In this book, J.J. Clarke shows us how Taoist texts, ideas, and practices have been assimilated within a whole range of Western ideas and agendas. We see how Chinese thinkers such as Lao-tzu and Chuang tzu, along with practices such as Feng Shui and Tai Chi, have been used as a key Western inspiration in religion, philosophy, ethics, politics, ecology and health. The Tao of the West not only provides a fascinating introduction to Taoism, it also offers a timely insight into the history of the West's encounter with this ancient tradition, and into the issues arising from inter-cultural dialogue. Anyone interested in understanding the key influence Taoism has had on the West will welcome and embrace this book. The multicultural world of today is often said to be marked by a certain kind of exoticization: a "fetishizing process", as Graham Huggan has called it, which separates a "first world" from a "third world", the Occident from the Orient. The essays collected here re-assess this tendency, not least by focusing on the kinds of intellectual tourism and dilettantism to which it has given rise. The wider context of these analyses is a postcolonial scenario where literatures and languages can move from the "exotic" to the comparatively "familiar" space of contemporary writings; where an exotic mythos can live on into the familiar present; and where certain perceptions and representations of peoples, of literatures, and of languages have turned exoticization and familiarization into global modes of mass-cultural consumption. Especially by exploring the liminalities between different cultures, this collection manages to trace both the history and the politics of exoticist representation and, in so doing, to make a significant critical intervention. M.C. Richards' CENTERING, published 25 years ago, went on to sell 120,000 copies and became a classic on the melding of spirit and art and the discovery of the self through creativity. This is the first major collection of her richly imagistic poetry which combines previous work with new poems written in the past decade. Richards here inquires about the essence and power of the imagination, and advocates viewing the world in images that "make us whole." "The world will change," she says, "when we imagine it differently," This new book includes eight color paintings by Thomas Buechner, with the poems they inspired. Battling disease, championing new techniques, recommending necessary medications, and offering comfort and guidance to those in need are just some of the many responsibilities with which healers over time have been charged. Even as the field of medical science rapidly evolves, doctors, researchers, and other medical professionals serve as significant reminders of the human element that has sustained the craft of healing for millennia. Readers discover surveys of the lives of many of those who are persevered in their pioneering quest for new and improved ways to treat a variety of ailments and conditions. It is no exaggeration to say that the Hankey, a small British ship that circled the Atlantic in 1792 and 1793, transformed the history of the Atlantic world. This extraordinary book uncovers the long-forgotten story of the Hankey, from its altruistic beginnings to its disastrous end, and describes the ship's fateful impact upon people from West Africa to Philadelphia, Haiti to London. Billy G. Smith chased the story of the Hankey from archive to archive across several continents, and he now brings back to light a saga that continues to haunt the modern world. It began with a group of high-minded British colonists who planned to establish a colony free of slavery in West Africa. With the colony failing, the ship set sail for the Caribbean and then North America, carrying, as it turned out, mosquitoes infected with yellow fever. The resulting pandemic as the Hankey traveled from one port to the next was catastrophic. In the United States, tens of thousands died in Philadelphia, New York, Boston, and Charleston. The few survivors on the Hankey eventually limped back to London, hopes dashed and numbers decimated. Smith links the voyage and its deadly cargo to some of the most significant events of the era—the success of the Haitian slave revolution, Napoleon's decision to sell the Louisiana Territory, a change in the geopolitical situation of the new United States—and spins a riveting tale of unintended consequences and the legacy of slavery that will not die. From the award-winning, bestselling author of *Americanah* and *We Should All Be Feminists*—a haunting story of love and war • Recipient of the Women's Prize for Fiction "Winner of Winners" award With effortless grace, celebrated author Chimamanda Ngozi Adichie illuminates a seminal moment in modern African history: Biafra's impassioned struggle to establish an independent republic in southeastern Nigeria during the late 1960s. We experience this tumultuous decade alongside five unforgettable characters: Ugwu, a thirteen-year-old houseboy who works for Odenigbo, a university professor full of revolutionary zeal; Olanna, the professor's beautiful young mistress who has abandoned her life in Lagos for a dusty town and her lover's charm; and Richard, a shy young Englishman infatuated with Olanna's willful twin sister Kainene. *Half of a Yellow Sun* is a tremendously evocative novel of the promise, hope, and disappointment of the Biafran war. Emerging from Nottingham in the summer of 1989, the DiY Collective were one of the first