The purpose of this book is to introduce a new notion of analytic space over a non-Archimedean field. Despite the total disconnectedness of the ground field, these analytic spaces have the usual topological properties of a complex analytic space, such as local compactness and local arcwise connectedness. This makes it possible to apply the usual notions of homotopy and singular homology. The book includes a homotopic characterization of the analytic spaces associated with certain classes of algebraic varieties and an interpretation of Bruhat-Tits buildings in terms of these analytic spaces. The author also studies the connection with the earlier notion of a rigid analytic space. Geometrical considerations are used to obtain some applications, and the analytic spaces are used to construct the foundations of a non-Archimedean spectral theory of bounded linear operators. This book requires a background at the level of basic graduate courses in algebra and topology, as well as some familiarity with algebraic geometry. It would be of interest to research mathematicians and graduate students working in algebraic geometry, number theory, and  $p$ -adic analysis.

Formation Control of Multi-Agent Systems: A Graph Rigidity Approach  
Marcio de Queiroz, Louisiana State University, USA  
Xiaoyu Cai, FARO Technologies, USA  
Matthew Feemster, U.S. Naval Academy, USA

A comprehensive guide to formation control of multi-agent systems using rigid graph theory. This book is the first to provide a comprehensive and unified treatment of the subject of graph rigidity-based formation control of multi-agent systems. Such systems are relevant to a variety of emerging engineering applications, including unmanned robotic vehicles and mobile sensor networks. Graph theory, and rigid graphs in particular, provides a natural tool for describing the multi-agent formation shape as well as the inter-agent sensing, communication, and control topology. Beginning with an introduction to rigid graph theory, the contents of the book are organized by the agent dynamic model (single integrator, double integrator, and mechanical dynamics) and by the type of formation problem (formation acquisition, formation manoeuvring, and target interception). The book presents the material in ascending level of difficulty and in a self-contained manner; thus, facilitating reader understanding. Key features: Uses the concept of graph rigidity as the basis for describing the multi-agent formation geometry and solving formation control problems. Considers different agent models and formation control problems. Control designs throughout the book progressively build upon each other. Provides a primer on rigid graph theory. Combines theory, computer simulations, and experimental results. Formation Control of Multi-Agent Systems: A Graph Rigidity Approach is targeted at researchers and graduate students in the areas of control systems and robotics. Prerequisite knowledge includes linear algebra, matrix theory, control systems, and nonlinear systems.

Americans see water as abundant and cheap: we turn on the faucet and out it gushes, for less than a penny a gallon. We use more water than any other culture in the world, much to quench what's now our largest crop--the lawn. Yet most Americans cannot name the river or aquifer that flows to our taps, irrigates our food, and produces our electricity. And most don't realize these freshwater sources are in deep trouble. Blue Revolution exposes the truth about the water crisis--driven not as much by lawn sprinklers as by a tradition that has encouraged everyone, from homeowners to farmers to utilities, to tap more and more. But the book also offers much reason for hope. Award-winning journalist Cynthia Barnett argues that the best solution is also the simplest and least expensive: a water ethic for America. Just as the green movement helped build awareness about energy and sustainability, so a blue movement will reconnect Americans to their water, helping us value and conserve our most life-giving resource. Avoiding past mistakes, living within our water means, and turning to "local water" as we do local foods are all part of this new, blue revolution. Reporting from across the country and around the globe, Barnett shows how people, businesses, and governments have come together to dramatically reduce water use and reverse the water crisis. Entire metro areas, such as San Antonio, Texas, have halved per capita water use. Singapore's "closed water loop" recycles every drop. New technologies can slash agricultural irrigation in half: businesses can save a lot of water--and a lot of money--with designs as simple as recycling air-conditioning condensate. The first book to call for a national water ethic, Blue Revolution is also a powerful meditation on water and community in America. The broad range of research topics reported in this abstract book is a valuable resource for researchers, advisors, teachers and professionals in agriculture. ICT in agriculture, the field of EFITA's interest, precision agriculture and precision livestock farming are becoming ever more relevant as the agricultural industry struggles to come to terms with various developments. These include issues of cooperation, Internet, standardisation, software architecture, robotics, environment, animal and human welfare, economics, traceability, farm management, vehicle guidance, crop management, animal disease and livestock management. Whilst some benefits have proved elusive, others contribute positively to today's agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming and the 7th ECPA conference are presented in companion publications.

