Presents the author's thesis that consciousness, in its manifestation in the human quality of understanding, is doing something that mere computation cannot; and attempts to understand how such non-computational action might arise within scientifically comprehensive physical laws. This is about to become your new favorite series." --B&N SF & Fantasy Blog A young man with forbidden magic finds himself drawn into an ancient war against a dangerous enemy in book one of the Licanus Trilogy, the series that fans are heralding as the next Wheel of Time. As destiny calls, a journey begins. It has been twenty years since the godlike Augurs were overthrown and killed. Now, those who once served them -- the Gifted -- are spared only because they have accepted the rebellion's Four Tenets, vastly limiting their powers. As a Gifted, Davian suffers the consequences of a war lost before he was even born. He and others like him are despised. But when Davian discovers he wields the forbidden power of the Augurs, he and his friends Wirr and Asha set into motion a chain of events that will change everything. To the west, a young man whose fate is intertwined with Davian's wakes up in the forest, covered in blood and with no memory of who he is... And in the far north, an ancient enemy long thought defeated begins to stir. The Licanus Trilogy is a series readers will have a hard time putting down--a relentless coming-of-age epic from the very first page. "Storytelling assurance rare for a debut . . . Fans of Robert Jordan and Brandon Sanderson will find much to admire."-- Guardian The Licanus TrilogyThe Shadow of What Was LostAn Echo of Things to ComeThe Light of All That Falls For those who know... that something is going on... The witnesses are legion, scattered across the world and dotted through history, people who looked up and saw something impossible lighting up the night sky. What those objects were, where they came from, and who—or what—might be inside them is the subject of fierce debate and equally fierce mockery, so that most who glimpsed them came to wish they hadn't. Most, but not everyone. Among those who know what they've seen, and—like the toll of a bell that can't be unrung—are forever changed by it, are a pilot, an heiress, a journalist, and a prisoner of war. From the waning days of the 20th century's final great war to the fraught fields of Afghanistan to the otherworldly secrets hidden amid Nevada's dusty neverlands—the truth that is out there will propel each of them into a labyrinth of otherworldly technology and the competing aims of those who might seek to prevent—or harness—these beings of unfathomable power. Because, as it turns out, we are not the only ones who can invent and build...and destroy. Featuring actual events and other truths drawn from sources within the military and intelligence community, Tom DeLonge and A.J. Hartley offer a tale at once terrifying, fantastical, and perhaps all too real. Though it is, of course, a work of... fiction? **SHORTLISTED FOR THE ORANGE PRIZE 2009** In a prison cell in the US, a man stands trembling, naked, fearfully waiting to be shipped to Guantánamo Bay. How did it come to this? he wonders... August 9th, 1945, Nagasaki. Hiroko Tanaka steps out onto her veranda, taking in the view of the terraced slopes leading up to the sky. Wrapped in a kimono with three black cranes swooping across the back, she is twenty-one, in love with the man she is to marry, Konrad Weiss. In a split second, the world turns white. In the next, it explodes with the sound of fire and the horror of realisation. In the numbing aftermath of a bomb that obliterates everything she has known, all that remains are the bird-shaped burns on her back, an indelible reminder of the world she has lost. In search of new beginnings, she travels to Delhi two years later. There she walks into the lives of Konrad's half-sister, Elizabeth, her husband James Burton, and their employee Sajjad Ashraf, from whom she starts to learn Urdu. As the years unravel, new homes replace those left behind and old wars are seamlessly usurped by new conflicts. But the shadows of history - personal, political - are cast over the entwined worlds of the Burtons, Ashrafs and the Tanakas as they are transported from Pakistan to New York, and in the novel's astonishing climax, to Afghanistan in the immediate wake of 9/11. The ties that have bound them together over decades and generations are tested to the extreme, with unforeseeable consequences. Sweeping in its scope and mesmerising in its evocation of time and place, *Burnt Shadows* is an epic narrative of disasters evaded and confronted, loyalties offered and repaid, and loves rewarded and betrayed. A fully illustrated, beautifully produced edition of Junichiro Tanizaki's wise and evocative essay on Japanese culture. 