Principles of Research Design and Drug Literature Evaluation Mar 19 2020

Principles of Research Design and Drug Literature Evaluation is a unique resource that provides a balanced approach covering critical elements of clinical research, biostatistical principles, and scientific literature evaluation techniques for evidence-based medicine. This accessible text provides comprehensive course content that meets and exceeds the curriculum standards set by the Accreditation Council for Pharmacy Education (ACPE). Written by expert authors specializing in pharmacy

practice and research, this valuable text will provide pharmacy students and practitioners with a thorough understanding of the principles and practices of drug literature evaluation with a strong grounding in research and biostatistical principles. Principles of Research Design and Drug Literature Evaluation is an ideal foundation for professional pharmacy students and a key resource for pharmacy residents, research fellows, practitioners, and clinical researchers. FEATURES * Chapter Pedagogy: Learning Objectives, Review Questions, References, and Online Resources * Instructor Resources: PowerPoint Presentations, Test Bank, and an Answer Key * Student Resources: a Navigate Companion Website, including Crossword Puzzles, Interactive Flash Cards, Interactive Glossary, Matching Questions, and Web Links From the Foreword: "This book was designed to provide and encourage practitioner's development and use of critical drug information evaluation skills through a deeper understanding of the foundational principles of study

design and statistical methods. Because guidance on how a study's limited findings should not be used is rare, practitioners must understand and evaluate for themselves the veracity and implications of the inherently limited primary literature findings they use as sources of drug information to make evidence-based decisions together with their patients. The editors organized the book into three supporting sections to meet their pedagogical goals and address practitioners' needs in translating research into practice. Thanks to the editors, authors, and content of this book, you can now be more prepared than ever before for translating research into practice." L. Douglas Ried, PhD, FAPhA Editor-in-Chief Emeritus, Journal of the American Pharmacists Association Professor and Associate Dean for Academic Affairs, College of Pharmacy, University of Texas at Tyler, Tyler, Texas

Pharmacards Mar 31 2021 This top-selling medical pharmacology study tool is now in

its Second Edition. Targeted for second year medical students to review and prepare for the USMLE Step 1, these updated cards are organized by mechanism, and feature a template format that conveys information needed for learning and retaining the pharmacology concepts as well as for memorization. Five new cards are added to comprise a section, Fundamentals of Pharmacology, plus 50 additional drugs are covered. Other revisions include renaming Side Effects to Adverse Effects, and inclusion of chemical structures retained only where a clear connection to the mechanism applies.

Pharmcards Jan 21 2023 "When we were studying for the USMLE Step I (the "Boards"), we found that there was no single adequate source for the relevant pharmacology. Many review books were too sparse and telegraphic and left many questions unanswered. On the other hand, major pharmacology texts were too verbose and detailed to use to study for the Boards. We therefore decided to assemble our own summaries of the important drugs. Our goal was to create a reference work

that emphasized the "high-yield" facts but was also complete enough to provide a conceptual framework for learning rather than simple memorization. We opted for an index card format to allow for both an "active" style of flashcard studying and flexible organization. The widespread use of PharmCards since the first edition was published is gratifying and confirmed the need for such a study aid. In this fifth edition, we have redrawn the figures and added full color to enhance their readability. We have expanded the class cards to provide greater detail on drugs for diabetes, lipids, and hepatitis C. We have maintained the grouping of drug cards by category (e.g., adrenergic, cholinergic, and so on) and then by class (e.g., [a[pha]-agonists, [alpha]-antagonists, [beta]-agonists, and so on) as we have received positive feedback that this structure facilitates comparing and contrasting similar agents. Some drugs defy easy classification; in these cases, we have positioned them where we thought they would be most helpful for study. Also note that some diseases are

treated with drugs that span drug categories (e.g., asthma and glaucoma). In these cases, we have listed on each card the name and class of the other relevant drugs to treat that disease"--Provided by publisher.

Dr. O'Banye's Clinical Therapy Cards:
Conduct Disorder Jan 29 2021 Clinical work with difficult populations requires the sharpest, most effective set of clinical tools a clinician can acquire. Most importantly, it requires clinical tools that are direct, speaks a therapeutic language, but also includes no nonsense talk that the population can relate to, and understand. These attributes are exactly what Dr. O'Banye's Group, Individual and Family Clinical Therapy Cards offers both the client and the clinician. Dr. O'Banye's Group, Individual and Family Clinical Therapy Cards comes with 37 cards. The clinical cards direct and assist the client to open up about many difficult topics. The cards contain questions clinicians have difficulty formulating. These questions explore the roots of the clients' issues, as well as

their impact, in the deeper levels of the individual's mind, body and spirit. These cards can be used in group, individual, and family sessions. The client will pick a card randomly from the deck, and address the issue on the card. This random selection is strategic, as it puts the power of card in the client's hand, and makes the therapeutic session much less threatening for the client, which leads to better rapport building between the client and the clinician. Clinical work with these difficult populations requires the sharpest, most effective set of clinical tools a clinician can acquire. Dr. O'Banye's Clinical Therapy Cards:
Prison Nov 07 2021 Developed for work with

individuals in detention or incarceration, this user-friendly therapeutic card set is effective and clinically powerful. Clients, themselves, choose cards from the therapeutic deck. The set includes 37 cards, which direct, and assist the client, in opening up about difficult topics. Questions lead the clinician in exploring the roots of the clients' issues, as well as their impact, in the deeper levels of the mind, body and spirit. Each card addresses a specific issue, containing a *DIRECTIVE* (discussion prompt) on one side, and a *TASK* (what the client is to learn/change as a result) on the other. Cards are typically used by having clients read and address the *DIRECTIVE* in group or individual sessions. This then leads to clinical discussion about the issue prompted by the card. Each issue is related to a particular facet of treatment, and expected to provide the client with insight or coping skills to achieve therapeutic progress, in their area of treatment. After processing the therapeutic prompt, clients can read the *TASK*, which explains how their *DIRECTIVE*

connected to treatment. A Manual is included with the set. The manual explains the theory and etiology of each Therapy Card topic from a client-centered systems approach. This information is very approachable and can be used to psychoeducate clients about the issues they are experiencing. The manual also gives step-by-step instruction in how to use the Therapy Cards during session, ways to present the cards, and how to integrate the cards into treatment. The manual provides content for each card that can be used by the therapist as follow-up information for clients, making Therapy Cards a truly out-of-the-box product that can be used by any clinician. Clinicians appreciate Therapy Cards because they help establish therapeutic rapport, create positive associations with processing therapeutic issues, and help clients make progress in treatment. At the end, clinicians can list the goal given on each card in the therapy notes for each client, to document the clinical intervention used. Therapy Cards can be used in individual, group, or family settings.

Prison Therapy Cards cover the topics: • Relationships • Interpersonal Skills • Re-integrating Into Society • Managing Aggression • Decision Making • Managing Anxiety • Accountability
