needs to be told, and *Blowback* makes a major contribution to its telling, supplementing a thorough collation of known cases with ample new research." —The New York Times *Science of Coercion*: Drawing on long-classified documents from the Pentagon, the CIA, and other national security agencies, Simpson exposes secret government-funded research into psychological warfare and reveals that many of the most

respected pioneers in the field of communication science were knowingly complicit as their findings were employed for the purposes of propaganda, subversion, intimidation, and counterinsurgency during the Cold War era. “An intriguing picture of the relations between state power and the intellectual community.” —Noam Chomsky, Massachusetts Institute of Technology

Political Community in Revolutionary Pennsylvania, 1774-1800 Feb 24 2021

Political Community in Revolutionary Pennsylvania challenges the ways we understand popular sovereignty in the American Revolution. Whereas previous histories place undue focus on elite political thought or analysis based on class, this study argues that it was ordinary citizens that cared most about the establishment of a proper, representative, publicly legitimate political process. Popular activism constrained the options available to leaders and created a system through which the actions of government were made more representative of the will of the community. Political Community in Revolutionary Pennsylvania analyzes political developments in Pennsylvania from 1774, when Americans united in opposition to Britain's Intolerable Acts, through to 1800 and the election of Thomas Jefferson. It looks at the animating philosophy of the Pennsylvania state constitution of 1776, a 'radical manifesto' which espoused a vision of popular sovereignty in which government was devolved from the people only where necessary. Even when governmental institutions were necessary, their legitimacy rested on being able to clearly demonstrate that they operated on popular consent, expressed in a variety of forms of popular mobilization.
