Narrative Theory, Literature, and New Media May 04 2021 Offering an interdisciplinary approach to narrative, this book investigates storyworlds and minds in narratives across media, from literature to digital games and reality TV, from online sadomasochism to oral history databases, and from horror to hallucinations. It addresses two core questions of contemporary narrative theory, inspired by recent cognitive-scientific developments: what kind of a construction is a storyworld, and what kind of mental functioning can be embedded in it? Minds and worlds become essential facets of making sense and interpreting narratives as the book asks how story-internal minds relate to the mind external to the storyworld, that is, the mind processing the story. With essays from social scientists, literary scholars, linguists, and scholars from interactive media studies answering these topical questions, the collection brings diverse disciplines into dialogue, providing new openings for genuinely transdisciplinary narrative

theory. The wide-ranging selection of materials analyzed in the book promotes knowledge on the latest forms of cultural and social meaning-making through narrative, necessary for navigating the contemporary, mediatized cultural landscape. The combination of theoretical reflection and empirical analysis makes this book an invaluable resource for scholars and advanced students in fields including literary studies, social sciences, art, media, and communication.

The Garden of Forking Paths Feb 13 2022 Tendenser i latinamerikansk samtidskunst, illustreret ved gengivelse af 24 kunstneres værker inden for den eksperimenterende kunst.

Developing Narrative Theory Jan 24 2023 This title looks at the contemporary need to study life narratives, considers the emergence and salience of life narratives in contemporary culture, and discusses different forms of narrativity.

A New Theory of Mind Dec 23 2022 This book presents a unique and intuitively compelling way of understanding how humans think. It argues that narratives are the natural mode of thinking, that the “urge” to think narratively reflects known neurological processes, and that, although narrative thinking is a product of evolution, it enables us to transcend our evolutionary limits and actively shape our own futures. In remarkably engaging language, the authors describe how the currency of neural activity in the brain is transformed into the qualitatively different currency of conscious experience—the everyday, purposeful, story-like experience with which we all are familiar. The book then examines the nature of thought and how it leads to purposeful action, discussing, among other concerns, how memories about the past, perceptions about the present, and expectations about the future are structured as plausible, coherent narratives by causation, purpose, and time, and how errors are introduced into one’s narratives, both naturally and by other people (often intentionally), and how those errors bias one’s expectations about the future and the actions taken (or not taken) as a consequence. Each of these discussions is followed by a commentary that ties them to interesting facts and questions from throughout the physical and social sciences. The book is concluded with the argument that narrative thought is what is meant when one uses the word “mind.”

Narrative Theory and the Cognitive Sciences Mar 02 2021 Research on human intelligence has postulated that studying the structure and use of stories can provide important insight into the roots of self and the nature of thinking. In that spirit, this volume focuses on narrative as a crossroads

where cognitive and social psychology, linguistics, literary theory, and the recent hybrid called "cognitive narratology" intersect, suggesting new directions for the cognitive sciences. The ideas contained here demonstrate the importance of narrative as a cognitive style, a genre of discourse, and a resource for literary writing and other forms of communication.

Toward a Cognitive Theory of Narrative Acts Nov 17 2019 Toward a Cognitive Theory of Narrative Acts brings together in one volume cutting-edge research that turns to recent findings in cognitive and neurobiological sciences, psychology, linguistics, philosophy, and evolutionary biology, among other disciplines, to explore and understand more deeply various cultural phenomena, including art, music, literature, and film. The essays fulfilling this task for the general reader as well as the specialist are written by renowned authors H. Porter Abbott, Patrick Colm Hogan, Suzanne Keen, Herbert Lindenberger, Lisa Zunshine, Katja Mellman, Lalita Pandit Hogan, Klarina Priborkin, Javier Gutiérrez-Rexach, Ellen Spolsky, and Richard Walsh. Among the works analyzed are plays by Samuel Beckett, novels by Maxine Hong Kingston, music compositions by Igor Stravinsky, art by Jean-Baptiste-Simeon Chardin, and films by Michael Haneke. Each of the essays shows in a systematic, clear, and precise way how music, art, literature, and film work in and of themselves and also how they are interconnected. Finally, while each of the essays is unique in style and methodological approach, together they show the way toward a unified knowledge of artistic creativity.

