This manual was prepared in close cooperation with British Leyland Motors in order to provide complete, authentic and up-to-date maintenance and repair information to owners, dealership service departments, and other professional mechanics. The Workshop Manual is the official factory manual and includes information from the Driver's Handbook, which is the handbook provided with every new Austin-Healey. This manual contains emission control information that applies specifically to Austin-Healeys manufactured for the United Kingdom and North American markets, and a complete, illustrated catalogue of special tools. The publisher has incorporated additional factory procedures and specifications that have become available following the publication of the original factory information. This manual is therefore the most up-to-date, accurate, and comprehensive service information available for the Austin-

Healey. We offer complete coverage for every Triumph sports car imported into America since 1953. This book will be rather different from the others in the series in that it will be dealing very largely with activities which have been carried out by people other than psychologists. It is true that some psychologists have studied and written about motivation as it affects industry and have even experimented on the shop floor, but on the whole the ideas and activities which will be reported upon herein have emanated mainly from industrial management within industry itself, with some help from researchers and others with affiliations to sociological or management departments in universities. This does not mean that psychologists should not be very well aware of what has been happening over very nearly the last hundred years, since developments have followed a fairly logical sequence and anyone wishing to involve himself in the industrial scene must be conversant with what has gone before, whatever its origin.