house sound systems in the UK. Merging the anarchic lineage of the free festival scene, the cultural and political anger of bands like Crass with the new, irresistible electronic pulse of acid house, they bridged the idealistic void left by the moral implosion of the commercial rave scene. From Castlemorton to the Café del Mar, the DiY sound and DJs became internationally renowned and beneath their banners of liberty, collectivism and untrammelled hedonism achieved an underground cult status that endures to this day. Having celebrated their thirtieth anniversary in 2109, DiY continue to challenge the idea that dance music is apolitical and to celebrate the ideology of liberation through fun. Written by Harry Harrison, one of DiY's founding members, this book traces their origins back to early formative experiences, describing in detail the seminal clubs, parties, festivals and records that forged the collective. *Dreaming in Yellow* is an attempt to distil the story of DiY's tumultuous existence and the remarkably eclectic, outrageous and occasionally deranged story of them doing it themselves. Born Eunice Waymon in Tryon, North Carolina, Nina Simone (1933-2003) began her musical life playing classical piano. A child prodigy, she wanted a

career on the concert stage, but when the Curtis Institute of Music rejected her, the devastating disappointment compelled her to change direction. She turned to popular music and jazz but never abandoned her classical roots or her intense ambition. By the age of twenty six, Simone had sung at New York City's venerable Town Hall and was on her way. Tapping into newly unearthed material on Simone's family and career, Nadine Cohodas paints a luminous portrait of the singer, highlighting her tumultuous life, her innovative compositions, and the prodigious talent that matched her ambition. With precision and empathy, Cohodas weaves the story of Simone's contentious relationship with audiences and critics, her outspoken support for civil rights, her two marriages and her daughter, and, later, the sense of alienation that drove her to live abroad from 1993 until her death. Alongside these threads runs a more troubling one: Simone's increasing outbursts of rage and pain that signaled mental illness and a lifelong struggle to overcome a deep sense of personal injustice.

In this first book-length study of Stevie Smith, Romana Huk reassesses the work of this major twentieth-century woman writer as emerging not only from the practices of female literary modernism, but also from within the tumultuous cultural context of mid-century Europe. Huk considers both the poems and the novels in the light of their cultural and literary context. Amongst the work treated here is Smith's rarely discussed trilogy of novels: *Novel on Yellow Paper*, *Over the Frontier* and *The Holiday*. After Manuel Cruz moves from the United States to the South American Republic of Banador, he thinks he is going to live in paradise. Instead, he finds himself hiding out in a hut at the edge of a marsh, after leaving behind his wife, children, and haciendas. Somebody wants Manuel dead, and he thinks it is a diabolical political genius the president of Banador. President Alejandro has an insatiable thirst for power. In just two years, he has seized control of nearly every major branch of the government and two television stations that pepper the airwaves with self-indulgent propaganda all without a coup d'état. At one time, Manuel was not only President Alejandro's good friend, but also his presidential advisor. But when Alejandro makes a covert state visit to Cuba to meet with Fidel Castro, Manuel takes revenge. Soon Alejandro's wife and their children are leaving Banador for Europe; she wants a divorce, and Alejandro wants nothing more than for Manuel to disappear forever. In a last attempt to save his life, Manuel helps Alejandro's political opponent defeat his former friend in the upcoming presidential election but as turmoil continues to swirl around him, he wonders if he will ever be able to trust anyone again.

Abandoned by her father and neglected by her self-centered, unstable mother, Sheila McGee cannot wait to escape the drudgery of her mill village life in Northern Ireland. Her classic Irish beauty helps her win the 1941 Linen Queen competition, and the prize money that goes with it finally gives her the opportunity she's been dreaming of. But Sheila does not count on the impact of the Belfast blitz which brings World War II to her doorstep. Now even her good looks are useless in the face of travel restrictions, and her earlier resolve is eroded by her mother's fear of being left alone. When American troops set up base in her village, some see them as occupiers but Sheila sees them as saviors--one of them may be her ticket out. Despite objections from her childhood friend, Gavin O'Rourke, she sets her sights on an attractive Jewish-American army officer named Joel Solomon, but her plans are interrupted by the arrival of a street-wise young evacuee from Belfast. Frustrated, Sheila fights to hold on to her dream but slowly her priorities change as the people of Northern Ireland put old divisions aside and bond together in a common purpose to fight the Germans. Sheila's affection for Joel grows as she and Gavin are driven farther apart. As the war moves steadily closer to those she has grown to love, Sheila confronts more abandonment and loss, and finds true strength, compassion, and a meaning for life outside of herself.