Telling Children's Stories Feb 01 2021 The most accessible approach yet to children's literature and narrative theory, *Telling Children's Stories* is a comprehensive collection of never-before-published essays by an international slate of scholars that offers a broad yet in-depth assessment of narrative strategies unique to children's literature. The volume is divided into four interrelated sections: "Genre Templates and Transformations," "Approaches to the Picture Book," "Narrators and Implied Readers," and "Narrative Time." Mike Cadden's introduction considers the links between the various essays and topics, as well as their connections with such issues as metafiction, narrative ethics, focalization, and plotting. Ranging in focus from picture books to novels such as *To Kill a Mockingbird*, from detective fiction for children to historical tales, from new works such as the Lemony Snicket series to classics like *Tom's Midnight Garden*, these essays explore notions of montage and metaphor, perspective and subjectivity, identification and time. Together, they comprise a resource

that will interest and instruct scholars of narrative theory and children's literature, and that will become critically important to the understanding and development of both fields.

Root Narrative Theory and Conflict Resolution Oct 09 2021 This book introduces Root Narrative Theory, a new approach for narrative analysis, decoding moral politics, and for building respect and understanding in conditions of radical disagreement. This theory of moral politics bridges emotion and reason, and, rather than relying on what people say, it helps both the analyst and the practitioner to focus on what people mean in a language that parties to the conflict understand. Based on a simple idea—the legacy effects of abuses of power—the book argues that conflicts only endure and escalate where there is a clash of interpretations about the history of institutional power. Providing theoretically complex but easy-to-use tools, this book offers a completely new way to think about storytelling, the effects of abusive power on interpretation, the relationship between power and conceptions of justice, and the origins and substance of ultimate values. By locating the source of radical disagreement in story structures and political history rather than in biological or cognitive systems, Root Narrative Theory bridges the divides between reason and emotion, realism and idealism, without losing sight of the inescapable human element at work in the world's most devastating conflicts. This book will be of much interest to students of conflict resolution, peace studies and International Relations, as well as to practitioners of conflict resolution.

Possible Worlds Theory and Contemporary Narratology Sep 27 2020 The notion of possible worlds has played a decisive role in postclassical narratology by awakening interest in the nature of fictionality and in emphasizing the notion of world as a source of aesthetic experience in narrative texts. As a theory concerned with the opposition between the actual world that we belong to and possible worlds created by the imagination, possible worlds theory has made significant contributions to narratology. Possible Worlds Theory and Contemporary Narratology updates the field of possible worlds theory and postclassical narratology by developing this theoretical framework further and applying it to a range of contemporary literary narratives. This volume systematically outlines the theoretical underpinnings of the possible worlds approach, provides updated methods for analyzing fictional narrative, and profiles those methods via the analysis of a range of different texts, including contemporary fiction, digital fiction, video games, graphic novels, historical

narratives, and dramatic texts. Through the variety of its contributions, including those by three originators of the subject area—Lubomír Doležel, Thomas Pavel, and Marie-Laure Ryan—Possible Worlds Theory and Contemporary Narratology demonstrates the vitality and versatility of one of the most vibrant strands of contemporary narrative theory.

The Routledge Companion to Narrative Theory Oct 17 2019 The Routledge Companion to Narrative Theory brings together top scholars in the field to explore the significance of narrative to pressing social, cultural, and theoretical issues. How does narrative both inform and limit the way we think today? From conspiracy theories and social media movements to racial politics and climate change future scenarios, the reach is broad. This volume is distinctive for addressing the complicated relations between the interdisciplinary narrative turn in the academy and the contemporary boom of instrumental storytelling in the public sphere. The scholars collected here explore new theories of causality, experientiality, and fictionality; challenge normative modes of storytelling; and offer polemical accounts of narrative fiction, nonfiction, and video games. Drawing upon the latest research in areas from cognitive sciences to complexity theory, the volume provides an accessible entry point for those new to the myriad applications of narrative theory and a point of departure for new scholarship.

