This report investigates the potential for increased use of economic instruments, not the least taxes and charges, in chemicals policy. It provides a conceptual discussion of the role of different market-based instruments in controlling pollution based on chemicals production and use, and outlines a comprehensive overview and analysis of the European experiences of taxes and charges in chemicals policy during the last decades. A final chapter evaluates a set of carefully selected economic instruments targeted at specific chemical compounds and products. The cases have been chosen so as to illustrate different types of challenges in relying more extensively on economic instruments in chemicals policy, and they include the use of: (a) different types of two-stroke oils; (b) the substance nonylphenol (NP) and its ethoxylates (NPEs), which break down into NPs; and (c) ethylene glycol. The report has been commissioned by the Working Group on Environment and Economics under the Nordic Council of Ministers. SELOC Marine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft. SELOC has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, instructor and student, these manuals are based on actual teardowns done by Chilton Marine's editors/authors in our on-site facility. Providing complete coverage on everything from basic maintenance to engine overhaul, every manual features: -Simple-to-follow, step-by-step, illustrated procedures -Hundreds of exploded drawings, photographs and tables -Troubleshooting sections, accurate specifications and wiring diagrams -Recognized and used by technical trade schools as well as the U.S. military Covers all 2-60 Hp, 1 and 2-cylinder models, 2-stroke models. Over 1,180 illustrations The primary objective of the report was to provide reservoir managers with technical and economic information regarding the possible methods for controlling the levels of MTBE and BTEX in reservoir water supplies. This report comprehensively evaluates options to give practical data and advice to water managers who wish to consider the benefits of dual use (use to store drinking water supplies and use as recreational attractions) without introducing unacceptable health risks into the water bodies being managed. Originally published by AwwaRF for its subscribers in 2003 This guide is a comprehensive book on fishing for salmon and albacore tuna from Washington to California. Trolling tactics, mooching methods, and jigging approaches are covered from A to Z, including terminal tackle, imparted action, what works for each species and more. Chinook, chum, coho, pink, and sockeye salmon are all fair game, and author Bob Mottram covers it all, up and down the shore, as well as the burgeoning, red-hot albacore tuna fishery. Mottram also covers boats, motors, and the vast field of fishing electronics to help you get into the gear you want and need. Recent reports indicate that fish numbers are well above what they've been in the past, and well above expert's forecasts - some of the best numbers since the 1930s. Now is the best time to track down and land the salmon of a lifetime.