'We find beauty not in the thing itself but in the patterns of shadows, the light and the darkness, that one thing against another creates... Were it not for shadows, there would be no beauty.' This book is in fact a portal. Reading it, you will be led by Junichiro Tanizaki's light touch into a mysterious and tranquil world of darkness and shadows, where gold flashes in the gloom and a deep stillness reigns. If you are accustomed to equate light with clarity, the faded with the worthless and the dim with the dreary, prepare for a courteous but powerful realignment of your ideas. *In Praise of Shadows* is a poetic paean to traditional Japanese aesthetics – in a free-ranging style that moves from architecture to No theatre, and from cookery to lighting, Tanizaki teaches us to see the beauty in tarnished metal, the sombre dignity in unglazed pottery, the primacy of organic materials that bear witness to the regular touch of human hands. It is also astonishingly prescient, offering a gentle warning against the quest for airbrushed perfection, and reminding us that too much light can pollute and obscure our natural world. In this special edition, the text is accompanied by specially selected images to complement Tanizaki's reflections and further illustrate the pattern and beauty of shadows. *Shadow* is a man with a past. But now he wants nothing more than to live a quiet life with his wife and stay out of trouble. Until he learns that she's been killed in a terrible accident. Flying home for the funeral, as a violent storm rocks the plane, a strange man in the seat next to him introduces himself. The man calls himself Mr. Wednesday, and he knows more about Shadow than is possible. He warns Shadow that a far bigger storm is coming. And from that moment on, nothing will ever be the same... Sixteen-year-old Danny Vo is enmeshed in two worlds—his Houston high school and his Vietnamese home life. He's finally caught the eye of beautiful blond Tiffany Marie, only to find out that her brother is a white supremacist. And his life gets even more complicated when his cousin Sang Le comes to live with Danny's family after spending years in a reeducation camp in Vietnam. Failing school and unable to get a job, Sang Le joins a Vietnamese gang—and Danny is determined to help his cousin escape before it's too late. Opening in Calcutta in the 1960s, Amitav Ghosh's radiant second novel follows two families -- one English, one Bengali -- as their lives intertwine in tragic and comic ways. The narrator, Indian born and English educated, traces events back and forth in time, from the outbreak of World War II to the late twentieth century, through years of Bengali partition and violence, observing the ways in which political events invade private lives. From two of the greatest imaginations of our time comes a magnificent novel of adventure and magic...**SHADOW MOON**: First in the Chronicles of the Shadow War. The genius of Star Wars(r) creator George Lucas and the vision of Chris Claremont, the author of the phenomenally bestselling *The Uncanny X-Men* adventures, merge in what must be the fantasy event of the year. In *Shadow Moon*, war and chaos have gripped the land of Tir Asleen. An ancient prophecy reveals one hope: a savior princess who will ascend to the throne when the time is right.

But first, a Nelwyn wanderer must face forces of unimaginable malevolence and dangerous, forbidden rites of necromancy that could bring back a powerful warrior from soulless sleep. George Lucas reshaped filmmaking in the '70s and '80s with his Star Wars and Indiana Jones films. When Bantam Books asked Lucas if he had any stories he would like to develop as novels rather than as films, Lucas turned to his 1988 fantasy film, Willow. "When I wrote the story for Willow, I began with the pre-story," Lucas said, "but the full story was yet to be told." Now, Lucas's vision is being fulfilled with the talented help of Chris Claremont. Having previously taken the reins of what was for a decade the bestselling comic in the western hemisphere (The Uncanny X-Men) Claremont assumes the responsibility of foster parent to Lucas's creation. On sale in hardcover now, and available on BDD Audio Cassette as well, SHADOW MOON is a momentous new adventure for readers looking to spend part of this summer in a fantastic world. SHADOW MOON is one of Bantam Spectra's most exciting publishing events in 1995, the year we celebrate our 10th Anniversary as the premiere publishing imprint of books of speculative fiction. In this 'thrilling. . . profoundly important book' (Christopher Hart, Sunday Times) and Sunday Times Top Ten Bestseller, the acclaimed author of Rubicon gives a panoramic-and timely-account of the rise of Islam In the 6th century AD, the Near East was divided between two great empires: the Persian and the Roman. A hundred years on, and one had vanished for ever, while the other was a dismembered, bleeding trunk. In their place, a new superpower had arisen: the empire of the Arabs. So profound was this upheaval that it spelled, in effect, the end of the ancient world. But the changes that marked the period were more than merely political or even cultural: there was also a transformation of human society with incalculable consequences for the future. Today, over half the world's population subscribes to one of the various religions that took on something like their final form during the last centuries of antiquity. Wherever men or women are inspired by belief in a single god to think or behave in a certain way, they bear witness to the abiding impact of this extraordinary, convulsive age - though as Tom Holland demonstrates, much of what Jews, Christians and Muslims believe about the origins of their religion is open to debate. In the Shadow of the Sword explores how a succession of great empires came to identify themselves with a new and revolutionary understanding of the divine. It is a story vivid with drama, horror and startling achievement, and stars many of the most remarkable rulers ever seen. 