It's America's most popular sport, played by thousands, watched by millions, and generating billions in revenues every year. It's also America's most controversial sport, haunted by the specter of life-threatening injuries and plagued by scandal, even among its most venerable personalities and institutions. At the college level, we often tie football's tales of corruption and greed to its current popularity and revenue potential, and we have vague notions of a halcyon time--before the new College Football Playoff, power conferences, and huge TV contracts. Perhaps we conjure images of young Ivy Leaguers playing a gentleman's game, exemplifying the collegial in collegiate. What we don't imagine is a game described in 1905, not today, as "a social obsession--this boy-killing, man-mutilating, education-prostituting, gladiatorial sport." In *The Opening Kickoff*, Dave Revsine tells the riveting story of the formative period of American football (1890-1915). It was a time that saw the game's meteoric rise, fueled by

overflow crowds, breathless newspaper coverage and newfound superstars—including one of the most thrilling and mysterious the sport has ever seen. But it was also a period racked by controversy in academics, recruiting, and physical brutality that, in combination, threatened football's very existence. A vivid storyteller, Revsine brings it all to life in a captivating narrative. Commissioned by Madam Mao, also known as Jiang Qing (1914-1991), the Yellow River Piano Concerto (1968) is scored for Western orchestra and piano. The piano concerto is based on a previous composition--the Yellow River Cantata (1938) by Xian Xinghai (1909-1945). Like its namesake, the Yellow River, the piano concerto has a tumultuous history and background. The piano concerto was arranged by a group of four composers: Yin Chengzong (b. 1941), Chu Wanghua (b. 1941), Sheng Lihong (b. 1926), and Liu Zhuang (b. 1932) during the Cultural Revolution (1966-1976). Prior to the concerto, all forms of Western music were banned and classical musicians suffered great persecution. The Yellow River Piano Concerto displays aspects of Chinese nationalism and Socialist Realism fused together in virtuosic pianistic display. The People's Republic of China often sought to emulate the Soviet Union, which was considered the elder brother and a suitable model. Ideologies, political practices, cultural reform and the revolutions of the Soviet Union were adapted and sinified by the Communist Party in China by Mao Zedong (1893-1976). This document examines the influences of Mao's Socialist Realism and revolutionary Romanticism on the Yellow River Piano Concerto as contained in his Talks at the Yan'an Forum on Literature and Art (1942) and Jiang Qing's speeches of 1964. The use of the piano and the form of the concerto raises many questions, as these contradicted the revolutionary elements of nationalism and Communism. The piano is not an instrument native to China, and the concerto form elevates a soloist above an orchestra. The document aims to discover the justification for the use of the piano, a Western instrument, which was considered bourgeois during the Cultural Revolution. Virtuosity and folk-like simplicity are both exploited with a political agenda in the concerto. The concerto had to embody the revolutionary slogans, "Make the old serve the new" and "Foreign things to serve China", to legitimize the piece. The Yellow River Piano Concerto displays the practice of the cultural and artistic policies of the Cultural Revolution and their contradictions. Traumatized by his past as a Bolivian soldier who, in a sudden coup d'etat, was forced to participate in atrocities, Alfredo flees to Montreal, haunted by the dead. He rides the Montreal metro and pours his guilt and shame into his writing, until he falls for a woman without a nation—a Kurdish freedom-fighter trying to blast an independent Kurdistan into existence. As the net of intrigue closes in on his lover, Alfredo is forced to face more fully his own violent past. In a world where the intimate collides with the official and the past is made and remade again in a new country, Alejandro Saravia's novel in turn refuses to be bound by a single genre, style, or even language. Reminiscent of Michael Ondaatje's *In the Skin of a Lion* in its exploration of the complicated relationship between nation, memory, and identity, *Red, Yellow, Green* considers what a place can mean to people who are out of place. At once heartbreaking and uplifting, bleak and humorous, Saravia offers a poignant reminder of the power of generosity and love. The groundbreaking research into yellow fever in the first three decades of the twentieth century has been hailed as one of the greatest medical achievements in history. Despite extensive literature detailing the chain of events that constitute that history, the scientific background behind the controversies, tragedies, conflicts, and ultimate triumphs has not received much