The first book to celebrate the beautiful and provocative ways artists have represented, scrutinized and utilized the body over centuries. Body of Art is the first book to explore the various ways the human body has been both an inspiration and a medium for artists over hundreds of thousands of years. Unprecedented in its scope, it examines the many different manifestations of the body in art, from Anthony Gormley and Maya Lin sculptures to eight-armed Hindu gods and ancient Greek reliefs, from feminist graphics and Warhol's empty electric chair to the blue-tinted complexion of Singer Sargent's Madame X. It is the most expansive examination of the human body in art, spanning western and non-western, ancient to contemporary, representative to abstract and conceptual. Over 400 artists are featured in chapters that explore identity, beauty, religion, absent body, sex and gender, power, body's limits, abject body and bodies & space. Works range from 11,000 BC hand stencils in Argentine caves to videos and performances by contemporary artists such as Marina Abramovic, Joan Jonas and Bruce Nauman? Its fresh, accessible and dynamic voice brings to life the thrilling diversity of both classical and contemporary art through the prism of the body. More than simply a book of representations, this is an original and thought provoking look at the human body across time, cultures and media. The Times Round-up of the Best Non-fiction Paperbacks, 2019 The Times Best Current Affairs and Big Ideas Book of the Year, 2018 'A very discomfoting book, no matter what your politics might be... very good' Sunday Times 'Potent, disturbing and revelatory' Evening Standard

We all define ourselves by our profession. But what if our job was demeaning, poorly paid, and tedious? Cracking open Britain's divisions  
journalist James Bloodworth spends six months living and working across Britain, taking on the country's most gruelling jobs. He lives on the meagre proceeds and discovers the anxieties and hopes of those he encounters, including working-class British, young students striving to make ends meet, and Eastern European immigrants. From the Staffordshire Amazon warehouse to the taxi-cabs of Uber, Bloodworth narrates how traditional working-class communities have been decimated by the move to soulless service jobs with no security, advancement or satisfaction. This is a gripping examination of Brexit Britain, a divided nation which needs to understand the true reality of how other people live and work before it can heal. The evil in East Salem is no longer content to hide in the shadows. The stakes—and the darkness—are rising. Dani Harris thought there wasn't much left that could surprise her after serving as a forensic psychiatrist in East Salem. And Tommy Gunderson has faced few challenges in his life that he couldn't overcome by either physical strength or his celebrity status. But as they race to uncover what's really happening behind the high walls of St. Adrian's Academy, it becomes clear that supernatural forces have been at work here for generations. And now their focus is on making sure Dani and Tommy don't interfere. When the unseen becomes seen, faith is the only weapon strong enough to fight in a battle involving not just murder and betrayal—but angels and demons. “Wiehl's latest is a truly creepy story with supernatural undertones that seem eerily real.” -Romantic Times review of Waking Hours

By highlighting relations between experimental and theoretical work, this volume explores new ways of addressing one of the central challenges in the study of language and cognition. The articles bring together work by leading scholars and younger researchers in psychology, linguistics and philosophy. An introductory chapter lays out the background on concept composition, a problem that is stimulating much new research in cognitive science. Researchers in this interdisciplinary domain aim to explain how meanings of complex expressions are derived from simple lexical concepts and to show how these meanings connect to concept representations. Traditionally, much of the work on concept composition has been carried out within separate disciplines, where cognitive psychologists have concentrated on concept representations, and linguists and philosophers have focused on the meaning and use of logical operators. This volume demonstrates an important change in this situation, where convergence points between these three disciplines in cognitive science are emerging and are leading to new findings and theoretical insights. This book is open access under a CC BY license. Advertising expenditure data across ten media: consumer magazines, Sunday magazines, newspapers, outdoor, network television, spot television, syndicated television, cable television, network radio, and national spot radio. Lists brands alphabetically and shows total ten media expenditures,

