During the Second World War, the Royal Navy's flotillas of small, fast and powerfully armed motor gun boats (MGBs) were looked upon as the 'Spitfires of the Seas'. Operating from their harbour bases around the south and east coasts of England, RN Coastal Forces crews would set out under cover of darkness to look for trouble with German shipping in the Channel and the North Sea. The vicious close-quarter skirmishes that ensued were every bit as deadly as the aerial dogfights acted out at 30,000 ft by their RAF Spitfire contemporaries. Written by the curator of MGB 81, with contributions from other specialists involved with the boat, the Royal Navy Motor Gun Boat Owners' Workshop Manual is published in association with the Portsmouth Naval Base Property Trust and fully illustrated with archive photos, technical drawings and detailed photography of MGB 81. Over 645 illustrations Clymer ProSeries Inboard Engines, Transmissions and Drives manual. "This manual covers the topics that a factory service manual (designed for factory trained mechanics) and a manufacturer owner's manual (designed more by lawyers than boat owners these days) covers. It will take you through the basics of maintaining and repairing your motor, step-by-step, to help you understand what the factory trained mechanics already know by heart."--Page 1-2. "Covers all 2.5-350 HP, 1-4 cylinder, V6 and V8 4-stroke models. Includes jet drives. Wiring diagrams."--Cover. FEBRUARY 1943 1. This Motor Torpedo Boat Manual (short title--Motorpron Two) is approved and issued to the service for use. This manual is RESTRICTED, may be issued to officers and petty officers of the Navy, and for instruction of naval personnel. It shall not be carried in aircraft for use therein. 2. Although motor torpedo boats are a relatively new weapon, considerable operating experience has been accumulated. Peacetime operation promoted valuable experimental work and the development of tactical, administrative, and operative procedures. Wartime operation against the enemy in the Pacific, to date, has already greatly added to the total experience gained. As new squadrons are commissioned and sent to outlying bases, the importance of passing on the benefits of operating experience to new personnel needs no elaboration.. 3. Each commanding officer shall keep a record of issue of this manual within his command. When no longer required or when its destruction is ordered, it shall be destroyed by burning. No report of destruction is required. Public domain content transcribed and formatted for HTML by Larry Jewell & Patrick Clancey, Hyperwar Foundation.