Narrative Theory: Major issues in narrative theory May 16 2022

Narratology Nov 10 2021 Since its first publication in English in 1985, Mieke Bal's "Narratology" has become a classic introduction to the major elements comprising a comprehensive theory of narrative texts. In this second edition Professor Bal broadens the spectrum of her theoretical model, updating the chapters on literary narrative and adding new examples from outside of the field of literary studies. Some specific additions include discussions on dialogue in narrative, translation as transformation (including intermedia translation), intertextuality, interdiscursivity, and the place of the subject in narratology. Two new chapters, one on visualization and visual narrative with examples from art and film and the other an examination of anthropological views of narrative, lead Bal to conclude with a re-evaluation of narratology in light of its applications outside the realm of the literary.

Screenplay and Narrative Theory Jul 26 2020 Screenplay and Narrative Theory draws attention to the notion that in order to comprehend complex narrative dynamics, which are encountered in a great variety of narrative genres, forms, and formats, a more comprehensive theory of narrative is required. George Varotsis explains how a work of narrative functions

synergistically and systemically, as well as elucidates the heuristic problem-solving mechanisms that are employed in various structural levels of thought processes, which allow the coherent accumulative derivative we call a story to emerge. The transition from an empirical to theoretical perspective is achieved by introducing characteristics of complex narrative systems: a network of narrative components, i.e. characters, structure, goals, motivations, theme, plot and subplots, narrative action, etc., which are arranged hierarchically over three fundamental levels of structure, i.e. deep, intermediate, and surface structure, that interact parallel to one another in non-linear ways. Varotsis tackles questions about how stories semantically emerge in the underlying dynamics that allow a work of narrative to function as a unified whole.

The Cambridge Companion to Narrative Theory Jan 12 2022 Narrative theory is essential to everything from history to lyric poetry, from novels to the latest Hollywood blockbuster. Narrative theory explores how stories work and how we make them work. This Companion is both an introduction and a contribution to the field. It presents narrative theory as an approach to understanding all kinds of cultural production: from literary texts to historiography, from film and videogames to philosophical discourse. It takes the long historical view, outlines essential concepts, and reflects on the way narrative forms connect with and rework social forms. The volume analyzes central premises, identifies narrative theory's feminist foundations, and elaborates its significance to queer theory and issues of race. The specially commissioned essays are exciting to read, uniting accessibility and rigor, traditional concerns with a renovated sense of the field as a whole, and analytical clarity with stylistic dash. Topical and substantial, The Cambridge Companion to Narrative Theory is an engaging resource on a key contemporary concept.

Queer and Feminist Theories of Narrative Aug 27 2020 This book argues for the importance of narrative theories which consider gender and sexuality through the analysis of a diverse range of texts and media. Classical Narratology, an allegedly neutral descriptive system for features of narrative, has been replaced by a diverse set of theories which are attentive to the contexts in which narratives are composed and received. Issues of gender and sexuality have, nevertheless, been sidelined by new strands which consider, for example, cognitive, transmedial, national or historical inflections instead. Through consideration of texts including the MTV series *Faking It* and the papers of a nineteenth-century activist, Queer and Feminist Theories of Narrative heeds the original call of feminist

narratologists for the consideration of a broader and larger corpus of material. Through analysis of issues including the popular representation of lesbian desire, the queer narrative voice, invisibility and power in the digital age, embodiment and cognitive narratology, reading and racial codes, this book argues that a named strand of narrative theory which employs feminist and queer theories as intersectional vectors is contemporary and urgent. The chapters in this book were originally published as a special issue of the journal *Textual Practice*.