media used, parent company and PIB classification for each brand. Also included in this report are industry class totals and rankings of the top 100 companies of the ten media. This book is the outcome of a series of discussions at the Philips Symposium on Intelligent Algorithms, held in Eindhoven in December 2004. It offers exciting and practical examples of the use of intelligent algorithms in ambient and biomedical computing. It contains topics such as bioscience computing, database design, machine consciousness, scheduling, video summarization, audio classification, semantic reasoning, machine learning, tracking and localization, secure computing, and communication. This volume is devoted to a beautiful object, called the valuative tree and designed as a powerful tool for the study of singularities in two complex dimensions. Its intricate yet manageable structure can be analyzed by both algebraic and geometric means. Many types of singularities, including those of curves, ideals, and plurisubharmonic functions, can be encoded in terms of positive measures on the valuative tree. The construction of these measures uses a natural tree Laplace operator of independent interest. This book gathers papers addressing state-of-the-art research in all areas of information and communication technologies and their applications in intelligent computing, cloud storage, data mining and software analysis. It presents the outcomes of the Fourth International Conference on Information and Communication Technology for Intelligent Systems, which was held in Ahmedabad, India. Divided into two volumes, the book discusses the fundamentals of various data analysis techniques and algorithms, making it a valuable resource for researchers and practitioners alike. In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends. What if you discovered a blueprint that could grow your brand's reputation and loyalty, dramatically reduce customer service issues, produce content and technology, and cement a powerful, lasting relationship between you and your customers? Communities have been a popular topic since the rise of the Internet and social media, but few companies have consistently harnessed their power, driven tangible value, and effectively measured their return on investment (ROI) like Salesforce.com, Star Citizen via Kickstarter, and Red Hat. Companies such as PayPal, Facebook, Bosch, Microsoft, CapitalOne, and Google, have also built communities inside their organizations, which have fostered innovation, broken down silos, and helped their organizations to operate more efficiently and collaboratively. People Powered helps C-suite leaders, founders, marketers, customer advocates, and community leaders gain a competitive advantage by answering the following questions: What is the key value proposition of building a community? What kind of community do we need and how do we build and integrate it into our organization? How do we incentivize and encourage people to get involved, build reliable growth, and keep community members engaged? How do we develop authentic, productive relationships with community members both online and in person? How do we get departmental buy-in, hire effectively, and create consistent, reliable community engagement skills in our organization? What are the strategic and tactical pitfalls and roadblocks we need to avoid? How do we make sure that our community continues to grow with us—and more importantly, how do we make sure that we continue to grow with them? People Powered pulls together over 20 years of pragmatic experience into a clear, simple methodology and blueprint to not just answer these questions, but deliver results. Don't get left behind—become an industry trailblazer and ensure your company's longevity by tapping into the most dynamic force both outside and inside your organization: the people. **WARNING: DO NOT READ THIS BOOK!** ...For amongst its contents you will find: two extraordinary adventurers... a missing magician's diary... a symphony of spells... and a deadly secret. But wait, you already know too much! It is too late. I'm afraid nothing will stop you now. Open the book if you must. But, please, tell no one. This book is a compilation of selected papers from the 3rd International Petroleum and Petrochemical Technology Conference (IPPTC 2019). The work focuses on petroleum & petrochemical technologies and practical challenges in the field. It creates a platform to bridge the knowledge gap between China and the world. The conference not only provides a platform to exchanges experience but also promotes the development of scientific research in petroleum & petrochemical technologies. The book will benefit a broad readership, including industry experts, researchers, educators, senior engineers and managers. Inhaltsangabe: Einleitung: Diese Arbeit beschäftigt sich mit der Planung des Markteintritts auf dem israelischen Markt, dessen Potential oft noch nicht erkannt wird. Da bei vielen deutschen Firmen immer noch die Vorstellung herrscht, das Israel ein landwirtschaftlich geprägtes Land sei, wurde der israelische Markt bis jetzt von nur wenigen deutschen, meist großen Unternehmen erschlossen. Dabei stützt sich der israelische Markt heute auf Schlüsselindustrien, wie die Telekommunikation, die Informationstechnologie und die Elektronikbranche und verfügt über hochqualifizierte Mitarbeiter mit Improvisations- und Innovationstalent. Die demokratische Staatsform, die weitgehende Europäisierung sowie das Vorhandensein wichtiger Wirtschaftsgesetze und die staatlichen Investitionsförderungen machen Israel zu einem reizvollen Investitionsland im Mittleren Osten. Das noch bestehende Konfliktpotential zwischen Israel und seinen arabischen Nachbarstaaten sollte zwar nicht unterschätzt werden, jedoch bieten die wachsende Wirtschaft, der wachsende Privatkonsum sowie staatliche Bestrebungen, die Infrastruktur auszubauen und die Privatisierung der Wirtschaft fortzuführen, gute Chancen für deutsche Investoren. Daneben zieht Israels High-Tech-Markt deutsche Venture-Capital-Unternehmen an, die in die hochentwickelte israelische High-Tech-Industrie investieren. Inhaltsverzeichnis: Inhaltsverzeichnis: 1. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good. The latest in image-stamping corporate design, with hundreds of examples of innovative corporate I.D. work. **\*\*\*BOSH! ON A BUDGET NOW AVAILABLE\*\*\* OVER 1 MILLION BOSH!