attention. Revisiting the Tumultuous Yellow Fever Investigations in the First Three Decades of the Twentieth Century provides an in-depth analysis of the science behind the history of yellow fever research, revealing some significant surprises, and providing valuable insight into the history of humanity's struggle against a scourge that ravaged the civilized world for more than a few centuries. Half of a Yellow Sun is a tremendously evocative novel of the promise, hope, and disappointment of the Biafran war. A rare insider's account of the inner workings of the Japanese economy, and the Bank of Japan's monetary policy, by a career central banker The Japanese economy, once the envy of the world for its dynamism and growth, lost its shine after a financial bubble burst in early 1990s and slumped further during the Global Financial Crisis in 2008. It suffered even more damage in 2011, when a severe earthquake set off the Fukushima Daiichi nuclear disaster. However, the Bank of Japan soldiered on to combat low inflation, low growth, and low interest rates, and in many ways it served as a laboratory for actions taken by central banks in other parts of the world. Masaaki Shirakawa, who led the bank as governor from 2008 to 2013, provides a rare insider's account of the workings of Japanese economic and monetary policy during this period and how it challenged mainstream economic thinking. Opposing Democracy in the Digital Age is about why ordinary people in a democratizing state oppose democracy and how they leverage both traditional and social media to do so. Aim Sinpeng focuses on the people behind popular, large-scale antidemocratic movements that helped bring down democracy in 2006 and 2014 in Thailand. The yellow shirts (PAD—People's Alliance for Democracy) that are the focus of the book are antidemocratic movements grown out of democratic periods in Thailand, but became the catalyst for the country's democratic breakdown. Why, when, and how supporters of these movements mobilize offline and online to bring down democracy are some of the key questions that Sinpeng answers. While the book primarily uses a qualitative methodological approach, it also uses several quantitative tools to analyze social media data in the later chapters. This is one of few studies in the field of regime transition that focuses on antidemocratic mobilization and takes the role of social media seriously. Western classical music has become as Chinese as Peking Opera, and it has woven its way into the hearts and lives of ordinary Chinese people. This lucidly written account traces the biographies of the bold visionaries who carried out this musical merger. Rhapsody in Red is a history of classical music in China that revolves around a common theme: how Western classical music entered China, and how it became Chinese. China's oldest orchestra was founded in 1879, two years before the Boston Symphony. Since then, classical music has woven its way into the lives of ordinary Chinese people. Millions of Chinese children take piano and violin lessons every week. Yet, despite the importance of classical music in China - and of Chinese classical musicians and composers to the world - next to nothing has been written on this fascinating subject. The authors capture the events with the voice of an insider and the perspective of a Westerner, presenting new information, original research and insights into a topic that has barely been broached elsewhere. "Every chapter is as exiting as it is revealing. The book is thoroughly researched, with superb bibliography. I am ecstatic; my students will be electrified." - Clive M. Marks, Chairman, The London College of Music, Trustee, Trinity College of Music and The London Philharmonic Orchestra Emerging from Nottingham in the summer of 1989, the DiY Collective were one of the first house sound systems in the UK. An earthquake can strike without warning and wreak horrific destruction and death, whether it's the catastrophic 2010 quake that took a devastating toll on the island nation of Haiti or a future great earthquake on the San Andreas Fault in California, which scientists know is inevitable. Yet despite rapid advances in earthquake science, seismologists still can't predict when the Big One will hit. Predicting the Unpredictable explains why, exploring the fact and fiction behind the science—and pseudoscience—of earthquake prediction. Susan Hough traces the continuing quest by seismologists to forecast the time, location, and magnitude of future quakes. She brings readers into the laboratory and out into the field—describing attempts that have raised hopes only to collapse under scrutiny, as well as approaches that seem to hold future promise. She also ventures to the fringes of pseudoscience to consider ideas outside the scientific mainstream. An entertaining and accessible foray into the world of earthquake prediction, Predicting the

Unpredictable illuminates the unique challenges of predicting earthquakes.
