*It is vital for organisations to use company analysis to gain understanding of their limiting and enabling factors and strategic capabilities. Profits can then be maximised by selecting the most effective strategies, and through successful implementation of mergers, acquisitions and divestment opportunities. In this book Jenster and Hussey move away from the opinion based SWOT analysis commonly used, to provide a more objective step-by-step approach to objectively analysing an organisation. This important task is clearly explained, with information helpfully displayed in diagrams, and checklists of critical questions provided. In addition to the key, functional areas of management, corporate-wide approaches such as core competencies, critical success factors, industry analysis and the value chain are also examined. The book is illuminated with examples from the authors' own experiences, resulting in a practical and effective approach which will provide a foundation for corporate strategy and add a strategic dimension to a due diligence study - and so prove invaluable to MBA students and lecturers in strategic management. Every manager will be asked to participate in assessing strengths and weaknesses at some time in their career, and this book enables a considerable improvement to be made to many commonly used methods - and for those responsible for the development of strategies, it offers even more. The subject of Strategy is extremely complex and perhaps can be taught only through the use of Cases. Unfortunately, most of the available cases in Strategic Management tend to be extremely long, which test more the patience rather than the intellectual rigour. This book thus fulfills the void in the literature by offering a bouquet of cases that are designed not only to test the operational understanding but the conceptual and intellectual discipline that the reader must inculcate to be a successful strategist. The book contains 24 cases, ranging from mammoth public sector organisations like SBI and SAIL to global corporations like Cray and Apple, as also the sublimely interesting episodes in the like of Phoolan Devi and Princess Diana. All the cases are extremely readable, and are designed to introduce the different aspects of Strategic Management to the reader. The book is a must read for students, strategists as well as practicing managers. Gives

*highlights key debates within the discipline, whilst an emphasis on the practical throughout the book helps you turn theory into practice This textbook focuses on strategic management in emerging market contexts. It delineates the border between business level strategy and corporate strategy to better align business level and corporate level strategy. Examining some of the new and emerging issues in strategic management, Loizos Heracleous offers a fresh approach to the established ideas of strategy. Beginning with the historical development of the strategy field, including the influence of industrial organisation and the resource-based view, he develops a new perspective labelled an 'organisational action' view of strategy. This approach is theoretically underlain by organisation theory and takes seriously such issues as the role of agency, the need for a longitudinal focus on process, the complexities of strategy implementation, and organisational facets such as strategic choice, organisational culture, organisational discourses and learning. Combining theoretical subtlety with an applied orientation, Heracleous examines topical areas such as corporate governance, inter-organisational networks, and organising for the future. With original research and extensive surveys of the strategy literature, combined with a strong practical orientation, this book is ideal for MBA students, strategy researchers and the more thoughtful practitioner. This book reviews the general theory of strategy, relates it to the particular circumstances of the construction industry, and shows how it can be applied in practice. It brings together ideas from economics, marketing, management, business and politics to develop strategic management for both contractors' firms and the associated professions. Substantial changes have occurred*

*in the industry since the book was first published in 1991. This Second Edition reflects the major developments that have followed the Latham and Egan reports, and includes new chapters on international strategy and marketing, showing how they can contribute to the strategic planning of construction organizations. The book will provide a valuable tool for the strategic development of construction firms. "Ten years separate the editions during which period a significant number of British, (and other), construction firms which had survived generations of proprietors merged, changed beyond recognition or ceased trading. One can not but wonder if publication of a work on strategic planning some twenty year earlier might have saved some of them." Construction Manager "The book presents the essential elements for managing at this higher level and should be a must for any construction professional who aspires to an executive position in industry as well as any student for construction management, project management and organizational management in construction. It comes highly recommended" Engineering, Construction and Architectural Management This succinct textbook takes students through the key stages of strategic management: analysis, formulation, and implementation, with an emphasis on providing students with the essential tools of analysis. Many theoretical as well as practical books on management theory analyze a range of subjects from strategic management to business strategy, competitive strategy, marketing management, strategic marketing, one-to-one marketing, consumer behaviorism, growth strategy, functional strategy, and technology management. In addition, there are also many how-to books on strategy formulation. But not many books on the topic are written*

*with a step-by-step guide on making practical strategic management decisions. The author presents 15 steps that combine strategy and marketing aspects in business. The steps are presented systematically and holistically. Readers will be able to maintain the “big picture” perspective, while being able to dive deep into each step. The guide is not written for “ideal situations” in business. Much attention is given to being aware of market trends, business competition, and the limitations of resources, to be able to apply practical strategic thinking in business. A major textbook on strategic management which not only deals fully with the theoretical aspects of corporate planning, but also provides practical guidance on implementation. Now completely revised and updated this book is particularly suitable for the student or manager who needs to relate strategic thinking to current practice. The format has been enlarged and the interior of the book re-designed. The fourth edition treats both analytical and behavioural aspects of planning in depth. Strategic analysis is covered in particular detail, with examples reporting proven - and often original - applications of these theories. Six major case studies have been added to illustrate the application of strategic management theory in practice and a chapter discusses the impact of new approaches to strategy. With comprehensive reference lists, and a guide to research resources, this volume will prove invaluable to researchers and advanced students as well as to the practising manager. A lecturer's resource is available on the BH website which contains a Powerpoint presentation, additional case studies and notes and exercises for seminar use. *This book is a comprehensive, accessible and expert introduction to strategy within a media management context. This provides the foundation for part two, which analyses a number of strategic topics central to the media sector, such as technological change, organisational structure, leadership, and creativity and innovation. The chapters follow the same structure: the relevant theory is outlined, its application to the media industry is discussed, and case studies from the media industry are used*

*to illustrate the theory and illuminate its relevance for the media field. The cases and examples used come from all sectors of the industry and a range of geographic regions and include News Corporation, Endemol, BBC, Bertelsmann, CNN, MTV, Disney and Pixar. Strategic Management for Hospitality and Tourism is a vital text for all those studying cutting edge theories and views on strategic management. Unlike others textbooks in this area, it goes further than merely contextualizing strategic management for hospitality and tourism, and avoids using a prescriptive, or descriptive approach. It looks instead, at the latest in strategic thinking and theories, and provides critical and analytical discussion as to how and if these models and theories can be applied to the industry, within specific contexts such as culture, profit and non-profit organizations. This title also provides online support material for tutors and students, in the form of guidelines for instructors on how to use the textbook, PowerPoint presentations and case studies plus additional exercises and web links for students.*