'A compelling detective story of the highest order, In the Shadow of the Sword is also a dazzlingly colourful journey into the world of late antiquity. Every bit as thrilling a narrative history as Holland's previous works, In the Shadow of the Sword is also a profoundly important book. It makes public and popular what scholarship has been discovering for several decades now; and those discoveries suggest a wholesale revision of where Islam came from and what it is' (Christopher Hart, Sunday Times) In October 1994, three student filmmakers disappeared in the woods near Burkittsville, Maryland, while shooting a documentary. Five years after attacking the human-colonized worlds of the Spiral Arm, the hydrogues maintain absolute control over stardrive fuel...and their embargo is strangling human civilization. On Earth, mankind suffers from renewed attacks by the hydrogues and decides to use a cybernetic army to fight them. Yet the Terran leaders don't realize that these military robots have already exterminated their own makers - and may soon turn on humanity. Once the rulers of an expanding empire, humans have become the galaxy's most endangered species. But the sudden appearance of incredible new beings will destroy all balances of power. Now for humans and the myriad alien factions in the universe, the real war is about to begin...and genocide may be the result. Seraphina took the literary world by storm with 8 starred reviews and numerous "Best of" lists. At last, her eagerly awaited sequel has arrived—and with it comes an epic battle between humans and dragons. The kingdom of Goredd: a world where humans and dragons share life with an uneasy balance, and those few who are both human and dragon must hide the truth. Seraphina is one of these, part girl, part dragon, who is reluctantly drawn into the politics of her world. As Seraphina gathers this motley crew, she is pursued by humans who want to stop her. But the most terrifying is another half dragon, who can creep into people's minds and take them over. Until now, Seraphina has kept her mind safe from intruders, but that also means she's held back her own gift. A tour de force of a book that begs to be seen as well as to be read."—The Washington Post Book World World renowned scientist Carl Sagan and acclaimed author Ann Druyan have written a Roots for the human species, a lucid and riveting account of how humans got to be the way we are. Shadows of Forgotten Ancestors is a thrilling saga that starts with the origin of the Earth. It shows with humor and drama that many of our key traits—self-awareness, technology, family ties, submission to authority, hatred for those a little different from ourselves, reason, and ethics—are rooted in the deep past, and illuminated by our kinship with other animals. Sagan and Druyan conduct a breathtaking journey through space and time, zeroing in on critical turning points in evolutionary history, and tracing the origins of sex, altruism, violence, rape, and dominance. Their book culminates in a stunningly original examination of the connection between primate and human traits. Astonishing in its scope, brilliant in its insights, and an absolutely compelling read, Shadows of Forgotten Ancestors is a triumph of popular science. Reissue of the legendary 3,500-year-old Papyrus of Ani, the most beautiful of the ornately illustrated Egyptian funerary scrolls ever discovered, restored in its original sequences of text and artwork. Winner of the National Book Critics Circle Award for Criticism and the Mark Lynton History Prize Through the story of the pioneering photographer Eadweard Muybridge, the author of Recollections of My Nonexistence explores what it was about California in the late 19th-century that enabled it to become such a center of technological and cultural innovation The world as we know it today began in California in the late 1800s, and Eadweard Muybridge had a lot to do with it. This striking assertion is at the heart of Rebecca Solnit's new book, which weaves together biography, history, and fascinating insights into art and technology to create a boldly original portrait of

America on the threshold of modernity. The story of Muybridge—who in 1872 succeeded in capturing high-speed motion photographically—becomes a lens for a larger story about the acceleration and industrialization of everyday life. Solnit shows how the peculiar freedoms and opportunities of post-Civil War California led directly to the two industries—Hollywood and Silicon Valley—that have most powerfully defined contemporary society. By exploring the "aesthetics of shadow" in Japanese cinema in the first half of the twentieth century and treating cinematographers and lighting designers as essential collaborators in moviemaking, Daisuke Miyao reinterprets Japanese film history.