Narrative Sequence in Contemporary Narratology Jun 05 2021 Since Aristotle, there has been an assumption that narrative is a representation of actions or sequences of events, that this representation aims to elicit emotions, and that well-formed narratives constitute a whole, with a beginning, a middle, and an end. The nature, role, and relative importance of constituent notions like "sequence of events" and "plot" have been discussed repeatedly and, as a result, have become rather slippery. While recent developments in contemporary narrative theory, such as unnatural, transmedial, cognitive, and functionalist narratology, shed new light on these notions, *Narrative Sequence in Contemporary Narratology* goes beyond specific approaches to narrative, illuminating sequence and plot in all the diversity of their manifestations, forms, and functions. This volume, edited by Raphaël Baroni and Françoise Revaz, includes contributions from some of the most influential scholars in narrative studies: Alain Boillat, Peter Hühn, Emma Kafalenos, Franco Passalacqua, James Phelan, Federico Piazola, John Pier, Gerald Prince, Brian Richardson, Marie-Laure Ryan, Eyal Segal, and Michael Toolan. Essays range in focus from musical narrativity and rhetorical narrative theory to comic strips and re-examinations of classical and postclassical narratology. All of the essays contribute fresh understandings of foundational concepts in the field of narratology.

Narratology and Interpretation Oct 29 2020 The categories of classical narratology have been successfully applied to ancient texts in the last two decades, but in the meantime narratological theory has moved on. In accordance with these developments, *Narratology and Interpretation* draws out the subtler possibilities of narratological analysis for the interpretation of ancient texts. The articles make a contribution to the theory of narrative as well as to our understanding of ancient literature including epic, lyric, tragedy and historiography.

Narrative Policy Analysis Dec 11 2021 *Narrative Policy Analysis* presents a powerful and original application of contemporary literary theory and policy

analysis to many of today's most urgent public policy issues. Emery Roe demonstrates across a wide array of case studies that structuralist and poststructuralist theories of narrative are exceptionally useful in evaluating difficult policy problems, understanding their implications, and in making effective policy recommendations. Assuming no prior knowledge of literary theory, Roe introduces the theoretical concepts and terminology from literary analysis through an examination of the budget crises of national governments. With a focus on several particularly intractable issues in the areas of the environment, science, and technology, he then develops the methodology of narrative policy analysis by showing how conflicting policy "stories" often tell a more policy-relevant meta-narrative. He shows the advantage of this approach to reading and analyzing stories by examining the ways in which the views of participants unfold and are told in representative case studies involving the California Medfly crisis, toxic irrigation in the San Joaquin Valley, global warming, animal rights, the controversy over the burial remains of Native Americans, and Third World development strategies. Presenting a bold innovation in the interdisciplinary methodology of the policy sciences, *Narrative Policy Analysis* brings the social sciences and humanities together to better address real-world problems of public policy—particularly those issues characterized by extreme uncertainty, complexity, and polarization—which, if not more effectively managed now, will plague us well into the next century.

Narrative Theory Dec 19 2019

Narratives, Health, and Healing Apr 22 2020 This distinctive collection explores the use of narratives in the social construction of wellness and illness. *Narratives, Health, and Healing* emphasizes what the process of narrating accomplishes--how it serves in the health communication process where people define themselves and present their social and relational identities. Organized into four parts, the chapters included here examine health narratives in interpersonal relationships, organizations, and public fora. The editors provide an extensive introduction to weave together the various threads in the volume, highlight the approach and contribution of each chapter, and bring to the forefront the increasingly important role of narrative in health communication. This volume offers important insights on the role of narrative in communicating about health, and it will be of great interest to scholars and graduate students in health communication, health psychology, and public health. It is also relevant to medical, nursing, and allied health readers.

