**Fitrah- Mans Natural Disposition** Jul 22 2020 "Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

**Green Boating** Dec 07 2021 The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking

behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

**Sway** Nov 25 2020 A YALSA 2015 Best Fiction for Young Adults Pick In Kat Spears's hilarious and often poignant debut, high school senior Jesse Alderman, or "Sway," as he's known, could sell hell to a bishop. He also specializes in getting things people want--term papers, a date with the prom queen, fake IDs. He has few close friends and he never EVER lets emotions get in the way. For Jesse, life is simply a series of business transactions. But when Ken Foster, captain of the football team, leading candidate for homecoming king, and all-around jerk, hires Jesse to help him win the heart of the angelic Bridget Smalley, Jesse finds himself feeling all sorts of things. While following Bridget and learning the intimate details of her life, he falls helplessly in love for the very first time. He also finds himself in an accidental friendship with Bridget's belligerent and self-pitying younger brother who has cerebral palsy. Suddenly, Jesse is visiting old folks at a nursing home in order to run into Bridget, and offering his time to help the less fortunate, all the while developing a bond with this young man who idolizes him. Could the tin man really have a heart after all? A Cyrano de Bergerac story with a modern twist, Sway is told from Jesse's point of view with unapologetic truth and biting humor, his observations about the world around him untempered by empathy or compassion--until Bridget's presence in his life forces him to confront his quiet devastation over a life-changing event a year earlier and maybe, just maybe, feel something again.

**Finding Pax** Dec 27 2020 'The boat appeared when I didn't expect or, frankly, need her. My bucket list was empty. Life was full...But sailing towards me was a boat that would stir the waters, waking decades of loss, revealing history untold, and restoring a legacy that was lost in the wind. For her and for me, I had to wade into that water. I had to go, to search, to find.' Having fallen hopelessly in love with a 1930s Danish spidsgatter, a beautifully constructed 25 ft wooden double-ender, Kaci embarks on an international search to unravel the mystery of the boat's past, and discovers the many lives Pax touched since she first hit the water in 1936. Kaci Cronkhite's seven year search for Pax's history is an elegant little gem, taking the reader aboard not only for sublime, wind-filled sails but also to eavesdrop the conversations and relationships that are built as she learns more about Pax's past, whilst hugely enjoying her present. Finding Pax is a story of discovery and reconnection like no other. The writing is poetic, spare, and full of wisdom: 'In sailing, in weather, in life and death, answers are not endings and questions are not to be feared. The unknowns keep us moving forward.'

Berserk in the Antarctic May 12 2022 "'This is suicide!' Manuel screamed frantically." So begins an amazing true story of a journey to Antarctica in a 27-foot sailing boat. After travelling through South America to Tierra del Fuego, the only continent David had never visited beckoned to him across treacherous waters. Ships booked for scientific expeditions wouldn't take him, and tourist cruises didn't appeal. Then he saw a little boat in the harbour, its name hand-painted in red on the hull: Berserk. Together with a 'crazy Viking' and a down-on-his-luck Argentinian, the author set sail to follow Shackleton's voyage with little idea of the tumultuous storms, mishaps and emergencies that loomed on the journey to the world's coldest and most inaccessible continent. He brilliantly recounts their experience of the huge waves, the bleak darkness and the delicate balance of personalities where a mutiny was always in the air.

**Twenty Small Sailboats to Take You Anywhere** Jul 02 2021 John Vigor turns the spotlight on twenty seaworthy sailboats that are at home on the ocean in all weather. These are old fiberglass boats, mostly of traditional design and strong construction. All are small, from 20 feet to 32 feet overall, but all have crossed oceans, and all are cheap. Choosing the right boat to take you across an ocean or around the world can be confusing and exasperating, particularly with a tight budget. Vigor sets out to remedy that in this book. He compares the designs and handling characteristics of 20 different boats whose secondhand market prices start at about \$3,000. Interviews with experienced owners (featuring valuable tips about handling each boat in heavy weather) are interspersed with line drawings of hulls, sail plans, and accommodations. Vigor has unearthed the known weaknesses of each boat and explains how to deal with them. He rates their comparative seaworthiness, their speed, and the number of people they can carry in comfort. If you have ever dreamed the dream this book can help you turn it into reality.

**David Vizard's How to Port and Flow Test Cylinder Heads** Feb 09 2022 Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.