Rendering punishment by death is one of the forms of punishment that have been employed through the ages. It is one of the severest punishments. Extinguishing a life is not an ordinary incident and the means employed are also out of the ordinary. Right from early ages; the mode of conducting this punishment varied from place to place; country to country and time to time. This book chronicles the various modes of execution employed from the medieval to the present time; the nature of the case which prompted such a sentence; various cases and the laws behind them. Although majority of the countries have abolished this kind of punishment; there are still some countries where it is prevalent. Around sixty percent of the population lives in such countries. A study of global trends as a whole and more specifically the United States and India; where this trend still exists; has been conducted in this book. It also critically examines procedural precautions taken in the execution. The book is replete with maps; statistics; charts and diagrams showing the public opinion on the subject in the world and the impact of international terrorism to national security on the issue of death punishment. Some of the leading cases in the US and India have been examined; especially that of Deena; which is the only case in India where the judiciary deliberated on the method of execution of death by hanging. In reality, except as a geographical term, Africa doesn't exist'. Ryszard Kapuscinski has been writing about the people of Africa throughout his career. In a study that avoids the official routes, palaces and big politics, he sets out to create an account of post-colonial Africa seen at once as a whole and as a location that wholly defies generalised explanations. It is both a sustained meditation on the mosaic of peoples and practises we call 'Africa', and an impassioned attempt to come to terms with humanity itself as it struggles to escape from foreign domination, from the intoxications of freedom, from war and from politics as theft. In the summer of 1998 two of baseball leading sluggers, Mark McGwire and Sammy Sosa, embarked on a race to break Babe Ruth's single season home run record. The nation was transfixed as Sosa went on to hit 66 home runs, and McGwire 70. Three years later, San Francisco Giants All-Star Barry Bonds surpassed McGwire by 3 home runs in the midst of what was perhaps the greatest offensive display in baseball history. Over the next three seasons, as Bonds regularly launched mammoth shots into the San Francisco Bay, baseball players across the country were hitting home runs at unprecedented rates. For years there had been rumors that perhaps some of these players owed their success to steroids. But crowd pleasing homers were big business, and sportswriters, fans, and officials alike simply turned a blind eye. Then, in December of 2004, after more than a year of investigation, San Francisco Chronicle reporters Mark Fainaru-Wada and Lance Williams broke the story that in a federal investigation of a nutritional supplement company called BALCO, Yankees slugger Jason Giambi had admitted taking steroids. Barry Bonds was also implicated. Immediately the issue of steroids became front page news. The revelations led to Congressional hearings on baseball's drug problems and continued to drive the effort to purge the U.S. Olympic movement of drug cheats. Now Fainaru-Wada and Williams expose for the first time the secrets of the BALCO investigation that has turned the sports world upside down. Game of Shadows: Barry Bonds, BALCO, and the Steroid Scandal That Rocked Professional by award-winning investigative journalists Mark Fainaru-Wada and Lance Williams, is a riveting narrative about the biggest doping scandal in the history of sports, and how baseball's home run king, Barry Bonds of the San Francisco Giants, came to use steroids. Drawing on more than two years of reporting, including interviews with hundreds of people, and exclusive access to secret grand jury testimony, confidential documents, audio recordings, and more, the authors provide, for the first time, a definitive account of the shocking steroids scandal that made headlines across the country. The book traces the career of Victor Conte, founder of the BALCO laboratory, an egomaniacal former rock musician and self-proclaimed nutritionist, who set out to corrupt sports by providing athletes with “designer” steroids that would be undetectable on “state-of-the-art” doping tests. Conte gave the undetectable drugs to 28 of the world's greatest athletes—Olympians, NFL players and baseball stars, Bonds chief among them. A separate narrative thread details the steroids use of Bonds, an immensely talented, moody player who turned to performance-enhancing drugs after Mark McGwire of the St. Louis Cardinals set a new home run record in 1998. Through his personal trainer, Bonds gained access to BALCO drugs. All of the great athletes who visited BALCO benefited tremendously—Bonds broke McGwire's record—but many had their careers disrupted after federal investigators raided BALCO and indicted Conte. The authors trace the course of the probe, and the baffling decision of federal prosecutors to protect the elite athletes who were involved. Highlights of Game of Shadows include: Barry Bonds A look at how Bonds was driven to use performance-enhancing drugs in part by jealousy over Mark McGwire's record-breaking 1998 season. It was shortly thereafter that Bonds—who had never used anything more performance enhancing than a protein shake from the health food store—first began using steroids. How Bonds's weight trainer, steroid dealer Greg Anderson, arranged to meet Victor Conte before the 2001 baseball season with...