What Stories are Nov 22 2022 A sophisticated and closely reasoned essay on narrative theory which begins by attacking the customary distinction between "story" (narrated events) and "discourse" (narrating medium), *What Stories Are* suggests an alternative definition of narrative based on its discursive properties, and explores the implications of that definition for the traditional categories of narrative theory (plot, character, and so on). This book combines two main tendencies in the study of narrative over the last twenty years, one toward the building of bigger and better structural systems, the other toward the production of ever finer and more intricate interpretations of particular texts. In accurately and fairly presenting previous and alternative theories of narrative, the author attains a striking degree of originality, redefining the subject in new and significant ways. *What Stories Are* is outstanding for the logic and integrity of its intellectual design and for the catholicity of its interests and tastes. Leitch is impressively at home in the literature he treats, and his formulation of the constitutive tension in narrative between teleological and discursive imperatives freshly articulates it and gives it a welcome and unwonted centrality.

Fact and Fiction Aug 07 2021 How can we develop a cultural theory starting with the basic insight that human beings are "storytelling animals"? Within literary studies, narratology is a highly developed field. However, literary historians have not paid much attention to the large and small stories abounding in everyday discourse, guiding all kinds of social activity, and providing common ground for whole societies—but also fueling controversies and hostilities. Moreover, "narrative" is not only a scholarly category but has come into use in many fields of social activity as a tool for cultural self-fashioning. This book is based on the assumption that to a large extent, social dynamics is modeled in an aesthetic manner via narratives. It explores the narrative organization of cultural spaces and time-frames, the mythological shaping of communities and adversaries, and the co-production of narratives and institutions aimed at stabilizing social life. In this framework, the epistemological problem looms large of how an instrument as unreliable as narrative can participate in the creation of a social consensus regarding truth. This problem endows the general topics explored in this book with a particularly contemporary dimension.

Towards a Postmodern Theory of Narrative Jun 24 2020 This book reconstructs the narratological system and its geometrics. Bachelard set out to study the psychological problem presented by our convictions about fire.

A Theory of Musical Narrative Mar 14 2022 Byron Almén proposes an original synthesis of approaches to musical narrative from literary criticism, semiotics, historiography, musicology, and music theory, resulting in a significant critical reorientation of the field. This volume includes an extensive survey of traditional approaches to musical narrative illustrated by a wide variety of musical examples that highlight the range and applicability of the theoretical apparatus. Almén provides a careful delineation of the essential elements and preconditions of musical narrative organization, an eclectic analytical model applicable to a wide range of musical styles and repertoires, a classification scheme of narrative types and subtypes reflecting conceptually distinct narrative strategies, a wide array of interpretive categories, and a sensitivity to the dependence of narrative interpretation on the cultural milieu of the work, its various audiences, and the analyst. *A Theory of Musical Narrative* provides both an excellent introduction to an increasingly important conceptual domain and a complex reassessment of its possibilities and characteristics.

Narrative Beginnings Sep 08 2021 George Eliot wrote that "man cannot do without the make-believe of a beginning." *Beginnings*, it turns out, can be quite unusual, complex, and deceptive. The first major volume to focus on this critical but neglected topic, this collection brings together theoretical studies and critical analyses of beginnings in a wide range of narrative works spanning several centuries and genres. The international and interdisciplinary scope of these essays, representing every major theoretical perspective--including feminist, cognitive, postcolonial, postmodern, rhetorical, ethnic, narratological, and hypertext.

Narrative Theory Jul 18 2022 If we were to compile a list of frequently asked questions about narrative theory, we would put the following two at or near the top: 'what is narrative theory?' and 'how do different approaches to narrative relate to each other?' This book addresses both questions and, more significantly, also demonstrates the extent to which the questions themselves are intertwined.

