Collision Reconstruction Methodologies - Volume 7B - The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media

analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike. Our Fair Ones is a story of a young girl who has the desire to know who she is, why she exists and if there is anything after this life. She and her husband learn to love the gospel of Jesus Christ. Their testimonies grow of him,

but they are met with many challenges. She feels responsible for another woman's babies death. She tells how a trial is an answer to a church leaders prayer. Experience her feelings of peace when their home burns and there are financial set backs. Read how others gain strength from her as she battles cancer twice and receives a kidney after 7 years of dialysis. Learn of her dreams and how she receives instruction to do genealogy work in Finland, Czechoslovakia and Bohemia. She also shares encounters with the evil one and how he is rebuked by the power of God. You feel her love for the Savior, her optimistic attitude will bring readers tender emotions as her story unfolds. Their bond was forged in the crucible of combat. No matter what life threw at them, they were Marines--ready to do anything for each other. But these four decorated veterans now have one hour to stop the unthinkable ... When a small town home invasion results in a tragic death, retired Marine Master Sergeant James "Johnny" Johansen agonizes over questions whose answers threaten his loved ones, his career, and his company. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches. "A while after mom passed, I encouraged dad to actually make a bucket list. When he sent me

his first list I had to laugh because there were only just a few things on it. I suggested that he needed to think bigger and encouraged him to think about other things he might like to do. I also invited him to go to New York City because he had never been there and I have loved exploring the City and felt he would love it too. "So in June of 2019, dad and my youngest sister Christina and I headed out for what turned out to be quite the adventure, full of delight and drama and wonderful experiences that he shares in this book. It was wonderful for me to be a spectator of my dad's experiences in a new place and especially to take him to the Brooklyn Tabernacle to experience in person, the wonderful Brooklyn Tabernacle Choir. In this book, dad will tell part of the story of this experience but there is more that I'd like to share. We arrived an hour early for the service, after taking a bus and a ferry and walking a bit before taking another bus. It was a very hot day and already there was quite a crowd lined up outside the Tabernacle, waiting for the doors to open for the 11:00am service. During our wait, I encouraged dad to drink water but I saw that he was really struggling with the heat and having no place to sit. He was showing signs of exhaustion so I went to the entrance and talked with the two men there and asked if my dad could come inside and wait due to his declining condition. They agreed and dad tells this drama part of the story in this book. "When we were finally seated after the drama, I was beginning to feel claustrophobic. The small, old theatre seats next to me were filled with overstuffed people and I was forced to be squished up against dad and I began to feel anxious. But

when the music started, 3300 people rose to their feet in joy and in worship and I was so overcome with joy that tears just poured from my eyes. I couldn't stop the flow of tears. It was such a beautiful experience to be in the presence of God and just worship Him. It was a day full of happiness and joy and I am grateful to have shared this with dad. "Dad was and still is a great but quiet teacher, teaching mostly by example. When I was very young, we took a family trip to the ocean. Even though I was only three or four, I remember so much about that trip...long walks on the beach with mom, looking for special rocks and shells; clam digging with dad and going to sleep listening to the calming sound of the waves crashing on the shore. One day while dad and I were clam digging, a huge wave swooped over me and took me out to sea. Dad rushed into the waves and caught me before I could be taken to China or wherever. As I look back, I don't remember being scared and the most amazing thing is dad didn't fuss about it at all. He set me back on the sand and we continued to clam dig a bit further away from the ocean waves. I truly believe this formed my initial beliefs about adventure and life...to be fearless. If dad had shown panic or fear, the outcome may have caused me to be fearful instead of fearless. I learned a most valuable lesson that day and have drawn on this lesson so many times in my life." The U.S. Department of Energy (DOE) Office of Energy Efficiency and Renewable Energy and the U.S. Environmental Protection Agency (EPA) jointly maintain a fuel economy website (www.fueleconomy.gov), which helps fulfill their

responsibility under the Energy Policy Act of 1992 to provide accurate fuel economy information [in miles per gallon (mpg)] to consumers. The site provides information on EPA fuel economy ratings for passenger cars and light trucks from 1985 to the present and other relevant information related to energy use such as alternative fuels and driving and vehicle maintenance tips. In recent years, fluctuations in the price of crude oil and corresponding fluctuations in the price of gasoline and diesel fuels have renewed interest in vehicle fuel economy in the United States. (User sessions on the fuel economy website exceeded 20 million in 2008 compared to less than 5 million in 2004 and less than 1 million in 2001.) As a result of this renewed interest and the age of some of the references cited in the tips section of the website, DOE authorized the Oak Ridge National Laboratory (ORNL) Fuels, Engines, and Emissions Research Center (FEERC) to initiate studies to validate and improve these tips. This report documents a study aimed specifically at the effect of engine air filter condition on fuel economy. The goal of this study was to explore the effects of a clogged air filter on the fuel economy of vehicles operating over prescribed test cycles. Three newer vehicles (a 2007 Buick Lucerne, a 2006 Dodge Charger, and a 2003 Toyota Camry) and an older carbureted vehicle were tested. Results show that clogging the air filter has no significant effect on the fuel economy of the newer vehicles (all fuel injected with closed-loop control and one equipped with MDS). The engine control systems were able to maintain the desired AFR regardless of intake

restrictions, and therefore fuel consumption was not increased. The carbureted engine did show a decrease in fuel economy with increasing restriction. However, the level of restriction required to cause a substantial (10-15%) decrease in fuel economy (such as that cited in the literature) was so severe that the vehicle was almost undrivable. Acceleration performance on all vehicles was improved with a clean air filter. Once it was determined how severe the restriction had to be to affect the carbureted vehicle fuel economy, the 2007 Buick Lucerne was retested in a similar manner. We were not able to achieve the level of restriction that was achieved with the 1972 Pontiac with the Lucerne. The Lucerne's air filter box would not hold the filter in place under such severe conditions. (It is believed that this testing exceeded the design limits of the air box.) Tests were conducted at a lower restriction level (although still considerably more severe than the initial clogged filter testing), allowing the air filter to stay seated in the air box, and no significant change was observed in the Lucerne's fuel economy or the AFR over the HFET cycle. Closed-loop control in modern fuel injected vehicle applications is sophisticated enough to keep a clogged air filter from affecting the vehicle fuel economy. However for older, open-loop, carbureted vehicles, a clogged air filter can affect the fuel economy. For the vehicle tested, the fuel economy with a new air filter improved as much as 14% over that with a severely clogged filter (in which the filter was so clogged that drivability was impacted). Under a more typical state of clog, the improvement with a new filter ranged from 2 to 6%. Escalating

gang violence in Denver, Colorado, and in other large U.S. cities captures the attention of the first term President. He wants a solution, and he wants it NOW—but legislation takes years. The Director of Homeland Security suggests that the remedy to the deteriorating situation may be a highly classified program deep within the special charter of FEMA known as Annex K. This deep-black program, nicknamed STARDUST, would be executed beneath the heaviest cloak of secrecy and without the informed consent of Congress.

When the CIA sends Agent Dave McClure to Denver to investigate inexplicable lethal violence being waged with advanced weaponry against organized street gangs, McClure discovers that what has been unleashed is a sinister solution far worse than the problem. He unearths a nightmarish plot to do much more than eliminate gangs in America—rather, it's an attempt to seize the military district of Washington and overthrow the federal government. McClure's own life is now at especially high risk, and the CIA must act quickly and with overwhelming force. But time is short...and the clock is ticking!
