The author agrees to go on the same journey himself, with startling and candid results, learning we are fully conscious between our various incarnations, and return to connect with loved ones and spiritual soul mates, and together choose how and when and with whom we'll reincarnate. Martini examines how "Karmic law" is trumped by "Free will," with souls choosing difficult lives in order to learn from their spiritually; no matter how difficult, strange or complex a life choice appears to be, it was made in advance, consciously, with the help of loved ones, soul mates and wise elders. Extensively researched, breathtaking in scope, "Flipside" takes the reader into new territory, boldly going where no author has gone before to tie up the various disciplines of past life regression. near death experiences, and between life exploration. Whether you're interested in visiting Apollo landing sites or the locations of classic sci-fi movies, this is the tourist guide for you! This tourist guide has a twist - it is a guide to a whole different world, which you can visit from the comfort of your backyard with the aid of nothing more sophisticated than an inexpensive telescope. It tells you the best times to view the Moon, the most exciting sights to look out for, and the best equipment to use, allowing you to snap stunning photographs as well as view the sights with your own eyes. Have you ever been inspired by stunning images from the Hubble telescope, or the magic of sci-fi special effects, only to look through a small backyard telescope at the disappointing white dot of a planet or faint blur of a galaxy? Yet the Moon is different. Seen through even a relatively cheap 'scope, it springs into life like a real place, with mountains and valleys and rugged craters. With a bit of imagination, you can even picture yourself as a sightseeing visitor there - which in a sense you are. Nine-year-old Neil McDonald has always wanted to write a book. Every time he tries, though, it comes out 'like the Hardy Boys or something'. But when a maverick substitute teacher challenges him to record all the events and thoughts of a single day, the doors of creativity swing open. It helps that the day in question is, in Neil's words, 'pretty weird'. The time is the fall of 1971; the setting is 'North America's northernmost Metropolis'. The cast includes Neil, his best friend Keith and his gnome-like baba, a budding Black Power advocate, the heavy-smoking son of anti-war activists, and a very small boy wielding a very large axe in a public park. Neil thinks his day will climax with the broadcast of the first night game in World Series history, but what he's in for is something much deeper, a surprise that will teach him much about the world and his place in it. In the end, Neil has his book. And it's nothing at all like the Hardy Boys. This annual bestseller ranks the hottest countries, regions and cities for 2020, and reveals how well-planned, sustainable travel can be a force for good.