A Theory of Narrative Drawing Jul 06 2021 This book offers an original new conception of visual story telling, proposing that drawing, depictive drawing and narrative drawing are produced in an encompassing dialogic system of embodied social behavior. It refigures the existing descriptions of visual story-telling that pause with theorizations of perception and the articulation of form. The book identifies and examines key issues in the field, including: the relationships between vision, visualization and

imagination; the theoretical remediation of linguistic and narratological concepts; the systematization of discourse; the production of the subject; idea and institution; and the significance of resources of the body in depiction, representation and narrative. It then tests this new conception in practice: two original visual demonstrations clarify the particular dialectic relationships between subjects and media, in an examination of drawing style and genre, social consensus and self-conscious constraint. The book's originality derives from its clear articulation of a wide range of sources in proposing a conception of narrative drawing, and the extrapolation of this new conception in two new visual demonstrations.

A Theory of Narrative Feb 25 2023 Narrative is a powerful element of human culture, storing and sharing the cherished parts of our personal memories and giving structure to our laws, entertainment, and history. This text presents a wide-ranging and wholly original approach to understanding the nature of narrative.

A Companion to Critical and Cultural Theory May 24 2020 This Companion addresses the contemporary transformation of critical and cultural theory, with special emphasis on the way debates in the field have changed in recent decades. Features original essays from an international team of cultural theorists which offer fresh and compelling perspectives and sketch out exciting new areas of theoretical inquiry Thoughtfully organized into two sections – lineages and problematics – that facilitate its use both by students new to the field and advanced scholars and researchers Explains key schools and movements clearly and succinctly, situating them in relation to broader developments in culture, society, and politics Tackles issues that have shaped and energized the field since the Second World War, with discussion of familiar and under-theorized topics related to living and laboring, being and knowing, and agency and belonging

An Occurrence at Owl Creek Bridge Jun 17 2022 An Occurrence at Owl Creek Bridge is a short story with a twist by American author, Ambrose Bierce. Set during the American Civil War, "An Occurrence at Owl Creek Bridge" is the story of Peyton Farquhar, a Confederate sympathizer condemned to death by hanging from Owl Creek Bridge. This story has been hailed as an early pioneer in "stream of consciousness" storytelling. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. We hope you'll share this book with your friends, neighbors and colleagues and can't wait to hear what you have to say about it. Xist Publishing is a digital-first publisher.

Xist Publishing creates books for the touchscreen generation and is dedicated to helping everyone develop a lifetime love of reading, no matter what form it takes

Recent Theories of Narrative Oct 21 2022

Handbook of Visual Communication Dec 31 2020 This Handbook of Visual Communication explores the key theoretical areas and research methods of visual communication. With chapters contributed by many of the best-known and respected scholars in visual communication, this volume brings together significant and influential work in the discipline. The second edition of this already-classic text has been completely revised to reflect the metamorphosis of communication in the last fifteen years and the ubiquity of visual communication in our modern mediated lifestyle.

Thirteen major theories of communication are defined by the top experts in their fields: perception, cognition, aesthetics, visual rhetoric, semiotics, cultural studies, ethnography, narrative, media aesthetics, digital media, intertextuality, ethics, and visual literacy. Each of these theory chapters is followed by an exemplar study or two in the area, demonstrating the various methods used in visual communication research as well as the research approaches applicable for specific media types. The Handbook serves as an invaluable reference for visual communication theory as well as a useful resource book of research methods in the discipline. It defines the current state of theory and research in visual communication and serves as a foundation for future scholarship and study. The Handbook of Visual Communication is a theoretical and methodological handbook for visual communication researchers and a compilation for much of the theoretical background necessary to understand visual communication. It is required reading for scholars, researchers, and advanced students in visual communication, and it will be influential in other disciplines such as advertising, persuasion, and media studies. The volume will also be essential to media practitioners seeking to understand the visual aspects of how audiences use media to contribute to more effective use of each specific medium.

