The Ogden Family In America, Elizabethtown Branch, And Their English Ancestry; John Ogden, The Pilgrim, And His Descendants, 1640-1906 Feb 27 2021 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

*The Organizational History of Field Artillery 1775-2003* Oct 26 2020 The newest volume in the Army Lineage Series, "The Organizational History of Field Artillery" addresses the need for a modern work recording the historical structure, strength, disposition, materiel, and technical and tactical doctrine of field artillery in the U.S. Army. Although several books on field artillery have appeared over the past thirty years--some popular histories and a few scholarly works--this one is intended to emphasize the organizational structure of the branch rather than its weapons or operations. The publication includes charts and tables showing the organization of field artillery over the last 225 years, as well as photographs and artwork depicting artillerymen and their weapons in both war and peace. The book was designed to complement the volume published in 1985 in the series covering the lineages and honors of Regular Army and Army Reserve field artillery regiments, which is currently being updated to include commands, brigades, groups, and regiments in all three components. This updated edition will also be published shortly by the Center of Military History. Taken together, these volumes will provide an unparalleled portrait of one of the Army's basic combat arms as it has evolved over the past two hundred fifty years.

Intelligent Projects Using Python Jun 21 2020 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

**Irishness and Womanhood in Nineteenth-Century British Writing** Nov 19 2022 In *The Wild Irish Girl*, the powerful Irish heroine's marriage to a heroic Englishman symbolizes the Anglo-Irish novelist Lady Morgan's re-imagining of the relationship between Ireland and Britain and between men and women. Using this most influential of pro-union novels as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps out the genealogy of this development, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s. Tracy's model enables him to elaborate the ways in which gender ideals are specifically contested in fiction, the discourses of political debate and social reform, and the popular press, for the purpose of defining not only the place of the Irish in the union with Great Britain, but the nature of Britishness itself.

**War Photographs Taken on the Battlefields of the Civil War** Dec 08 2021 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

*High, Wide and Frightened* May 21 2020 High, Wide and Frightened, first published in 1938, is pioneering aviator Louise Thaden's account of her adventures in the early days of flying. Thaden (1905-1979) earned her pilot's certificate in 1928 and would go on to win numerous long-distance air-races, and set numerous records for high-elevation and long-endurance flights. This edition includes the chapter entitled "Noble Experiment," (omitted from later reissues of the book), which describes Thaden's vision on the use of women in combat. In the final chapter of the book, Thaden describes her friendship with Amelia Earhart, who disappeared in 1937 over the Pacific Ocean.

**Picture Man, The: From the Collection of Bay Area Photographer E.F. Joseph 1927-1979** Jan 29 2021 From 1927 until his death in 1979, E.F. Joseph documented the daily lives of African Americans in the Bay Area. His images were printed in the Pittsburgh Courier and the Chicago Defender but not widely published in his home community. A graduate of the American School of Photography in Illinois, Joseph photographed the likes of such celebrities and activists as Josephine Baker, Mahalia Jackson, Mary McLeod Bethune, and Thurgood Marshall. However, what is perhaps more compelling within these pages are the countless images of everyday citizens--teaching, entertaining, worshipping, working, and serving their community and their nation.

**Chromatin Structure and Dynamics** Nov 14 2019 Biological processes that replicate, preserve and use the genetic information encoded in DNA must operate in the context of chromatin, a highly organized complex of DNA and proteins. These proteins do not merely package the DNA in the tiny volume of the nucleus, but impart the structure the ability to change according to the requirements of the specific process the DNA is involved in. Moreover, chromatin structure is used by the cell to control the activity of DNA. In this volume the basics of chromatin structure and dynamics are presented by established experts in the field.

**Social Assistance in Albania** Nov 07 2021 Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

**Oxidants in Biology** Oct 14 2019 Oxidants, like other aspects of life, involves tradeoffs. Oxidants, whether intentionally produced or by-products of normal metabolism can either mediate a variety of critical biological processes but when present inappropriately cause extensive damage to biological molecules (DNA, proteins, and lipids). These effects can lead to either damage that is a major contributor to aging and degenerative diseases (or to other diseases such as cancer, cardiovascular disease, immune-system decline, brain dysfunction, and cataracts) or normal physiological function- tissue repair, defense against pathogens and cellular proliferation. On the other hand the body is equipped with a complex antioxidant/oxidant handling system which includes both enzymatic and nonenzymatic (i.e. small molecules such as flavonoids, ascorbate, tocopherol, and carotenoids) produced endogenously or derived from the diet. This book focuses on how the same molecules can have favorable or noxious effects depending on location, level and timing. Each chapter focuses on one particular molecule or oxidant/antioxidant system and provides a state of the art review of the current understanding regarding both positive and negative actions of the system under review.

**Craig & Fred** Jan 17 2020 The uplifting and unforgettable true story of a US Marine, the stray dog he met on an Afghan battlefield, and how they saved each other and now travel America together, "spreading the message of stubborn positivity." In 2010, Sergeant Craig Grossi was doing intelligence work for Marine RECON—the most elite fighters in the Corps—in a remote part of Afghanistan. While on patrol, he spotted a young dog "with a big goofy head and little legs" who didn't seem vicious or run in a pack like most strays they'd encountered. After eating a piece of beef jerky Craig offered—against military regulations—the dog began to follow him. "Looks like you made a friend," another Marine yelled. Grossi heard, "Looks like a 'Fred.'" The name stuck, and a beautiful, life-changing friendship was forged. Fred not only stole Craig's heart; he won over the RECON fighters, who helped Craig smuggle the dog into heavily fortified Camp Leatherneck in a duffel bag—risking jail and Fred's life. With the help of a crew of DHL workers, a sympathetic vet, and a military dog handler, Fred eventually made it to Craig's family in Virginia. Months later, when Craig returned to the U.S., it was Fred's turn to save the wounded Marine from Post-Traumatic Stress. Today, Craig and Fred are touching lives nationwide, from a swampy campground in a Louisiana State Park to the streets of Portland, Oregon, and everywhere in between. A poignant and inspiring tale of hope, resilience, and optimism, with a timeless message at its heart—"it is not what happens to us that matters, but how we respond to it"—Craig & Fred is a shining example of the power of love to transform our hearts and our lives.