Postmodern Narrative Theory Apr 15 2022 How have developments in literary and cultural theory transformed our understanding of narrative? What has happened to narrative in the wake of poststructuralism? What is the role and function of narrative in the contemporary world? In this revised, updated and expanded new edition of an established text, Mark Currie explores these central questions and guides students through the complex theories that have shaped the study of narrative in recent

decades. Postmodern Narrative Theory, Second Edition: • establishes direct links between the workings of fictional narratives and those of the non-fictional world • charts the transition in narrative theory from its formalist beginnings, through deconstruction, towards its current concerns with the social, cultural and cognitive uses of narrative • explores the relationship between postmodern narrative and postmodern theory more closely • presents detailed illustrative readings of known literary texts such as Stevenson's Dr Jekyll and Mr Hyde and Conrad's Heart of Darkness, and now features a new chapter on Coetzee's Elizabeth Costello and Slow Man. Approachable and stimulating, this is an essential introduction for anyone studying postmodernism, the theory of narrative or contemporary fiction.

Narrative Theory Sep 20 2022 Narrative Theory offers an introduction to the field's critical and philosophical approaches towards narrative throughout history.

A Companion to Narrative Theory Nov 29 2020 The 35 original essays in A Companion to Narrative Theory constitute the best available introduction to this vital and contested field of humanistic enquiry. Comprises 35 original essays written by leading figures in the field Includes contributions from pioneers in the field such as Wayne C. Booth, Seymour Chatman, J. Hillis Miller and Gerald Prince Represents all the major critical approaches to narrative and investigates and debates the relations between them Considers narratives in different disciplines, such as law and medicine Features analyses of a variety of media, including film, music, and painting Designed to be of interest to specialists, yet accessible to readers with little prior knowledge of the field

Housing Characteristics for Selected Metropolitan Areas Jan 20 2020

Routledge Encyclopedia of Narrative Theory Aug 19 2022 The past several decades have seen an explosion of interest in narrative, with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts. As accounts of what happened to particular people in particular circumstances and with specific consequences, stories have come to be viewed as a basic human strategy for coming to terms with time, process, and change. However, the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars, teachers, and students to have access to a comprehensive reference resource.

Optional-Narrator Theory Apr 03 2021 Optional-Narrator Theory makes a strong intervention in (or against) narratology, pushing back against the widespread belief among narrative theorists in general and theorists of the

novel in particular that the presence of a fictional narrator is a defining feature of fictional narratives.

Narrative Theory in Clinical Social Work Practice Feb 19 2020 This theory-to-practice guide offers mental health practitioners a powerful narrative-based approach to working with clients in clinical practice. It opens with a primer on contemporary narrative theory and offers a robust framework based on the art and techniques of listening for deeper, more meaningful understanding and intervention. Chapters expand on these foundational concepts by applying them to a diverse range of populations and issues, among them race and ethnicity, human sexuality, immigration, and the experience of trauma, grief, and loss. The author's engaging voice, thoughtful pedagogical style, and extensive use of examples and exercises also work together to inform the reader's own narrative of growth and self-knowledge. Included in the coverage:

- Encountering the self, encountering the other: narratives of race and ethnicity.
- Surviving together: individual and communal narratives in the wake of tragedy.
- Spiritual stories: exploring ultimate meaning in social work practice.
- Sexual stories: narratives of sexual identity, gender, and sexual development.
- Leaving home, finding home: narrative practice with immigrant populations.
- Moving on: narrative perspectives on grief and loss.

Narrative Theory in Clinical Social Work Practice is geared toward students as well as seasoned social workers, and professionals and practitioners in related clinical fields interested in informing their work with a narrative approach.

Narratology Mar 22 2020 Since its first publication in English in 1985, Mieke Bal's *Narratology* has become an international classic and the comprehensive introduction to the theory of narrative texts, both literary and non-literary. Providing insights into how readers interpret narrative text, the fourth edition of *Narratology* is a guide for students and scholars seeking to analyze narratives of any language, period, and region with clear, systematic and reliable concepts. With the addition of in-depth analysis of literary nuances and methods, award-winning cultural theorist Mieke Bal continues to present narrative concepts with clarity. Bal uses a systematic framework to better explain how narratives function, are formed, and eventually interpreted by the reader, while presenting a comprehensive study of the surface perception of language, the perceived narrative world, point of view, and characterization.
